superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment. Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

The Art of 3D Drawing Stefan Pabst, 2016-11-14
Artists won't believe their eyes as they learn to draw with photorealistic detail. The Art of 3D Drawing shows artists how to transform simple pencil sketches into jaw-dropping, photorealistic masterpieces. Through a variety of step-by-step exercises and demonstrations, pencil artists learn to take their drawing skills to a whole new level, beginning with a review of the basics, including perspective, shading, rendering textures, and building dimension. Practice lessons then demonstrate how to draw a range of subjects in realistic detail, from food and candy wrappers to animals and portraits. Finally, aspiring artists learn to use color media, including pencils and airbrushing, to add even greater dimension and realism to their artwork to complete their three-

dimensional masterpieces.

3D Geo-Information Sciences Jiyeong Lee, Siyka Zlatanova, 2008-10-24 In recent years 3D geo-information has become an important research area due to the increased complexity of tasks in many geo-scientific applications, such as sustainable urban planning and development, civil engineering, risk and disaster management and environmental monitoring. Moreover, a paradigm of cross-application merging and integrating of 3D data is observed. The problems and challenges facing today's 3D software, generally application-oriented, focus almost exclusively on 3D data transportability issues – the ability to use data originally developed in one modelling/visualisation system in other and vice versa. Tools for elaborated 3D analysis, simulation and prediction are either missing or, when available, dedicated to specific tasks. In order to respond to this increased demand, a new type of system has to be developed. A fully developed 3D geo-information system should be able to manage 3D geometry and topology, to integrate 3D geometry and thematic information, to analyze both spatial and topological relationships, and to present the data in a suitable form. In addition to the simple geometry types like point line and polygon, a large variety of parametric representations, freeform curves and surfaces or sweep shapes have to be supported. Approaches for seamless conversion between 3D raster and 3D vector representations should be available, they should allow analysis of a representation most suitable for a specific application.

Build Your Own Paper Hogwarts Castle Robin Turtle, 2016-09-14 This book contains templates for 20 self-contained paper buildings for a Hogwarts castle complex- some of them even have a fully furnished interior and removable roof, like the Gryffindor Common Room and Dormitory, the Great Hall, the Owlery, Hagrid's cabin and the Staircase and Entrance Hall! Some of the buildings have been designed with identical measurements so that even parts of them can be mixed and matched for more variety. All buildings can stand alone or be put up as part of the castle complex. The templates were hand-drawn with a quill and ink from a bottle in a process taking several weeks, which gives them a unique quaint and personal touch which cannot be achieved with computer-assisted design. The buildings are in black-and-white and can be coloured in according to individual preferences.
