Submarine Commander Paul R. Schratz,2013-07-24 A fascinating personal memoir of underwater combat in World War II, told by a man who played a major role in those dangerous operations. Frank and beautifully written, Submarine Commander's breezy style and irrepressible humor place it in a class by itself. This book will be of lasting value as a submarine history by an expert and as an enduring military and political analysis. In early 1943 the submarine USS Scorpion, with Paul R. Schratz as torpedo officer, slipped into the shallow waters east of Tokyo, laid a minefield, and made successful torpedo attacks on merchant shipping. Schratz participated in many more patrols in heavily mined Japanese waters as executive officer of the Sterlet and the Atule. At war's end he participated in the Japanese surrender, aided the release of American POWs, and had a key role in the disarming of enemy suicide submarines. He then took command of the revolutionary new Japanese submarine I-203 and returned it to Pearl Harbor. But this was far from the end of Schratz's submarine career. In 1949 he commissioned the ultramodern USS Pickerel, the most deadly submarine then afloat, and set a world's record in a 21-day, 5,200-mile submerged passage from Hong Kong to Honolulu. With the outbreak of the Korean War, the Pickerel was immediately sent to Korea to participate in secret intelligence operations only recently declassified and never before revealed in print. Schratz's broad military experience makes this a far from ordinary memoir.

American Airpower Comes Of Age—General Henry H. “Hap” Arnold’s World War II Diaries Vol. II [Illustrated Edition] Gen. Henry H. “Hap.” Arnold,2015-11-06 Includes the Aerial Warfare In Europe During World War II illustrations pack with over 180 maps, plans, and photos. Gen Henry H. “Hap.” Arnold, US Army Air Forces (AAF) Chief of Staff during World War II, maintained diaries for his several journeys to various meetings and conferences throughout the conflict. Volume 1 introduces Hap Arnold, the setting for five of his journeys, the diaries he kept, and evaluations of those journeys and their consequences. General Arnold’s travels brought him into strategy meetings and personal conversations with virtually all leaders of Allied forces as well as many AAF troops around the world. He recorded his impressions, feelings, and expectations in his diaries. Maj Gen John W. Huston, USAF, retired, has captured the essence of Henry H. Hap Arnold—the man, the officer, the AAF chief, and his mission. Volume 2 encompasses General Arnold’s final seven journeys and the diaries he kept therein.

German Northern Theater of Operations 1940-1945 [Illustrated Edition] Earl Ziemke,2015-11-06 [Includes 23 maps and 31 illustrations] This volume describes two campaigns that the Germans conducted in their Northern Theater of Operations. The first they launched, on 9 April 1940, against Denmark and Norway. The second they conducted out of Finland in partnership with the Finns against the Soviet Union. The latter campaign began on 22 June 1941 and ended in the winter of 1944-45 after the Finnish Government had sued for peace. The scene of these campaigns by the end of 1941 stretched from the North Sea to the Arctic Ocean and from Bergen on the west coast of Norway, to Petrozavodsk, the former capital of the Karelo-Finnish Soviet Socialist Republic. It faced east into the Soviet Union on a 700-mile-long front, and west on a 1,300-mile sea frontier. Hitler regarded this theater as the keystone of his empire, and, after 1941, maintained in it two armies totaling over a half million men. In spite of its vast area and the effort and worry which Hitler lavished on it, the Northern Theater throughout most of the war constituted something of a military backwater. The major operations which took place in the theater were overshadowed by events on other fronts, and public attention focused on the theaters in which the strategically decisive operations were expected to take place. Remoteness, German security measures, and the Russians’ well-known penchant for secrecy combined to keep information concerning the Northern Theater down to a mere trickle, much of that inaccurate. Since the war, through official and private publications, a great deal more has become known. The present volume is based in the main on the greatest remaining source of unexploited information, the captured German military and naval records. In addition a number of the participants on the German side have very generously contributed from their personal knowledge and experience.

Open Skies Kenneth I. Kellermann, Ellen N. Bouton, Sierra S. Brandt, 2020-01-01 This open access book on the history of the National Radio Astronomy Observatory covers the scientific discoveries and technical innovations of late 20th century radio astronomy with particular attention to the people and institutions involved. The authors have made extensive use of the NRAO Archives, which contain an unparalleled collection of documents pertaining to the history of radio astronomy, including the institutional records of NRAO as well as the personal papers of many of the pioneers of U.S. radio astronomy. Technical details and extensive citations to original sources are given in notes for the more technical readers, but are not required for an understanding of the body of the book. This book is intended for an audience ranging from interested lay readers to professional researchers studying the scientific, technical, political, and cultural development of a new science, and how it changed the course of 20th century astronomy.

Hunting the Bismarck C. S. Forester, 2021-12-09 In 1941, Hitler's deadly Bismarck, the fastest battleship afloat, broke out into the Atlantic. Its mission: to cut the lifeline of British shipping and win the war with one mighty blow. How the Royal Navy tried to meet this threat and its desperate attempt to bring the giant Bismarck to bay is the story C. S. Forester tells with mounting excitement and suspense. 'Britain's last ally conquered. Greece overrun,' said one headline. 'Attack launched on Crete,' said another. 'Yugoslavia overwhelmed.' 'British in full retreat in North Africa.' 'Rommel advances.' 'Will Hitler move into Spain next?' 'German submarines claim huge successes in Atlantic.' 'Scharnhorst and Gneisenau awaiting their moment in Brest.' 'Blitz again rocks England.' And each succeeding map that the daily papers carried showed how the black stain of Nazi conquest was spreading over frontier after frontier.

The Secret War Max Hastings, 2016-05-10 Monumental. --New York Times Book Review NEW YORK TIMES BESTSELLER From one of the foremost historians of the period and the acclaimed author of *Inferno* and *Catastrophe: 1914*, *The Secret War* is a sweeping examination of one of the most important yet underexplored aspects of World War II—intelligence—showing how espionage successes and failures by the United States, Britain, Russia, Germany, and Japan influenced the course of the war and its final outcome. Spies, codes, and guerrillas played unprecedentedly critical roles in the Second World War, exploited by every nation in the struggle to gain secret knowledge of its foes, and to sow havoc behind the fronts. In *The Secret War*, Max Hastings presents a worldwide cast of characters and some extraordinary sagas of intelligence and resistance, to create a new perspective on the greatest conflict in history.

My Opposition Friedrich Kellner, 2018-01-25 This is a truly unique account of Nazi Germany at war and of one man's struggle against totalitarianism. A mid-level official in a provincial town, Friedrich Kellner kept a secret diary from 1939 to 1945, risking his life to record Germany's path to dictatorship and genocide and to protest his countrymen's complicity in the regime's brutalities. Just one month into the war he is aware that Jews are marked for extermination and later records how soldiers on leave spoke openly about the mass murder of Jews and the murder of POWs; he also documents the Gestapo's merciless rule at home from euthanasia campaigns against the handicapped and mentally ill to the execution of anyone found listening to foreign broadcasts. This essential testimony of everyday life under the Third Reich is accompanied by a foreword by Alan Steinweis and the remarkable story of how the diary was brought to light by Robert Scott Kellner, Friedrich's grandson.

The Grand Alliance Winston S. Churchill,2010-06-30 The British, Soviets, and Americans unite in this chapter of the six-volume WWII history by the legendary prime minister and Nobel Prize recipient. The Grand Alliance describes the end of an extraordinary period in British military history, in which Britain stood alone against Germany. Two crucial events brought an end to Britain’s isolation. First was Hitler’s decision to attack the Soviet Union, opening up a battle front in the East and forcing Stalin to look to the British for support. The second was the bombing of Pearl Harbor. US support had long been crucial to the British war effort, and here, Winston Churchill documents his efforts to draw the Americans to aid, including correspondence with President Roosevelt. This book is part of the six-volume account of World War II told from the unique viewpoint of a British prime minister who led his nation in the fight against tyranny. In addition to the correspondence with FDR, the series is enriched with extensive primary sources. We are presented with not only Churchill’s retrospective analysis of the war, but also memos, letters, orders, speeches, and telegrams, day-by-day accounts of reactions as the drama intensifies. Throughout these volumes, we listen as strategies and counterstrategies unfold in response to Hitler’s conquest of Europe, planned invasion of England, and assault on Russia, in a mesmerizing account of the crucial decisions made as the fate of the world hangs in the balance. “A masterly piece of historical writing . . . complete with humor and wit.” —The New Yorker

4 Group Bomber Command Chris Ward,2012-12-19 During the immediate period before World War Two, the RAF modified its command structure to rationalize for rapid expansion. Bomber Command was divided into six operational groups, each flying the same type of aircraft, including Wellingtons, Sterlings, and Lancasters. Chris Ward presents us here with the history of 4 Group Bomber Command, having previously acquainted us with the histories of 3, 5, and 6 Group Bomber Commands in three highly acclaimed volumes, published by Pen and Sword. He continues with characteristic ease, quality of research, and narrative pace, to present us with an operational record of the groups activities during a particularly dramatic period of aviation history.The book contains individual squadron statistics, their commanding officers, stations and aircraft losses. It provides a detailed reference for one of the RAFs most important operational groups.

Maritime Strategy and Sea Denial Milan Vego,2018-12-07 This book focuses on the theory and practice of maritime strategy and operations by the weaker powers at sea. Illustrated by examples from naval and military history, the book explains and analyzes the strategies of the weaker side at sea in both peacetime and wartime; in defense versus offense; the main prerequisites for disputing control of the sea; and the conceptual framework of disputing control of the sea. It also explains and analyzes in some detail the main methods of disputing sea control – avoiding/seeking decisive encounters, weakening enemy naval forces over time, counter-containment of enemy naval forces, destroying the enemy’s military-economic potential at sea, attacks on the enemy coast, defense of the coast, defense/capturing important positions/basing areas, and defense/capturing of a choke point. A majority of the world’s navies are currently of small or medium-size. In the case of a war with a much stronger opponent, they would be strategically on the defensive, and their main objective then would be to dispute control of the sea by a stronger side at sea. This book provides a practical guide to such a strategy. This book would be of much interest to students of naval power, maritime security, strategic studies and military/naval history.

Technical and Military Imperatives L. Brown,2017-10-23 Technical and Military Imperatives: A Radar History of World War II is a coherent account of the history of radar in the second World War. Although many books have been written on the early days of radar and its role in the war, this book is by far the most comprehensive, covering ground, air, and sea operations in all theatres of World War II. The author manages to synthesize a vast amount of material in a highly readable, informative, and enjoyable way. Of special interest is extensive new material about the development and use of radar by Germany, Japan, Russia, and Great British. The story is told without undue technical complexity, so that the book is accessible to specialists and nonspecialists alike.
