European Pack for Visiting Auschwitz-Birkenau Memorial and Museum Alicja Białecka,2010-01-01 Taking groups of students To The Auschwitz-Birkenau Memorial and Museum is a heavy responsibility, but it is a major contribution to citizenship if it fosters understanding of what Auschwitz stands for, particularly when the last survivors are at the end of their lives. it comes with certain risks, however. This pack is designed for teachers wishing to organise student visits to authentic places of remembrance, and For The guides, academics and others who work every day with young people at Auschwitz. There is nothing magical about visiting an authentic place of remembrance, and it calls for a carefully thought-out approach. To avoid the risk of inappropriate reactions or the failure to benefit from a large investment in travel and accommodation, considerable preparation and discussion is necessary before the visit and serious reflection afterwards. Teachers must prepare students for a form of learning they may never have met before. This pack offers insights into the complexities of human behaviour so that students can have a better understanding of what it means to be a citizen. How are they concerned by what happened at Auschwitz? is the unprecedented process of exclusion that was practised in the Holocaust still going on in Europe today? in what sense is it different from present-day racism and anti-Semitism? the young people who visit Auschwitz in the next few years will be witnesses of the last witnesses, links in the chain of memory. Their generation will be the last to hear the survivors speaking on the spot. The Council of Europe, The Polish Ministry of Education And The Auschwitz-Birkenau Memorial and Museum are jointly sponsoring this project aimed at preventing crimes against humanity through Holocaust remembrance teaching.

Creating Value Through Corporate Restructuring Stuart C. Gilson,2010-04-05 An updated look at how corporate restructuring really works Stuart Gilson is one of the leading corporate restructuring experts in the United States, teaching thousands of students and consulting with numerous companies. Now, in the second edition of this bestselling book, Gilson returns to present new insight into corporate restructuring. Through real-world case studies that involve some of the most prominent restructurings of the last ten years, and highlighting the increased role of hedge funds in distressed investing, you'll develop a better sense of the restructuring process and how it can truly create value. In addition to classic buyout and structuring case studies, this second edition includes coverage of Delphi, General Motors, the Finova Group and Warren Buffett, Kmart and Sears, Adelphia Communications, Seagate Technology, Dupont-Conoco, and even the Eurotunnel debt restructuring. Covers corporate bankruptcy reorganization, debt workouts, vulture investing, equity spin-offs, asset divestitures, and much more Addresses the effect of employee layoffs and corporate downsizing Examines how companies allocate value and when a corporation should pull the trigger From hedge funds to financial fraud to subprime busts, this second edition offers a rare look at some of the most innovative and controversial restructurings ever.

Superperformance Stocks Richard S. Love,2022-05-27 The Author writes about the superperformance stocks of the time, and the common denominators of those stocks. What traits do they have in common, how to find them? Definition of a superperformance stock: One that at least tripled in price and increased at a minimum rate of three times during a two-year period. A move was considered ended if the price failed to reach a new high in less than six months, or if there was a price reaction of 25 percent or more. Stocks that have a chance to become superperformance stocks share some of these characteristics: * Large increases of earnings, especially if the large increase comes as a surprise. * Mergers and acquisitions. * New management. * New products. The best results come after the market has experienced a severe correction or a bear market, because that is the time when there would be many bargain opportunities in that environment. History often repeats itself in the stock market. The names of the stocks change, but the overall situation is always similar. Acceleration of earning power is the most important thing to look for when examining the potential of a stock to become a superperformance stock. And the superperformance move will most often coincide with the bull market cycle of the general market.

Introductory Grammar of Amharic Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's Traite de langue amharique (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language.The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Profiles in Operations Research Arjang A. Assad,Saul I. Gass,2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. I can thoroughly recommend this book. I found it both enlighteningand undeniably gripping, so much so in fact, you may find it difficultto put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork whichwill serve to immortalise [stet] the pioneers of O.R. for many years to come. *For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.
