From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then

describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Visual Diary Guide - Student Workbook Hilary

Senhali,2015-06-30 In 2014, the Australian Government was investing into creativity and innovation as part of a growth strategy. Critical & creative thinking ranked 4th in the Australian Curriculum after Literacy, Numeracy and ICT, across all subjects. In the Arts, it made explicit references to how to achieve this with the use of visual journals. In a way, this represented a sea change in the way creativity was being taught. But by what means?

Where would teachers get practical help to make this happen?The Visual Diary Guides provide just this kind of help. Produced by an artist-teacher, in two integrated parts they address both students and teachers while aligning with the Australian Curriculum.They begin by identifying 'inspiration' as the fuel for the creative activity. But it is hard to store inspiration for later use. And even harder to make it fun!The books argue that the 'storage' is that ordinary art journal, the Visual Diary, which in the present classroom setting is often wasted as a portfolio. Its explosive creative potential is there to be unlocked. The books set out to do that in the classroom. Contrary to common belief, a structured approach with limits and boundaries is required for creativity to truly flourish.The Visual Diary becomes a students' personal treasure-trove much like an ordinary diary. The main premise of these books is that everyone has an artist in them and a

trustworthy guide is needed to locate it. The Visual Diary Guide - Student Work book is written for students in accessible language. Through more than 40 specially designed activities, students find and capture inspiration and ideas that personally resonate for them. It opens the door for students to explore the visual culture they are immersed in, making it accessible in the art room for refinement, analysis and development as a supplement to the art room program.

Spirits of Ash and Foam Greg Weisman, 2014-07-08 Welcome to the Prospero Keys (or as the locals call them: the Ghost Keys), the beautiful chain of tropical islands on the edge of the Bermuda Triangle where Rain Cacique lives. When Rain's maternal grandfather passed away, he left her his special armband: two gold snakes intertwined, clasping each other's tails in their mouths. Rain soon discovers that the armband is actually a zemi - a very powerful talisman created by the island's native Arawak Taino Indians - and that it allows Rain to see ghosts, including her own grandfather who is determined to help her uncover the Ghost Keys' hidden world of mystery and mysticism, intrigue and adventure. Now, Rain Cacique's looking for a few answers — and the second zemi, a Taino relic that allows her to see dead people. But it's the first week of school, so she's pretty busy juggling teachers, homework, baby-sitting duties, new friends, missing tourist kids... and a vampire with a tribal twist. *Spirits of Ash and Foam* is the second installment in Greg Weisman's *Rain of the Ghosts* series.
