**2001** Arthur Charles Clarke, 1985 The spacecraft Discovery is on the voyage to the outer edge of the solar system. Within the craft are two increasingly frightened navigators, three frozen hibernants, and a computer named Hal.

*2001 A Space Odyssey* Arthur C Clarke, Stanley Kubrick, 2019-11-11 A breakthrough into the twenty-first century, this novel and movie puts the man of today into the credible environment of tomorrow, when he has conquered the perils of interplanetary travel and is ready for what comes next. You are hurtling across the abyss of space on an expedition to unexplored planets. Your only companion is a fellow astronaut: The three hibernants who lie in a deep-freeze sleep will not be awakened until their skills are needed. An essential member of your crew is Hal, the electronic, almost-human brain that ceaselessly guides your course. For months your atom-powered craft Discovery has been carrying you away from earth at a hundred thousand miles an hour. You are now farther from home than any man in history. Your living quarters within the 400-foot-long spacecraft is a centrifugal drum equipped with an electronic library of literature and music. Here you relax, eat, exercise, sleep, and chat with Hal, the conversational computer who never forgets anything-not even your birthday. Your mission is of such importance that it has been surrounded by the deepest official secrecy. You are probing a fantastic frontier, following a trail that has led to the outer edges of the Solar System. You are searching the stars for evidence that man is not

alone. On the Earth colonized Moon, deep in the crater Tycho, a discovery has been made that has shattered the human concept of the universe. You are journeying towards something. You do not know what it is. You only know it has been waiting for man to find it for four million years. Arthur C. Clarke, Fellow of the Royal Astronomical Society and a writer of science fiction, has produced this work that compares to the prophetic novels of Jules Verne. Author of the novel and co-author with Stanley Kubrick of the screen play for Kubrick's motion picture production, Clarke creates the cosmic desolations and splendors that man will someday see as he travels gigamiles into time and space.

**Moon Shot** Alan Shepard, Deke Slayton, Jay Barbree, 2011-05-03 New York Times bestseller for fans of *First Man*: A “breathtaking” insider history of NASA’s space program—from astronauts Alan Shepard and Deke Slayton (*Entertainment Weekly*). On October 4, 1957, the Soviet Union launched Sputnik I, and the space race was born.

Desperate to beat the Russians into space, NASA put together a crew of the nation's most daring test pilots: the seven men who were to lead America to the moon. The first into space was Alan Shepard; the last was Deke Slayton, whose irregular heartbeat kept him grounded until 1975. They spent the 1960s at the forefront of NASA's effort to conquer space, and *Moon Shot* is their inside account of what many call the twentieth century's greatest feat—landing humans on another world. Collaborating with NBC's veteran space reporter Jay Barbree, Shepard and Slayton narrate in gripping detail the story of America's space exploration from the time of Shepard's first flight until he and eleven others had walked on the moon.

Paper Robots Nick Knite, 2013-09-15 In this book you will find 25 robots to assemble, each with a wild and unusual design and background story.

Papertoy Monsters Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), *Papertoy Monsters* offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful

and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Hardware: The Definitive SF Works of Chris Foss Chris Foss,2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of

Chris Foss's SF career. "Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." – Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." – Alejandro Jodorowsky

**X-15 Photo Scrapbook** Tony R. Landis, Dennis R. Jenkins, 2003 The North American X-15 was the last in a line of manned rocket-powered research airplanes built during the 1950s to explore ever-faster and higher flight regimes. This was an era before computers were commonplace, and the only way to investigate the unknown was to go there. The program was launched in 1954 specifically to produce the first hypersonic (velocities greater than five times the speed of sound) manned aircraft. Forward-thinking researchers also decided to design the airplane to fly to the edge of space, long before the manned space program had begun in earnest. An in-depth history of the X-15 program may be found in *Hypersonic: The Story of the North American X-15* by Dennis R. Jenkins and Tony R. Landis. This book is a collection of illustrations that were assembled for *Hypersonic* but would not fit into the finished work. Since many of these are significant and most have never before been published, it was decided to print this scrapbook as a companion volume to *Hypersonic*. With over 350 b/w and 50 color photos, this scrapbook provides an excellent visual look

at a very exciting research program. Dimensions (width x height): 9 x 9 inches # of pages 108 # of color photographs: 400 b/w & color photos

How to Build Sci-fi Model Spacecraft Richard Marmo, 2004 Science fiction is more popular now than it has ever been, as seen by the number of interesting and imaginative science-fiction books, magazines, movies, and television shows produced each year. The scale modeling world has embraced the science-fiction phenomenon by offering a number of detailed and creative scale-model spaceship and diorama kits. In How To Build Sci-Fi Model Spacecraft, author Richard Marmo guides readers through a number of step-by-step buildups of styrene and resin kits. He offers helpful advice on subjects from basic kit assembly to more advanced methods like combining kits and customizing kits with unique, scratch-built pieces. Readers will learn the creative methods that allow them to add a personal touch to their kit and increase its overall detail, quality, and accuracy.

**X-Planes Photo Scrapbook** Dennis R. Jenkins, 2004 9x9, 450 black & white, photos and 50 color photos The X-Planes conjure up images of Chuck Yeager first breaking the sound barrier in the X-1 or of the black, bullet-shaped X-15 streaking through the skies at over Mach 6. But there have been 48 more X-designations assigned, as well as a host of other experimental aircraft that did not fall into the formal X-series. Some of these investigated very low-speed flight, vertical take-off, or were technology demonstrators for production military aircraft. Others were missiles, or gliders. One

was supposed to be a spacecraft. Tony R. Landis and Dennis R. Jenkins have assembled an outstanding collection of photographs documenting the X-Planes. These photographs come from government and company archives as well as personal and public collections. Hundreds of photos - some in color and many never-before-seen - detail the modern history of experimental flight.
