The Spanish Civil War 1936–39 (2) Alejandro de Quesada, 2015-01-20 The Spanish Civil War was the curtainraiser to World War II and involved a complex collection of forces, particularly on the Republican side. This title illustrates how diverse the Republican forces were, drawn from loyal elements of the Spanish army that rejected the appeal of the rebel generals, a wide range of volunteer regional units and political militias, and supported by volunteers from many other countries, including Great Britain, France and Germany, in units known as the International Brigades. The wide range of equipment and uniforms worn by these troops is revealed, as is, the organization of militias into conventional brigades and divisions. Featuring specially commissioned full-colour artwork, this second part of a two-part study depicts the fighting men of the Republican forces and examples of their foreign comrades.

The "tanks" Ernest Dunlop Swinton, 1918

The Illustrated Encyclopedia of Weaponry Chuck Wills, 2013-08-01 A complete look at weapons—from the Stone Age and Bronze Age to present day—from spears and swords to handguns and automatic weapons. When did hunting weapons begin to be used against humans instead of animals? What is the difference between the Plains Indian War Club and the Fijian War Club? What weapon is common to peoples in every part of the world? The Illustrated Encyclopedia of Weaponry is a

comprehensive guide to arms and armaments throughout history. Beginning in the Stone Age, The Illustrated Encyclopedia of Weaponry travels through the Bronze Age to our present day, showing the tools humans have used to defend themselves all around the globe. There's the Japanese tanto, or dagger, which have become identified with gangs known as yakuza. There's the flaming arrow used when Swiss and Austrian forces clashed in the 14th century. And there's the revolver that Samuel Colt made practical for both military and civilian use in Hartford, Connecticut. The Illustrated Encyclopedia of Weaponry will help readers better understand how—and why—the battles of history were fought.

Cartridges of the World Frank C. Barnes, 1965

The Somme Peter Hart, Nigel Steel, 2012-12-20 A major new history of the most infamous battle of the First World War, as described by the men who fought it. On 1 July 1916, Douglas Haig's army launched the 'Big Push' that was supposed finally to bring an end to the stalemate on the Western Front. What happened next was a human catastrophe: scrambling over the top into the face of the German machine guns and artillery fire, almost 20,000 British and Commonwealth soldiers were killed that day alone, and twice as many wounded - the greatest loss in a single day ever sustained by the British Army. The battle did not stop there, however. It dragged on for another 4

months, leaving the battlefield strewn with literally hundreds of thousands of bodies. The Somme has remained a byword for the futility of war ever since. In this major new history, Peter Hart describes how the battle looked from the point of view of those who fought it. Using never-before-seen eyewitness testimonies, he shows us this epic conflict from all angles. We see what it was like to crawl across No Man's Land in the face of the German guns, what it was like for those who stayed behind in the trenches - the padres, the artillerymen, the doctors. We also see what the battle looked like from the air, as the RFC battled to keep control of the skies above the battlefield. All this is put in the context of the background to the battle, and Haig's overall strategy for the Western Front, making this the most comprehensive history of the battle since Lyn MacDonald's bestselling work over 20 years ago.

Wartime Paul Fussell, 1990-10-25 Winner of both the National Book Award for Arts and Letters and the National Book Critics Circle Award for Criticism, Paul Fussell's *The Great War and Modern Memory* was one of the most original and gripping volumes ever written about the First World War. Frank Kermode, in *The New York Times Book Review*, hailed it as an important contribution to our understanding of how we came to make World War I part of our minds, and Lionel Trilling called it simply one of the most deeply moving books I have read in a long time. In its panaramic scope and poetic intensity, it illuminated a war that changed a generation and revolutionized the way we see the world. Now, in *Wartime*, Fussell turns to

the Second World War, the conflict he himself fought in, to weave a narrative that is both more intensely personal and more wide-ranging. Whereas his former book focused primarily on literary figures, on the image of the Great War in literature, here Fussell examines the immediate impact of the war on common soldiers and civilians. He describes the psychological and emotional atmosphere of World War II. He analyzes the euphemisms people needed to deal with unacceptable reality (the early belief, for instance, that the war could be won by precision bombing, that is, by long distance); he describes the abnormally intense frustration of desire and some of the means by which desire was satisfied; and, most important, he emphasizes the damage the war did to intellect, discrimination, honesty, individuality, complexity, ambiguity and wit. Of course, no Fussell book would be complete without some serious discussion of the literature of the time. He examines, for instance, how the great privations of wartime (when oranges would be raffled off as valued prizes) resulted in roccoco prose styles that dwelt longingly on lavish dinners, and how the high-mindedness of the era and the almost pathological need to accentuate the positive led to the downfall of the acerbic H.L. Mencken and the ascent of E.B. White. He also offers astute commentary on Edmund Wilson's argument with Archibald MacLeish, Cyril Connolly's *Horizon* magazine, the war poetry of Randall Jarrell and Louis Simpson, and many other aspects of the wartime literary world. Fussell conveys the essence of that wartime as no other writer before

him. For the past fifty years, the Allied War has been sanitized and romanticized almost beyond recognition by the sentimental, the loony patriotic, the ignorant, and the bloodthirsty. Americans, he says, have never understood what the Second World War was really like. In this stunning volume, he offers such an understanding.

Bloody April Peter Hart, 2012-12-20 The story of the decimation of the Royal Flying Corps over Arras in 1917 As the Allies embarked upon the Battle of Arras, they desperately needed accurate aerial reconnaissance photographs. But by this point the Royal Flying Club were flying obsolete planes. The new German Albatros scouts massively outclassed them in every respect: speed, armament, ability to withstand punishment and manoeuvrability. Many of the RFC's pilots were straight out of flying school - as they took to the air they were sitting targets for the experienced German aces. Over the course of 'Bloody April' the RFC suffered casualties of over a third. The average life expectancy of a new subaltern on the front line dropped to just eleven days. And yet they carried on flying, day after day, in the knowledge that, in the eyes of their commanders at least, their own lives meant nothing compared to the photographs they brought back, which could save tens of thousands of soldiers on the ground. In this book Peter Hart tells the story of the air war over Arras, using the voices of the men who were actually there.

Facing Fearful Odds Gregory J. W. Urwin, 2002-06-01 Facing Fearful Odds is based on interviews and correspondence gathered from more

than seventy of Wake's American defenders and on research in archival and printed sources. The book covers the planning and political struggles that began Wake Island's transformation into a naval air station and submarine base, the U.S. Navy's eleventh-hour efforts to garrison and fortify Wake, and the various air, sea, and land attacks that resulted in the atoll's capture by the Imperial Japanese Navy. This study attempts to correct the myths that shroud what happened on the atoll. - from preface.

Telling the Marine Corps Story United States. Marine Corps,

U.S. Marines In Vietnam: The Landing And The Buildup, 1965 Dr. Jack Shulimson, Maj. Charles M. Johnson, 2016-08-09 This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed

forces but in less detail than its predecessor volume, U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era.
