Measuring Caring John Nelson, Jean

Watson, 2011-08-24 Jean Watson's Theory of Human Caring (Caritas) is now used in approximately 300 clinical institutions in the United States and other institutions worldwide. This new addition to Springer's Watson Science Caring Institute Library is the first international compendium of Caritas research. Presenting the findings of 41 studies from 12 countries, it examines similarities and differences in the ways in which countries apply Watson's Theory regarding relationships between nurses and patients, and nurses and their colleagues, and how it is used to resolve outcome issues system-wide. the book also inc

Manga Vision Sarah E. Pasfield-Neofitou, Cathy

Sell, 2016 Manga Vision examines cultural and communicative aspects of Japanese comics, drawing together scholars from Japan, Australia and Europe working in areas as diverse as cultural studies, linguistics, education, music, art, anthropology, and translation, to explore the influence of manga in Japan and worldwide via translation, OEL manga and fan engagement. The volume includes a mix of theoretical, methodological, empirical and professional practice-based chapters, examining manga from both academic and artistic perspectives. Manga Vision also provides the reader with a multimedia experience, featuring

original artwork by Australian manga artist Queenie Chan, cosplay photographs, and an online supplement offering musical compositions inspired by manga, and downloadable manga-related teaching resources.

Technological Competency as Caring in Nursing
Rozzano C. Locsin, 2005 Nurses use and encounter technology in nearly every aspect of their profession. What does it mean to be technologically competent and caring as a nurse? How does technology support nursing work? How does it hinder nursing work? How can nurses care for their patients as technological advancements are introduced nearly every day? *Technological Competency as Caring in Nursing: A Model for Practice* provides insight and answers into how nurses can and must be both technologically competent and caring as they provide meaningful and essential nursing care. Locsin's work is obviously guided by the question asked by thoughtful nurses everywhere: How can I satisfactorily reconcile the idea of competent use of technology with the idea of caring in nursing? The chapters in this book significantly embellish a practical understanding of the solution offered by the Locsin model, and indeed, enrich the practical value of all of the general theories of nursing that are grounded in caring. Savina O. Schoenhofer, RN, PhD Professor, Department of Graduate Nursing Alcorn State University, Natchez, Mississippi, USA, *Technological competency as caring in nursing* is a critical process of knowing persons wholeness. Dr. Locsin's book explores, clarifies, and advances the conception of technological competency as caring in nursing. His book is essential to modeling a practice of nursing from the perspective of caring in nursing and a practical illumination of excellent nursing in a technological world.

Der Mond: The Art of Neon Genesis Evangelion

Yoshiyuki Sadamoto, 2006-10-10 Part of the Neon Genesis Evangelion phenomenon--the most talked-about anime series of last ten years! New look, a hard cover version for Der Mond! Stylish, delicate, and consistently edgy, Der Mond collects the color illustrations of Yoshiyuki Sadamoto, perhaps the most acclaimed manga and anime artist of all time. The book includes 74 pages of paintings and designs devoted to Neon Genesis Evangelion, plus another 50 pages from The Wings of Honneamise, Nadia--The Secret of Blue Water, Blue Uru, and other works--including Sadamoto's cover to Eric Clapton's 1998 album, Pilgrim.

Textile and Clothing Design Technology Tom Cassidy, Parikshit Goswami, 2017-11-15 In the textile industry, there is a pressing need for people who can facilitate the translation of creative solutions from designers into manufacturing language and data. The design technologist has to understand the elements and principles employed by designers and how these change for various textile media. One must also

have a good understanding of the processes, materials and products for which the textile designer is required to produce creative solutions. This book will be for designers wishing to improve their technological knowledge, technologists wishing to understand the design process, and anyone else who seeks to work at this design-technology interface. Key Features: • Provides a comprehensive information about textile production, apparel production and the design aspects of both textile and apparel production. • Fills the traditional gap between design and manufacture changing with advanced technologies. • Includes brief summary of spinning, weaving, chemical processing and garmenting. • Facilitates translation of creative solutions from designers into manufacturing language and data. • Covers set of workshop activities.

Applying Nanotechnology for Environmental Sustainability Joo, Sung Hee, 2016-08-04

Nanomaterials have been used for years in industries such as consumer products, textile production, and biomedicine, yet the literature outlining their use in environmental causes is limited. The safety, toxicity, transportation, and removal of this technology must be addressed as nanotechnology and nanomaterial use is expected to grow. Applying Nanotechnology for Environmental Sustainability addresses the applications of nanomaterials in the field of environmental conservation and sustainability, and analyses the potential risks associated with their use. It elucidates the scientific concepts and emerging technologies in nanoscience and nanotoxicity by offering a wide range of innovative topics and reviews regarding its use. This publication is essential for environmental engineers, researchers, consultants, students, regulators, and professionals in the field of nanotechnology.
