Techniques of Medieval Armour Reproduction Brian R. Price, Alan R. Williams, 2000 Few historical icons can match the evocative power of the medieval suit of armour, and this epic new book is a complete course in the tools and techniques of the modern armourer's art. Through more than 1,000 detailed photos and clear instruction, Brian Price presents a working handbook for aspiring and active armourers who want to develop their skills in the production of medieval armour in the style of the 14th century. The book is divided into four sections: a sweeping history of armour and its production from its medieval roots to its modern revival; a practical introduction to all the tools and supplies necessary to equip a modern workshop; a thorough review of key techniques; and a series of actual courses in constructing armoured defenses for the head, body, arm, hand and leg. Taking the reader through the construction of an authentic medieval harness from conception to completion, *Techniques of Medieval Armour Reproduction* is a vital addition to the libraries of serious craftsmen, historians, collectors and researchers.

Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

Men and Gods in Mongolia Henning Haslund, 2019-05-28 First published in 1935, *Men & Gods in Mongolia* is rare and unusual travel book that takes the reader into the virtually unknown world of Mongolia, a country only now opening up to the West. Henning Haslund was a Swedish Explorer who accompanied Sven Hedin and other explorers into Mongolia and Central Asia in the 1920s and 30s. Haslund takes the reader to the lost city of Karakota in the Gobi desert, introduces the reader to the Bodgo Gegen, a God-king in Mongolia, and allows the reader to meet Dambin Jansang, the dreaded warlord of the 'Black Gobi'. Alongside the esoteric and mystical material, there is plenty of adventure; caravans across the Gobi desert; kidnapped and held for ransom; initiation into shamanic societies; encounters with warlords; and the violent birth of a new nation.

The Imperial Infantryman's Uplifting Primer - The Damocles Gulf Edition Matt Ralphs, 2008-01-08 Pocket book of the Imperial Guard styled in the form of an artefact of the 41st millennium. Contained within is a wealth of information describing tactics, combat, enemies, prayers and much more all couched in a tongue-in-cheek, pseudo-propagandist rhetoric. The book is filled with numerous sketches and diagrams to accompany the text. This second edition has additional sections on fighting in space and combating the alien Tau.

Approaches to Prototyping R. Budde, K. Kuhlenkamp, L. Mathiassen, H. Züllighoven, 2012-12-06 This conference will focus on the user-oriented development of information systems. Against a background of recent concepts for the implementation of distributed systems based on workstation computers, various communicational, organizational and social issues gain increasing importance in the construction of computer based information systems. There is an urgent need to integrate end-users and other affected groups into the development process. New strategies for system development are thus needed. This was the beginning of the Call for Papers to the Working Conference on Prototyping. Working in the fields of user-oriented software construction and the analysis of communication problems between developers and users we, that is the GMD team involved in this conference and in preparing its Proceedings, sooner or later came across various new concepts to overcome the problems sketched above. Concepts focusing on the quick construction of an operative system such as rapid prototyping or concepts aiming at the human and organizational side of the development process such as Systemeering. Even on a second look, the multitude of different approaches, terms and tools still caused confusion. But despite the differences every concept seemed to have something to do with Prototyping. This, however, proved to be of little help to us, because the term Prototyping itself turned out to be quite fuzzy. In this obviously confused situation we decided that it was time for a working conference.
