Beechcraft T-34 Mentor Pilot's Flight Operating Instructions United States Air Force,2013-04 Designed in 1948 by the brilliant Walter Beech, the T-34 Mentor was intended as a low cost replacement for the T-6/NJ Texan. The aircraft bore many similarities to the Beechcraft Bonanza, but had a two-seat cockpit with bubble canopy, and a conventional tail. The original T-34s were equipped with a piston engine. Fifteen years after production ceased, the design was upgraded and deliveries began of a turbo-prop equipped T-34C Turbo-Mentor, which remained in production until 1990. The T-34 is one of the most reliable aircraft of its type with many remaining in service today, six decades after it was first produced. Over 2300 Mentors in various versions were produced worldwide, including the T-34A for the Air Force and the T-34B variant for the U.S. Navy.

Shamanhood Juha Pentikäinen,Hanna Saressalo,2001 Presumably people who were involved in it discuss the philosophy behind the exhibition Shamans--The Secret World of Siberia's Peoples, on display at the Vapriiki Museum Centre in Tampere, Finland, between May 1998 and January 1999. It was the most extensive display so far of the shamanic collections of Kunstkamera, Museum of Anthropology and Ethnography, founded in the 1720s by Peter the Great. In addition to exploring aspects of Siberian shamanhood, the 19 essays also show links to similar traditions elsewhere in the world. There are a few monochrome illustrations. No index is provided. Securing the Future of U.S. Air Transportation National Research Council,Transportation Research Board,Studies and Information Services,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Committee on Aeronautics Research and Technology for Vision 2050,2003-12-18 As recently as the summer of 2001, many travelers were dreading air transportation because of extensive delays associated with undercapacity of the system. That all changed on 9/11, and demand for air transportation has not yet returned to peak levels. Most U.S. airlines continue to struggle for survival, and some have filed for bankruptcy. The situation makes it difficult to argue that strong action is urgently needed to avert a crisis of undercapacity in the air transportation system. This report assesses the visions and goals for U.S. civil aviation and technology goals for the year 2050.

Standards for the English Language Arts National Council of Teachers of English,1996 This book describes standards for the English language arts and defines what K-12 students should know about language and be able to do with language. The book presents the current consensus among literacy teachers and researchers about what students should learn in the English language arts--reading, writing, listening, speaking, viewing, and visually representing. The first chapter of the book (Setting Standards in the English Language Arts) addresses defining the standards and the need for standards. The second chapter (Perspectives Informing the English Language Arts Standards) discusses the content, purpose, development, and context of the standards. The third chapter presents the 12 standards in detail. The fourth chapter (Standards in the Classroom) presents elementary, middle-school, and high-school vignettes which illustrate how the standards might be implemented in the classroom. The book concludes that these standards represent not an end but a beginning--a starting point for discussion and action. A glossary (containing more than 100 terms), a list of participants, a history of the standards project, an overview of standards projects, state and international English language arts standards, a 115-item annotated list of resources for teachers, and a comment form are attached. A History of Cornell Morris Bishop,2014-10-15 Cornell University is fortunate to have as its historian a man of Morris Bishop's talents and devotion. As an accurate record and a work of art possessing form and personality, his book at once conveys the unique character of the early university—reflected in its vigorous founder, its first scholarly president, a brilliant and eccentric faculty, the hardy student body, and, sometimes unfortunately, its early architecture—and establishes Cornell's wider significance as a case history in the development of higher education. Cornell began in rebellion against the obscurantism of college education a century ago. Its record, claims the author, makes a social and cultural history of modern America. This story will undoubtedly entrance Cornellians; it will also charm a wider public. Dr. Allan Nevins, historian, wrote: I anticipated that this book would meet the sternest tests of scholarship, insight, and literary finish. I find that it not only does this, but that it has other high merits. It shows grasp of ideas and forces. It is graphic in its presentation of character and idiosyncrasy. It lights up its story by a delightful play of humor, felicitously expressed. Its emphasis on fundamentals, without pomposity or platitude, is refreshing. Perhaps most important of all, it achieves one goal that in the history of a living university is both extremely difficult and extremely valuable: it recreates the changing atmosphere of time and place. It is written, very plainly, by a man who has known and loved Cornell and Ithaca for a long time, who has steeped himself in the traditions and spirit of the institution, and who possesses the enthusiasm and skill to convey his understanding of these intangibles to the reader. The distinct personalities of Ezra Cornell and first president Andrew Dickson White dominate the early chapters. For a vignette of the founder, see Bishop's description of his first buildings (Cascadilla, Morrill, McGraw, White, Sibley): At best, he writes, they embody the character of Ezra Cornell, grim, gray, sturdy, and economical. To the English historian, James Anthony Froude, Mr. Cornell was the most surprising and venerable object I have seen in America. The first faculty, chosen by President White, reflected his character: his idealism, his faith in social emancipation by education, his dislike of dogmatism, confinement, and inherited orthodoxy; while the romantic upstate gothic architecture of such buildings as the President's house (now Andrew D. White Center for the Humanities), Sage Chapel, and Franklin Hall may be said to portray the taste and Soul of Andrew Dickson White. Other memorable characters are Louis Fuertes, the beloved naturalist; his student, Hugh Troy, who once borrowed Fuertes' rhinoceros-foot wastebasket for illicit if hilarious purposes; the more noteworthy and the more eccentric among the faculty of succeeding presidential eras; and of course Napoleon, the campus dog, whose talent for hailing streetcars brought him home safely—and alone—from the Penn game. The humor in A History of Cornell is at times kindly, at times caustic, and always illuminating.
