Ways of Curating Hans Ulrich Obrist,2014-03-27 Drawing on his own experiences and inspirations - from staging his first exhibition in his tiny Zurich kitchen in 1986 to encounters and conversations with artists, exhibition makers and thinkers alive and dead - Hans Ulrich Obrist's *Ways of Curating* looks to inspire all those engaged in the creation of culture. Moving from meetings with the artists who have inspired him (including Gerhard Richter and Gilbert and George) to the creation of the first public museums in the 18th century, recounting the practice of inspirational figures such as Diaghilev and Walter Hopps, skipping between exhibitions (his own and others), continents and centuries, *Ways of Curating* argues that curation is far from a static practice. Driven by curiosity, at its best it allows us to create the future.

**Environmentally-Friendly Product Development** Eberhard Abele,Reiner Anderl,Herbert Birkhofer,2007-08-06 Development of environmentally friendly products gains an increasing importance in science and in industry. While product development was strongly dedicated to achieve quality, cost and time targets, environmental issues indirectly had always been under consideration by engineers, see Fig. 1. Furthermore a methodology for the development of environmentally sound products was missing. Despite of significant progress in using computer aided tools for product development and design, environmental aspects were attended. Computer aided tools typically do not include methods for considering environmental issues enabling the designer to assess a product's environmental effects. Fig. 1. Vision of Environment as a key target for product development v vi Preface Product related environmental issues are getting more and more political and public awareness. Development of environmentally friendly products has become an action item for both, politics and industry (UNFCCC 1997). Energy consumption is on the agenda and covers pollution and resource saving. Typical topics of directives of the European Union are waste, noise, air pollution, water, nature and biodiversity, soil protection, civil protection and climate change. After the translation into national law the development of environmentally friendly products is a basic approach to contribute to the fulfilment of the topics mentioned above. In the European Community a "Communication from the Commission to the Council and the European Parliament" on "Integrated Product Policy" was adopted on the 18 June 2003 (EC 2003).

**Glare and Contrast Sensitivity for Clinicians** M. Princeton Nadler,David Miller,Daniel J. Nadler,2012-12-06 There have been greater advances in our knowledge of the visual function and its disabilities in the past 50 years than had accumulated in all of the previous years. This applies not only to the basic science of biochemistry, physiology, physiopathology, and cytopathology but also to the diagnosis and treatment of visual dysfunction and ocular disease. These advances have been aided by a proliferation of ingenious instruments. When I began my residency in ophthalmology at The Wilmer Institute in 1938, one was supposed to learn not only the physiology of vision but also how to diagnose and treat all phases of ophthalmology including disabilities of the orbit, sclera, retina, lens, and cornea. In addition he or she was supposed to understand neuro-ophthalmology, ophthalmic genetics, and so-called uveitis. It soon became evident that no one could adequately comprehend all of these areas and, therefore, most young trainees today take a year or two of fellowship in a specialized area following their three-to five-year residency training. Following this they join a group of other ophthalmologists and specialize. Thus, they become more expert in the diagnosis and treatment in a limited area in ophthalmology. When I returned to The Wilmer Institute in 1955 as Head of the Department I was the only full-time member of the staff. To date we have some 28 full-time ophthalmologists working in highly specialized areas of our institution.

**Report to the President** President's Council of Advisors on Science and Technology,Executive Office of the President,2016-03-06 Cities are beginning a new era of change. From 1920 to 2010 many U.S. cities hollowed out as suburbs grew faster than their urban cores. The trend started reversing in 2011 as Millennials and Baby Boomers looking for social connections and convenience settled in urban neighborhoods. Accompanying the resurgence of residential cities are complex and persistent urban challenges, including resilience against climate change and natural disasters. This report focuses on the technologies that shape some key infrastructures and economic activities, as opposed to those involved in delivering education, health care, or social services. As described in Chapter 2 of the report, technological advances promise to improve the environments in which people live and the services that city governments and companies offer.Cleaner energy technologies, new models of transportation, new kinds of water systems, building-construction innovation, low-water and soil-less agriculture, and clean and small-scale manufacturing are or will be available in the near future. These options, which are summarized in the Table of City Infrastructure Technologies, are evolving through private-sector

commercialization and implementation plus university and National Laboratory research and development (R&D) in concert with city governments.

**Everything You Always Wanted to Know About Curating\*** Hans-Ulrich Obrist,2011-04-01 Everything you ever wanted to know about Hans Ulrich Obrist but were afraid to ask has been asked by the sixteen practitioners in this book. Spanning the beginning of his "career" as a young curator in his Zurich kitchen to his time most recently as the Co-Director of Exhibitions and Programs, and Director of International Projects at the Serpentine Gallery in London, the book is a "production of reality conversations." It undertakes the impossible: pinning down this peripatetic curator, attempting to map his psychogeography so that silences may be transcribed. In a sense, it organizes a "protest against forgetting" and affirms the sagacity of an artist who told this dontstop curator "don't go" when he "contemplated leaving the art world" for other fields-"to go beyond the fear of pooling knowledge"-in lieu of bringing other fields into the (then) hermetic art world. Contributors Jean-Max Colard, Robert Fleck, Jefferson Hack, Nav Haq, Noah Horowitz, Sophia Krzys Acord, Brendan McGetrick, Markus Miessen, Ingo Niermann, Paul O'Neill, Philippe Parreno & Alex Poots, Juri Steiner, Gavin Wade, Enrique Walker

**Guide to Application Whitelisting** National Institute of Standards and Technology,2015-10-30 NIST SP 800-167 An application whitelist is a list of applications and application components that are authorized for use in an organization. Application whitelisting technologies use whitelists to control which applications are permitted to execute on a host. This helps to stop the execution of malware, unlicensed software, and other unauthorized software. This publication is intended to assist organizations in understanding the basics of application whitelisting. It also explains planning and implementation for whitelisting technologies throughout the security deployment lifecycle. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB).
