Each vehicle also comes with a collectible trading card. Star Wars fans across the spectrum will enjoy assembling and displaying this collection of replica vehicles from a galaxy far, far away.

**An Encyclopaedia of Indian Archaeology** Amalananda Ghosh, 1990 An Encyclopaedia of Indian Archaeology is a significant reference work on archaeology in India. It is an authoritative work of permanent value in which the knowledge and expertise of Indian archaeologists from the Archaeological Survey of India, universities and other institutes have been pooled together under the editorship of the late A. Ghosh, former Director-General of the Archaeological Survey of India. The Encyclopaedia has been planned in an ambitious manner; it is not merely an alphabetical listing of entries with sketchy information on topics. Volume I, which deals with certain broad subjects relating to Indian Archaeology, is divided into twenty chapters, alphabetically arranged. Each chapter is further divided into sections and subsections containing independent and self-contained essays. For example, in the chapter on Cultures, detailed information can be found on various cultures in India; the chapter on Basis of dating contains articles on archaeological dating, archaeomagnetic dating, <sup>14</sup>C radio-carbon dating, numismatic dating, palaeographic and epigraphic dating, thermoluminescent dating, etc. For those interested in getting further information on the subjects and in looking into the original sources and references, each entry also carries an exhaustive bibliography. Volume II is the Gazetteer. It contains basic data and information on all the explored and excavated sites in India along with reference to published reports and/or notices on each.

**Papertoy Monsters** Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

**Electromagnetic Field Theory and Transmission Lines** Raju, G. S. N., Electromagnetic Field Theory and Transmission Lines is ideal for a single semester, first course on Electromagnetic Field Theory (EMFT) at the undergraduate level. This book uses diagrammatic representations and real life examples to explain the fu

**Mimesis and Sacrifice** Marcia Pally, 2019-10-17 Central to identity, personal responsibility, economic systems, theology, and the political and military imaginaries, the practice of sacrifice has inspired, disturbed, and abused. Mimesis and Sacrifice brings together scholars from the humanities, military, business, and social sciences to examine the role that sacrifice plays in different present-day settings, from economics to gender relations. Inspired by Rene Girard's work, chapters explore (i) the extent to which the social character of human living makes us mimetic, (ii) whether mimesis necessarily leads to competitive aggression, (iii) whether aggression must be defused by aggressive sacrificial rituals-and whether all sacrifice has this aim, and (iv) the role of the "second lesson of the cross" (as Girard called it), the lesson of self-giving for others, in addressing present societal problems. By investigating sacrifice across this span of arenas and questions yet within one volume, Mimesis and Sacrifice presents a new appreciation of its influence and consequences in the world today, contributing not only to mimetic theory but to greater understanding of which societal arrangement enable us to live well together and what hobbles that goal.

**Achtung-Panzer!** Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Robotics and Automation in Construction** Carlos Balaguer, Mohamed Abderrahim, 2008 This book addresses several issues related to the introduction of automaton and robotics in the construction industry in a collection of 23 chapters. The chapters are grouped in 3 main sections according to the theme or the type of technology they treat. Section I is dedicated to describe and analyse the main research challenges of Robotics and Automation in Construction (RAC). The second section consists of 12 chapters and is dedicated to the technologies and new developments employed to automate processes in the construction industry. Among these we have examples of ICT technologies used for purposes such as construction visualisation systems, added value management systems, construction materials and elements tracking using multiple IDs devices. This section also deals with Sensorial Systems and software used in the construction to improve the performances of machines such as cranes, and in improving Human-Machine Interfaces (MMI). Authors adopted Mixed and Augmented Reality in the MMI to ease the construction operations. Section III is dedicated to describe case studies of RAC and comprises 8 chapters. Among the eight chapters the section presents a robotic excavator and a semi-automated façade cleaning system. The section also presents work dedicated to enhancing the force of the workers in construction through the use of Robotic-powered exoskeletons and body joint-adapted assistive units, which allow the handling of greater loads.

*Microalgae Biotechnology for Food, Health and High Value Products* Md. Asraful Alam, Jing-Liang Xu, Zhongming Wang, 2020-01-22 *Microalgae Biotechnology for Food, Health and High Value Products* presents the latest technological innovations in microalgae production, market status of algal biomass-based products, and future prospects for microalgal applications. It provides stimulating overviews from different perspectives of application that demonstrate how rapidly the commercial production of microalgae-based food, health and high value products is advancing. It also addresses a range of open questions and challenges in this field. The book highlights the latest advances of interest to those already working in the field, while providing a comprehensive overview for those readers just beginning to learn about the promise of microalgae as a sustainable source of both specialty and commercial products. It offers a valuable asset for commercial algae producers, algae product developers, scientific researchers and students who are dedicated to the advancement of microalgae biotechnology for applications in health, diet, nutrition, cosmetics, biomaterials etc.

*Global Marketing* Svend Hollensen, 2016-07-08 All good marketing is local. Global companies know this and are going glocal. There is also a trend towards the Internet of Everything, which revolutionizes the whole marketing discipline. Svend Hollensen has captured all the latest trends very well with the new cases in his seventh edition of *Global Marketing*. Philip Kotler, S. C. Johnson & Son Distinguished Professor of International Marketing, Kellogg School of Management, Northwestern University In this era of increased globalisation, if there is one textbook that today's students and tomorrow's marketers need to read, it is Svend Hollensen's world renowned text. For over fifteen years *Global Marketing* has been the definitive, truly international guide to marketing. During that time, borders have become ever more transient and this book more central to the work of marketers all around the world. Now into its seventh edition, *Global Marketing* continues to be the most up-to-date and thorough text of its kind, with cutting-edge case studies and a focus on the impact of new technologies and perspectives on international marketing. This seventh edition expands on a number of new topics, including: shared economy solutions, social media, e-services and smartwatch app marketing, as well as many more. It is ideal for undergraduate and postgraduate students studying international marketing, and for any practitioners who want to take their global marketing strategies to the next level. The world today truly is flat, and a sound global perspective is an absolute must for all students. Svend Hollensen's *Global Marketing* provides a thorough and comprehensive treatment that delivers on this need. Michael R. Solomon, Professor of Marketing, Haub School of Business, Saint Joseph's University, USA, and Professor of Consumer Behaviour, University of Manchester, UK The best textbook on global marketing I have come across! The case studies, many of them available online, provide an excellent basis for class discussion. Elisabeth Gotze, Vienna University of Economics and Business Excellent level of detail in each chapter to support learning around strategic global marketing decisions. The video case studies are a huge bonus and really help to bring the subject alive. Giovanna Battiston, Senior Lecturer in Marketing, Sheffield Hallam University Key Features include: A clear part structure, organised around the five main decisions that marketing people in companies face in connection to the global marketing process End of part and end of chapter case studies helping students to understand how the theory relates to real world application Video case studies (available at [www.pearsoned.co.uk/hollensen](http://www.pearsoned.co.uk/hollensen)), showing how practitioners are using *Global Marketing* in their work About the author Svend Hollensen is Associate Professor of International Marketing at the University of Southern Denmark and has worked as a marketing consultant for several international companies and organizations. As well as this book, he is the author of other Pearson texts, including *Marketing Management* and *Essentials of Global Marketing*. **Solidarity in Biomedicine and Beyond** Barbara Prainsack, Alena Buyx, 2017-01-19 In times of global economic and political crises, the notion of solidarity is gaining new currency. This book argues that a solidarity-based perspective can help us to find new ways to address pressing problems. Exemplified by three case studies from the field of biomedicine: databases for health and disease research, personalised healthcare, and organ donation, it explores how solidarity can make a difference in how we frame problems, and in the policy solutions that we can offer.

**Renovating Your Marriage Room by Room** Dr. Johnny C. Parker, Jr, 2012-05-01 When considering building a home, couples look for the right architect, right builder, and the right decorator to make their dream house a reality. They work with these people to sketch out plans for the structure of the house; determine what materials to use in building the house; and which decorations to use how to make the house warm and cozy. Accomplishing their goal and making sure they get exactly what they are paying for is in part due to everyone working off of the same set of blueprints and plan while they are exercising their unique talents and skills in getting the house completed. With the same care and even more, couples should invest in building their marital houses. Making sure they are working from the same plan, laying a solid foundation in the process and doing the work needed to keep their house intact and standing strong. In *Renovating Your Marriage*, Dr. Johnny Parker speaks to you and your spouse about building a house of togetherness brick by brick from the foundation up. He encourages you to consider the two possible foundations upon which marriages are built; then walks you through an inspection of your marital house, room by room. Is your marital house standing on a firm foundation or has it been shaken? Are you in need of a marriage renovation? Dr. Parker wants to help you answer these questions and make the changes necessary to give your love a new look.

*Kazuo Shinohara* Seng Kuan,2019-06 One of the greatest and most influential architects of Japan's postwar generation, Shinohara Kazuo (1925-2006) has remained virtually unknown outside the small community of devoted followers. As one of the leaders of architectural movement Metabolism, Shinohara achieved cult-figure stature with sublimely beautiful, purist houses that break away from Japan's postwar suburban architecture. Perhaps the most iconic of Shinohara's works, House of White (1964-66), rearranges a familiar design palette: a square plan, a pointed roof, white walls, and a symbolic heart pillar-to give the almost oceanic spaciousness through abstraction. The underlying formalism in Shinohara's architecture-its basic explorations of geometry and color-lends his work a poetic quality that fuses simplicity and surprise, the ordered and the unexpected. This volume brings together new scholarship from the foremost specialists on Shinohara and Japan's modern architecture. New perspectives and historical frameworks range from the development of the small house as a building type in postwar Japan to Shinohara's engagement with French critical theory. Hitherto unpublished archival drawings and personal travel photographs by Shinohara complement the essays. AUTHOR: Seng Kuan holds a PhD in architectural history from Harvard University and teaches at Harvard Graduate School of Design and the Chinese University of Hong Kong. SELLING POINTS: \* Kazuo Shinohara (1925-2006) was a Japanese architect who developed a cult following for his purist houses. He helped develop the architectural movement, Metabolism which is characterized by pure white spaces and megastructures. One of his most well known buildings is House of White. \* This book brings together new scholarship from the foremost specialists on Shinohara. \* This book deals with Japanese modern architecture which is very influential around the world. \* This volume includes previously unpublished archival drawings and personal travel photographs of Shinohara.

**The Standard Model** Cliff Burgess, Guy Moore, 2007 This 2006 book uses the standard model as a vehicle for introducing quantum field theory.

**Spectroscopy from Space** Jean Demaison, Kamil Sarka, Edward A. Cohen, 2012-12-06 Many satellites have recently been launched or are in preparation, which operate in the microwave to IR ranges, the main objective being to observe the earth's atmosphere or interstellar clouds. Analysis of the data they supply requires extensive laboratory work because we still only have sufficiently accurate data (line positions, intensities, and profiles) for only a few species. Furthermore, the observer community is making increasing calls for laboratory data, as new development open up new observational possibilities (such as submillimeter observation). Research on these subjects involves many different areas of specialisation in fields of research that generate a wealth of data. In Spectroscopy from Space the people responsible for field observations explain which results they are expecting from their measurements and how laboratory people can help them to analyse their satellite data. Laboratory spectroscopists explain why what they can do now, and what kinds of experiment and theoretical development that might undertake to meet the needs of the remote sensing community. The problems of distributing reliable laboratory data in a timely way are also addressed.

*Global Marketing (First Edition)* Johny Johansson, Michael Furick, 2016-01-27 The New Global Marketing: Local Adaptation for Sustainability and Profit discusses the ways that marketing managers can assess the potential for global expansion and help their firms capitalize on opportunities. The book explores which companies and products should expand internationally, what countries offer the best opportunities, and which marketing plan will lead each product or company to success. The material adapts well-established frameworks to demonstrate how the global marketer can assess company strengths and weaknesses and analyze opportunities and risks in foreign markets. It discusses the proper balance between standardization and localization, and addresses the importance of the triple bottom line - environmental sustainability, social fairness, and financial performance. Students also learn about bottom-of-the-pyramid markets, the role of digital global marketing, and the importance of adapting to international political, social, and environmental pressures. Featuring more than twenty original case studies, The New Global Marketing is an excellent introduction to what it really takes to succeed as a global marketer. Written for students with some marketing education and exposure to international business, the book is ideally suited to upper-level business courses and M.B.A. programs.
