Impact and Explosion M. Y. H. Bangash,1993-07-15 *Impact and Explosion: Structural Analysis and Design* presents a comprehensive study of the structural dynamics of impact and explosion by providing a survey of types of aircraft, missiles, bombs, and detonators. Impact dynamics, including empirical models developed for different materials, water surfaces, and soil/rock mediums, is discussed. Other topics include load time history; explosion dynamics related to material damage capabilities; dynamic finite elements with provisions for impact and explosions; a discussion of solution procedures, acceleration, and convergence criteria; methods for designing structures resistant to impact and explosions; and how damage results due to impact or explosions. Case histories, comparative studies, numerous examples, appendices, and extensive references reinforce information presented in this important book for engineers and researchers working in government and private industry laboratories concerned with blast or impact loading effects on structures. Small firms that deal with impact loading (e.g., automobile collisions) will also find this book valuable.

Affective Health and Masculinities in South Africa Hans Reihling,2020-04-03 *Affective Health and Masculinities in South Africa* explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

The Passenger: Japan Aa Vv,2020-05-12 Some Japanese stories end violently. Others never end at all, but only cut away, at the moment of extreme crisis, to a butterfly, or the wind, or the moon.--Brian Phillips Visitors from the West look with amazement, and sometimes concern, at Japan's social structures and unique, complex culture industry; the gigantic scale of its tech corporations and the resilience of its traditions; the extraordinary diversity of the subcultures that flourish in its post-human megacities. The country nonetheless remains an intricate and complicated jigsaw puzzle, an inexhaustible source of inspiration for stories, reflections, and reportage. The subjects in this volume range from the Japanese veneration of the dead to the Tokyo music scene, from urban alienation to cinema, from sumo to toxic masculinity. Caught between an ageing population and extreme post-modernity, Japan is an ideal observation point from which to understand our age and the one to come.
