Towards a New Architecture Le Corbusier,2013-04-09 Pioneering manifesto by founder of International School. Technical and aesthetic theories, views of industry, economics, relation of form to function, mass-production split, and much more. Profusely illustrated.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Modulor and Modulor 2 Le Corbusier,2004-06-02 Le Corbusier's Modulor—a fundamental work in the history of architecture—as a beautiful facsimile edition.

The Big Book of a Miniature House Christine-Léa Frisoni,2014-08-28 Christine-Lea Frisconi explains how to make a beautiful miniature French country house with deep recesses, fancy panelling and wall niches to add character and instructions to make a range of French-style furniture, fittings and even flowers!

The Cardiac Lymphatic System Ganga Karunamuni,2013-04-23 The heart is invested with a complex, intertwining network of blood and lymphatic vessels which, respectively, provide the cardiac tissue with oxygen and nutrients and eliminate excess fluid from the interstitium. The coronary blood vessels have been the focus of much investigation in the past few decades. On the other hand, the literature regarding the cardiac lymphatic vessels remains sparse, despite their important role in maintaining normal heart function. With this in mind, a better understanding of the cardiac lymphatic network and its ability to regulate fluid homeostasis within the heart could give us insight into developing therapies for the alleviation of several cardiac pathological conditions.

On the same day another woman, Magda, relives the ghosts of another hiding place and a different betrayal - ghosts from which she still seeks forgiveness. Interweaving lives and secrets *Treehouses* is a magical tale of refuge, treachery and of love lost and found.

The India Way Peter Cappelli, 2010 Exploding growth. Soaring investment. Incoming talent waves. India's top companies are scoring remarkable successes on these fronts - and more. How? Instead of adopting management practices that dominate Western businesses, they're applying fresh practices of their own in strategy, leadership, talent, and organizational culture. In *The India Way*, the Wharton School India Team unveils these companies' secrets. Drawing on interviews with leaders of India's largest firms - including Mukesh Ambani of Reliance Industries, Narayana Murthy of Infosys Technologies, and Vineet Nayar of HCL Technologies - the authors identify what Indian managers do differently, including: Looking beyond stockholders' interests to public mission and national purpose Drawing on improvisation, adaptation, and resilience to overcome endless hurdles Identifying products and services of compelling value to customers Investing in talent and building a stirring culture The authors explain how these innovations work within Indian companies, identifying those likely to remain indigenous and those that can be adapted to the Western context. With its in-depth analysis and research, *The India Way* offers valuable insights for all managers seeking to strengthen their organization's performance.

Picasso's Ladies Wendy Ramshaw, Anna Beatriz Chadour-Sampson, 1998 Wendy Ramshaw who lives in London is one of the leading artist-jewellers of the late 20th century whose distinctive style is internationally admired and widely influential. Picasso, one of the most prolific artists of the 20th century, and his painted records of his wives, mistresses and friends have been the focus of Ramshaw's study since the mid-Eighties. The sheer beauty of the women and the full range of emotions expressed in these paintings provided the impetus to design one or more jewels for each of the 66 portraits of 'Picasso's Ladies' illustrated in this book. In this publication the collection is for the first time being presented in its entirety alongside Picasso's paintings, the source of stimulus. In an unusual approach the artist gives in her notes an insight into her working process. She reveals to us the personal messages of each painting which led to a number of amazing designs and how her choice of stones either reflect or go against the colours on the paintings. Four authors have illuminated various aspects of what are undoubtedly some of the most intellectually complex and aesthetically accomplished jewels.--BOOK JACKET. To the Point Daniela Malev, 2017 In the field of contemporary jewellery, the brooch is a very common and also much discussed form of jewellery. One of the special challenges of making a good brooch is to find an adequate solution for the pin, which connects the piece securely to the wearer but goes beyond being a mere functional and invisible part of the backside. It should be an essential part of the brooch in terms of content and aesthetics. The author is convinced that the fastening and attachment of a brooch hold a tremendous potential for the design of a brooch in its entirety. As the selection of brooches in this book demonstrates, there is a whole universe of possibilities and varieties...
