The Rolls-Royce Armoured Car David Fletcher,2012-04-20 The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

India's Ad Hoc Arsenal Chris Smith,1994 Chris Smith explores the evolution of Indian defence policy since 1947. He looks carefully at the domestic dynamics of Indian defence policy. This includes an in-depth analysis of the period 1947-62, which is often ignored by Indian defence analysts, and the performance of the defence industrial base. He concludes that India's defence policy is designed more as one aspect of the quest for great power status than as an attempt to acquire security at an affordable price.

The Tank Book DK,2017-04-03 Pivotal to modern warfare, tanks have dominated the battlefield for over a century. Get up close to more than 400 military colossuses with this definitive visual guide to armoured vehicles. In *The Tank Book* you can view it in detail, along with other iconic models including the German Panzer, the legendary Tiger, the Vickers Medium Mark II, the Centurion, and the Hellcat - the fastest armoured fighting vehicle ever. 100 Years of Radar Gaspare Galati,2015-09-15 This book offers fascinating insights into the key technical and scientific developments in the history of radar, from the first patent, taken out by Hülsmeyer in 1904, through to the present day. Landmark events are highlighted and fascinating insights provided into the exceptional people who made possible the progress in the field, including the scientists and technologists who worked independently and under strict secrecy in various countries across the world in the 1930s and the big businessmen who played an important role after World War II. The book encourages multiple levels of reading. The author is a leading radar researcher who is ideally placed to offer a

technical/scientific perspective as well as a historical one. He has taken care to structure and write the book in such a way as to appeal to both non-specialists and experts. The book is not sponsored by any company or body, either formally or informally, and is therefore entirely unbiased. The text is enriched by approximately three hundred images, most of which are original and have been accessed by detailed searches in the archives.

Tank Spotter's Guide The Tank Museum, 2011-05-24 Invented during World War I to break the grim deadlock of the Western Front trenches, tanks went on to revolutionize warfare. From the lightning Blitzkrieg assaults of World War II, to the great battles in the Middle Eastern desert, tanks have become one of the key components of the 'combined arms' philosophy of the modern battlefield. This pocket guide makes accessible to 'rivetheads' everywhere essential information to identify 40 of history's most fearsome tanks, including Germany's Tiger, Russia's T-34, America's Sherman and Panther, and France's FT-17. Each tank is presented with a detailed drawing to aid recognition.

The Eel F. Tesch, 2012-12-06 by Dr P. H. Greenwood British Museum (Natural History), London Dr Tesch's wide ranging account of anguillid eels impinges on the interests of many biologists; it is not simply a specialized tome narrowly aimed at ichthyologists and fishery scientists, rather it provides a source of primary reference and a comprehensive summary of information that is not likely to be superseded for a long time. It is significant that the bibliography includes references to learned journals concerned with physiology, pharmacology, taxonomy, genetics, zoology, endocrinology, botany, ecology and environmental interactions. Such is the breadth of interest in the Anguillidae. Few fish species have been subjected to as detailed review as Dr Tesch gives for the (two Atlantic species of *Anguilla*). An equally comprehensive resume of research into the fourteen, rather less well-studied Indo Pacific species gives balance and reciprocal illumination to several biological problems posed by these similar but quite distinctive species.

Anarchy Alive! Uri Gordon, 2008 Anarchist politics are at the heart of today's most vibrant and radical social movements. From squatted social centres and community gardens to acts of sabotage and raucous summit blockades, anarchist groups and networks are spreading an ethos of direct action, non-hierarchical organizing and self-liberation that has redefined revolutionary struggle for the 21st century. *Anarchy Alive!* is a fascinating, in-depth look at the practice and theory of contemporary anarchism. Uri Gordon draws on his activist experience and on interviews, discussions and a vast selection of recent literature to explore the activities, cultures and agendas shaping today's explosive anti-authoritarian revival. *Anarchy Alive!* also addresses some of the most tense debates in the contemporary movement, using a theory based on practice to provocatively reshape anarchist discussions of leadership, violence, technology and nationalism. This is the ideal book for anyone looking for a fresh, informed and critical engagement with anarchism, as a mature and dynamic political force in the age of globalisation.

Jane's World War II Tanks and Fighting Vehicles Leland S. Ness, 2002 This is the land equivalent of Jane's Battleships, a comprehensive encyclopaedia of all the combat vehicles of World War II from Somaliland to Japan. Another Life Andrew R B Simpson, 2011-08-31 T.E. Lawrence found global recognition for his leadership of the Arab Revolt during World War I, preparing the ground for the final Allied offensive in 1918. He was hailed as a hero, but little is known about this mysterious and charismatic man after those

events. Here is Lawrence's life after Arabia, his service in the RAF and the Tank Corps as a mere ranker, and how he became an expert in the technology of the new RAF. The book examines the work he did for the 1929 Schneider Trophy Race, the development of the new RAF 200 seaplane tender, and the development of its armour plated offspring, the Armoured Target Boat. It also investigates his literary endeavours and his tragically early death, a sad end to a Renaissance man of all talents, an academic, a talented engineer and a soldier sans pareil. T.E. was offered exalted diplomatic positions by Churchill, implored by Nancy Astor to re-enter the fray as the Nazi threat grew, socialised with the Cliveden set, argued with the Archbishop of Canterbury. He made lasting friendships with humble squaddies. His self-loathing was expressed physically. Consulting primary sources and also having interviewed some of those who knew Lawrence after Arabia the author portrays the last years of one of the most astonishing figures of the 20th century.

The Cambridge Aerospace Dictionary Bill Gunston, 2009-09-04 The Cambridge Aerospace Dictionary is an authoritative and accessible reference useful to scholars and enthusiasts alike. This dictionary is an essential tool for professionals involved in the aerospace industry and flight, and for anyone who must read and understand the technical literature of the aerospace industry and about specific air and space craft. It is also an ideal reference for engineering and physics students encountering a subject replete with technical jargon and acronyms. Bill Gunston, one of the most widely read and respected aviation writers, has added more than 5,000 new terms and acronyms to this carefully updated volume. Terms used in the dictionary reflect the diverse and international nature of the aerospace industry and include brief explanations of aerospace materials and organizations. Gunston has scrupulously avoided terms specific to manufacturers, airlines, and armed forces in an effort to encourage clear communication and understanding among professionals.

The War in the Air, 1914-1994 Alan Stephens, 2001 This book contains the proceedings of a conference held by the Royal Australian Air Force (RAAF) in Canberra in 1994. Since its publication by the RAAF's Air Power Studies Center in that year, the book has become a widely used reference at universities, military academies, and other educational institutions around the world. The application of aerospace power has seen significant developments since 1994, most notably through American-led operations in Central Europe and continuing technological advances with weapons, uninhabited vehicles, space-based systems, and information systems. But notwithstanding those developments and the passing of six years, the value of this anthology of airpower in the twentieth century seems undiminished.

Cooperative Evolution Christopher Bryant, Valerie A. Brown, 2021-03-16 Cooperative Evolution offers a fresh account of evolution consistent with Charles Darwin's own account of a cooperative, inter-connected, buzzing and ever-changing world. Told in accessible language, treating evolutionary change as a cooperative enterprise brings some surprising shifts from the traditional emphasis on the dominance of competition. The book covers many evolutionary changes reconsidered as cooperation. These include the cooperative origins of life, evolution as a spiral rather than a ladder or tree, humans as a part of natural systems rather than the purpose, relationships between natural and social change, and the role of the individual in adaptive radiation onto new ground. The story concludes with a projection of human evolution from the past into the future. 'Environmental studies courses have needed a book like Cooperative Evolution for a long time. It is a boon for those teaching the complexity of the evolutionary story.' — Dr John A. Harris, BSc(Hons) MSc PhD, School of Environmental Science, University of Canberra 'As a regenerative, holistic-thinking farmer I daily witness the results of cooperative evolution as the seasons unfold. A pleasure to read, Cooperative Evolution gives entry to recent thinking on evolutionary

processes.’ — David Marsh, MSA, ‘Allendale’, Boorowa, New South Wales, 2018 National Individual Landcarer Award recipient ‘This book is an engaging new look at ideas about evolution as we know it today. In the hands of two eminent biologists, it presents an approachable yet challenging argument. I heartily recommend it.’ — Emeritus Professor Sue Stocklmayer AO, BSc MSc PhD, Centre for the Public Awareness of Science, The Australian National University

Douglas A-26 and B-26 Invader Scott Thompson, 2002 Douglas A-26 and B-26 Invader has often been overshadowed by other aircraft and circumstances. It saw service too late in World War II to lay claim to a distinctive heritage. By Korea, it was seen as a workhorse and just an old propeller job. But there can be no doubt that the Invader was a fine aircraft - highly effective and popular with its crews.
