Community Building and Early Public Relations Donnalyn Pompper, 2021 From the start, women were central to a century of westward migration in the U.S. Community Building and Early Public Relations: Pioneer Women's Role on and after the Oregon Trail offers a path forward in broadening PR's Caucasian/White male-gendered history in the U.S. Undergirded by humanist, communitarian, critical race theory, social constructionist perspectives, and a feminist communicology lens, this book analyzes U.S. pioneer women's lived experiences, drawing parallels with PR's most basic functions--relationship building, networking, community building, boundary spanning, and advocacy. Using narrative analysis of diaries and reminiscences of women who travelled 2,000+ miles on the Oregon Trail in the mid-to-late 1800s, Pompper uncovers how these women filled roles of Caretaker/Advocate, Community Builder of Meeting Houses and Schools, served a Civilizing Function, offered Agency and Leadership, and provided Emotional Connection for Social Cohesion. Revealed

also is an inevitable paradox as Caucasian/White pioneer women's interactional qualities made them complicit as colonizers forever altering indigenous peoples' way of life. This book will be of interest to undergraduate and graduate PR students, PR practitioners, and researchers of PR history and social identity intersectionalities. It encourages us to expand the definition of PR to include community building and to revise linear timeline and evolutionary models to accommodate voices of women and people of color prior to the 20th century--

Eliooo Antonio Scarponi, 2016-09-01 By following the instructions in this book, you will become the manufacturer of an idea. This book is an instruction manual for a product that only exists if you build it. Here are the instructions. I have designed this device so that you can produce your food, using some inexpensive Ikea boxes and the directions in this book. This system uses hydroponics, a farming technique that can be used to grow plants in water instead of soil. The reason for using hydroponics is very simple: hydroponics allows you to save up to the 90% of the water used in traditional agriculture systems, requires much less space, and provides you with full control of the nutrients needed by the plants at each stage of their growth.

Another great thing about hydroponics is that you don't have to worry about watering the plants. The system I have designed combines different hydroponics techniques. These are adapted to make them easy to use at home. This means that you become a farmer, perhaps an urban farmer. However, this book is not a book on urban farming, nor is it a general book about hydroponics. This book is a manual that will show you how to build and run a simple hydroponic system with some inexpensive Ikea boxes. I call this system ELI000.
