The Mystery of Life's Origin Charles B. Thaxton, Walter L. Bradley, Roger L. Olsen, 2020-01-27 The origin of life from non-life remains one of the most enduring mysteries of modern science. This book investigates how close scientists are to solving that mystery and explores what we are learning about the origin of life from current research in chemistry, physics, astrobiology, biochemistry, and more.

*Suicidal Honor* Doris G. Borgen, 2006-09-30 On September 13, 1912, the day of Emperor Meiji's funeral, General Nogi Maresuke committed ritual suicide by seppuku (disembowelment). It was an act of delayed atonement that paid a debt of honor incurred thirty-five years earlier. The revered military hero's wife joined in his act of junshi (following one's lord into death). The violence of their double suicide shocked the nation. What had impelled the general and his wife, on the threshold of a new era, to resort so drastically, so dramatically, to this forbidden, anachronistic practice? The nation was divided. There were those who saw the suicides as a heroic affirmation of the samurai code; others found them a cause for embarrassment, a sign that Japan had not yet crossed the cultural line

separating tradition from modernity. While acknowledging the nation's sharply divided reaction to the Nogis' junshi as a useful indicator of the event's seismic impact on Japanese culture, Doris G. Borgen in the first half of her book demonstrates that the deeper significance of Nogi's action must be sought in his personal history, enmeshed as it was in the tumultuous politics of the Meiji period. *Suicidal Honor* traces Nogi's military career (and personal travail) through the armed struggles of the collapsing shōgunate and through the two wars of imperial conquest during which Nogi played a significant role: the Sino-Japanese War (1894–1895) and the Russo-Japanese War (1904–1905). It also probes beneath the political to explore the religious origins of ritual self-sacrifice in cultures as different as ancient Rome and today's Nigeria. Seen in this context, Nogi's death was homage to the divine emperor. But what was the significance of Nogi's waiting thirty-five years before he offered himself as a human sacrifice to a dead rather than living deity? To answer this question, Borgen delves deeply and with great insight into the story of Nogi's conflicted career as a military hero who longed to be a peaceful man of letters. In the second half of *Suicidal Honor* Borgen turns to the extraordinary

influence of the Nogis' deaths on two of Japan's greatest writers, Mori Ôgai and Natsume Sôseki. Ôgai's historical fiction, written in the immediate aftermath of his friend's junshi, is a profound meditation on the significance of ritual suicide in a time of historical transition. Stories such as The Sakai Incident (Sakai jiken) appear in a new light and with greatly enhanced resonance in Bergen's interpretation. In Sôseki's masterpiece, Kokoro, Sensei, the protagonist, refers to the emperor's death and his general's junshi before taking his own life. Scholars routinely mention these references, but Bergen demonstrates convincingly the uncanny ways in which Sôseki's agonized response to Nogi's suicide structures the entire novel. By exploring the historical and literary legacies of Nogi, Ôgai, and Sôseki from an interdisciplinary perspective, Suicidal Honor illuminates Japan's prolonged and painful transition from the idealized heroic world of samurai culture to the mundane anxieties of modernity. It is a study that will fascinate specialists in the fields of Japanese literature, history, and religion, and anyone seeking a deeper understanding of Japan's warrior culture.

**Slow Burn - The Growth of Superbikes & Superbike Racing 1970 to 1988 Bob**

Guntrip,2020-04-14 Slow Burn tells how the superbike racing motorcycle developed out of the road-going sports-tourer to become one of the most successful competitions in all forms of motorcycle sport. As well as offering world championship class competition in its own right, superbike racing has been a highly competitive training ground for grand prix riders as well as helping manufacturers, distributors and dealers develop and improve their motorcycles. Superbike racing is to the motorcycle industry what touring car or NASCAR competition is to the car world – race on Sunday, sell on Monday. All the big names were drawn into the sport during its formative years and have been there ever since – Honda, Kawasaki, Suzuki, Yamaha, Ducati and Aprilia have all used superbike racing to test their

street bike designs. And some of the biggest riders in the sport – Wayne Gardner, Wayne Rainey, Kevin Schwantz and Eddie Lawson – all started out on big, unruly superbikes, learning how to power slide their way around the world's toughest tracks. It's all in superbike – and it's all in Slow Burn.

**You Are Here** Chris Hadfield,2014-10-14 In *You Are Here*, celebrated astronaut Chris Hadfield gives us the really big picture: this is our home, as seen from space. The millions of us who followed Hadfield's news-making Twitter feed from the International Space Station thought we knew what we were looking at when we first saw his photos. But we may have caught the beauty and missed the full meaning. Now, through photographs – many of which have never been shared – Hadfield unveils a

fresh and insightful look at our planet. He sees astonishing detail and importance in these images, not just because he's spent months in space but because his in-depth knowledge of geology, geography and meteorology allows him to reveal the photos' mysteries. Featuring Hadfield's favourite images, *You Are Here* is divided by continent and represents one (idealized) orbit of the ISS. Surprising, thought-provoking and visually delightful, it opens a singular window on our planet, using remarkable photographs to illuminate the history and consequences of human settlement, the magnificence of never-before-noticed landscapes, and the power of the natural forces shaping our world and the future of our species.

But is it Science? Robert T. Pennock, Michael Ruse, 2009 The emotionally charged debate pitting

creationism against evolution has been swirling since the publication of Charles Darwin's *Origins of Species* in 1859. The primary locus of controversy in the United States has been the courts, which have stepped in repeatedly to rule on the constitutionality of laws and policies regarding how each may be taught in the public schools. This fully updated anthology will inform readers about the history of the debate and bring philosophical clarity to the complex arguments on both sides.--BOOK JACKET.
