Dutch Utopia Annette Stott, Hollis Koons McCullough, 2009 Showcasing more than seventy paintings from public and private collections throughout the United States and Europe, *Dutch Utopia: American Artists in Holland, 1880-1914* explores the work of forty-three American artists drawn to Holland during the late nineteenth and early twentieth centuries. Escaping from the rapid urbanization of their time, these artists established colonies in six communities in the Netherlands—Dordrecht, Egmond, Katwijk, Laren, Rijsoord, and Volendam—with all but Dordrecht being small, preindustrial villages. Inspired by their pastoral surroundings as well as the great traditions of seventeenth-century Dutch art and the contemporary Hague school, these American artists created visions of Dutch society underpinned by a nostalgic yearning for a premodern way of life. Some even alluded to America's own colonial Dutch heritage, exploring shared histories and cultural connections between the two countries. Organized by the Telfair Museum of Art in Savannah, Georgia, *Dutch Utopia* examines the appeal of Holland for American artists during this period, through six pivotal themes: the influence of seventeenth-century Dutch painting; the impact of the contemporary Hague School; antimodernism and the American Progressive Movement; points of convergence in national identities; the proliferation of artist colonies in Holland; and the popular construction of "Dutchness" beyond the stereotypes of wooden shoes and windmills. *Dutch Utopia* includes works by

artists who remain celebrated today, such as Robert Henri, William Merritt Chase, and John Singer Sargent, and by painters admired in their own time but less well-known now. These include accomplished women such as Elizabeth Nourse and Anna Stanley, as well as George Hitchcock, Gari Melchers, and Walter MacEwen, who built international reputations with Salon pictures of Dutch landscapes and costumed figures. These artists were among hundreds of Americans who traveled to the Netherlands between 1880 and 1914 to paint and to study. Some lived in Holland for decades, while others stayed only a week or two, but most passed quickly through the major cities to small rural communities, where they created picturesque idylls on canvas.

Wind Energy Explained James F. Manwell, Jon G. McGowan, Anthony L. Rogers, 2010-09-14 Wind energy's bestselling textbook- fully revised. This must-have second edition includes up-to-date data, diagrams, illustrations and thorough new material on: the fundamentals of wind turbine aerodynamics; wind turbine testing and modelling; wind turbine design standards; offshore wind energy; special purpose applications, such as energy storage and fuel production. Fifty additional homework problems and a new appendix on data processing make this comprehensive edition perfect for engineering students. This book offers a complete examination of one of the most promising sources of renewable energy and is a great introduction to this cross-disciplinary field for practising engineers. "provides a wealth of information and is an excellent reference book for people

interested in the subject of wind energy." (IEEE Power & Energy Magazine, November/December 2003) "deserves a place in the library of every university and college where renewable energy is taught." (The International Journal of Electrical Engineering Education, Vol.41, No.2 April 2004) "a very comprehensive and well-organized treatment of the current status of wind power." (Choice, Vol. 40, No. 4, December 2002)

Dutch Paintings of the Seventeenth Century National Gallery of Art (U.S.), Arthur K. Wheelock, 1995 Heda's Banquet Piece, Frans Hals' Willem Coymans, and Rembrandt's Lucretia. Paintings by these and other masters attracted the American collectors P. A. B. Widener, his son Joseph, and Andrew W. Mellon, whose bequests form the heart of the National Gallery's distinguished and remarkably cohesive collection of ninety-one Dutch paintings.

PISA Take the Test Sample Questions from OECD's PISA Assessments OECD, 2009-02-02 This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

The Currency of Empire Jonathan Barth, 2021-06-15 In *The Currency of Empire*, Jonathan Barth explores the intersection of money and power in the early years of North American history, and he shows how the control of money informed English imperial action overseas. The export-oriented mercantile economy promoted by the English Crown, Barth argues, directed the plan for colonization, the

regulation of colonial commerce, and the politics of empire. The imperial project required an orderly flow of gold and silver, and thus England's colonial regime required stringent monetary regulation. As Barth shows, money was also a flash point for resistance; many colonists acutely resented their subordinate economic station, desiring for their local economies a robust, secure, and uniform money supply. This placed them immediately at odds with the mercantilist laws of the empire and precipitated an imperial crisis in the 1670s, a full century before the Declaration of Independence. The *Currency of Empire* examines what were a series of explosive political conflicts in the seventeenth century and demonstrates how the struggle over monetary policy prefigured the patriot reaction to the Stamp Act and so-called Intolerable Acts on the eve of American independence. Thanks to generous funding from the Arizona State University and George Mason University, the ebook editions of this book are available as Open Access (OA) volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other Open Access repositories.

White Cargo Don Jordan, Michael Walsh, 2008-03-08
White Cargo is the forgotten story of the thousands of Britons who lived and died in bondage in Britain's American colonies. In the seventeenth and eighteenth centuries, more than 300,000 white people were shipped to America as slaves. Urchins were swept up from London's streets to labor in the tobacco fields, where life expectancy was no more than two years. Brothels were raided to

provide breeders for Virginia. Hopeful migrants were duped into signing as indentured servants, unaware they would become personal property who could be bought, sold, and even gambled away. Transported convicts were paraded for sale like livestock. Drawing on letters crying for help, diaries, and court and government archives, Don Jordan and Michael Walsh demonstrate that the brutalities usually associated with black slavery alone were perpetrated on whites throughout British rule. The trade ended with American independence, but the British still tried to sell convicts in their former colonies, which prompted one of the most audacious plots in Anglo-American history. This is a saga of exploration and cruelty spanning 170 years that has been submerged under the overwhelming memory of black slavery. *White Cargo* brings the brutal, uncomfortable story to the surface.

Adaptive Strategies for Water Heritage

Carola Hein, 2019-10-18 This Open Access book, building on research initiated by scholars from the Leiden-Delft-Erasmus Centre for Global Heritage and Development (CHGD) and ICOMOS Netherlands, presents multidisciplinary research that connects water to heritage. Through twenty-one chapters it explores landscapes, cities, engineering structures and buildings from around the world. It describes how people have actively shaped the course, form and function of water for human

settlement and the development of civilizations, establishing socio-economic structures, policies and cultures; a rich world of narratives, laws and practices; and an extensive network of infrastructure, buildings and urban form. The book is organized in five thematic sections that link practices of the past to the design of the present and visions of the future: part I discusses drinking water management; part II addresses water use in agriculture; part III explores water management for land reclamation and defense; part IV examines river and coastal planning; and part V focuses on port cities and waterfront regeneration. Today, the many complex systems of the past are necessarily the basis for new systems that both preserve the past and manage water today: policy makers and designers can work together to recognize and build on the traditional knowledge and skills that old structure embody. This book argues that there is a need for a common agenda and an integrated policy that addresses the preservation, transformation and adaptive reuse of historic water-related structures. Throughout, it imagines how such efforts will help us develop sustainable futures for cities, landscapes and bodies of water.

Wind Power in Power Systems Thomas

Ackermann, 2012-04-23 The second edition of the highly acclaimed Wind Power in Power Systems has been thoroughly revised and expanded to reflect the latest challenges associated with increasing wind power penetration levels. Since its first release, practical experiences with high wind power penetration levels have significantly

increased. This book presents an overview of the lessons learned in integrating wind power into power systems and provides an outlook of the relevant issues and solutions to allow even higher wind power penetration levels. This includes the development of standard wind turbine simulation models. This extensive update has 23 brand new chapters in cutting-edge areas including offshore wind farms and storage options, performance validation and certification for grid codes, and the provision of reactive power and voltage control from wind power plants. Key features:

- Offers an international perspective on integrating a high penetration of wind power into the power system, from basic network interconnection to industry deregulation;
- Outlines the methodology and results of European and North American large-scale grid integration studies;
- Extensive practical experience from wind power and power system experts and transmission systems operators in Germany, Denmark, Spain, UK, Ireland, USA, China and New Zealand;
- Presents various wind turbine designs from the electrical perspective and models for their simulation, and discusses industry standards and world-wide grid codes, along with power quality issues;
- Considers concepts to increase penetration of wind power in power systems, from wind turbine, power plant and power system redesign to smart grid and storage solutions.

Carefully edited for a highly coherent structure, this work remains an essential reference for power system engineers, transmission and distribution network operator and planner, wind turbine designers, wind project developers

and wind energy consultants dealing with the integration of wind power into the distribution or transmission network. Up-to-date and comprehensive, it is also useful for graduate students, researchers, regulation authorities, and policy makers who work in the area of wind power and need to understand the relevant power system integration issues.

A Farewell to Alms Gregory Clark, 2008-12-29 Why are some parts of the world so rich and others so poor? Why did the Industrial Revolution--and the unprecedented economic growth that came with it--occur in eighteenth-century England, and not at some other time, or in some other place? Why didn't industrialization make the whole world rich--and why did it make large parts of the world even poorer? In *A Farewell to Alms*, Gregory Clark tackles these profound questions and suggests a new and provocative way in which culture--not exploitation, geography, or resources--explains the wealth, and the poverty, of nations. Countering the prevailing theory that the Industrial Revolution was sparked by the sudden development of stable political, legal, and economic institutions in seventeenth-century Europe, Clark shows that such institutions existed long before industrialization. He argues instead that these institutions gradually led to deep cultural changes by encouraging people to abandon hunter-gatherer instincts--violence, impatience, and economy of effort--and adopt economic habits--hard work, rationality, and education. The problem, Clark says, is that only societies that have long histories of settlement and security

seem to develop the cultural characteristics and effective workforces that enable economic growth. For the many societies that have not enjoyed long periods of stability, industrialization has not been a blessing. Clark also dissects the notion, championed by Jared Diamond in *Guns, Germs, and Steel*, that natural endowments such as geography account for differences in the wealth of nations. A brilliant and sobering challenge to the idea that poor societies can be economically developed through outside intervention, *A Farewell to Alms* may change the way global economic history is understood.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate

world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.

A Manual of Marks on Pottery and Porcelain

William Harcourt Hooper, William Charles Phillips, 1879

Experiencing Architecture, second edition Steen

Eiler Rasmussen, 1964-03-15 A classic examination of superb design through the centuries. Widely regarded as a classic in the field, *Experiencing Architecture* explores the history and promise of good design. Generously illustrated with historical examples of designing excellence—ranging from teacups, riding boots, and golf balls to the villas of Palladio and the fish-feeding pavilion of Beijing's Winter Palace—Rasmussen's accessible guide invites us to appreciate architecture not only as a profession, but as an art that shapes everyday experience. In the past, Rasmussen argues, architecture was not just an individual pursuit, but a community undertaking. Dwellings were built with a natural feeling for place, materials and use, resulting in “a remarkably suitable comeliness.” While we cannot return to a former age, Rasmussen notes, we can still design spaces that are beautiful and useful by seeking to understand architecture as an art form that must be experienced. An understanding of good design comes not only from one's professional experience of architecture as an abstract, individual pursuit, but also from one's shared, everyday experience of architecture in real time—its particular use of light, color, shape, scale, texture, rhythm and sound. *Experiencing Architecture* reminds us of what good architectural design has accomplished over time, what it can accomplish still, and why it is worth pursuing. Wide-ranging and approachable, it is for anyone who has ever wondered “what instrument the architect plays on.”

Homo Deus Yuval Noah Harari, 2017-02-21 Official

U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same

insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

Future of wind International Renewable Energy Agency IRENA,2019-10-01 This study presents options to speed up the deployment of wind power, both onshore and offshore, until 2050. It builds on IRENA's global roadmap to scale up renewables and meet climate goals.

The Modern World-System II Immanuel Wallerstein,2011-05-11 The Modern World System, Immanuel Wallerstein's influential multivolume reinterpretation of global history, traces the emergence and development of the modern world from the sixteenth century to the twentieth. -- From publisher's description.

Athanasius Kircher Paula Findlen,2004-08-02 First published in 2004.Athanasius Kircher (1602-1680) -- German Jesuit, occultist, polymath - was one of most curious figures in the history of science. He dabbled in all the mysteries of his time: the heavenly bodies, sound amplification, museology, botany, Asian languages, the pyramids of Egypt -- almost anything incompletely understood. Kircher coined the term electromagnetism, printed Sanskrit for the first time in a Western book, and built a famous museum collection. His wild, beautifully illustrated books are sometimes visionary, frequently wrong, and yet compelling documents in the history of ideas. They are being rediscovered in our own time. This volume contains new essays on Kircher and his world by leading historians and historians of science, including Stephen Jay Gould, Ingrid

Rowland, Anthony Grafton, Daniel Stoltzenberg, Paula Findlen, and Barbara Stafford.-

High Performance in Hospital Management Edda Weimann, Peter Weimann, 2017-05-10 This book provides a broad overview of what is needed to run hospitals and other health care facilities effectively and efficiently. All of the skills and tools required to achieve this aim are elucidated in the book, including business engineering and change management, strategic planning and the Balanced Scorecard, project management, integrative innovation management, social and ethical aspects of human resource management, communication and conflict management, staff development and leadership. The guidance offered is exceptional and applicable in both developed and developing countries. Furthermore, the relevant theoretical background is outlined and instructive case reports are included. Each chapter finishes with a summary and five reflective questions. Excellence can only be achieved when health care professionals show in addition to their medical skills a high level of managerial competence. High performance in Hospital Management assists managers of health care providers as well as doctors and nurses to engage in the successful management of a health care facility.
