Papertoy Monsters Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Perovskite Solar Cells Shahzada Ahmad,Samrana Kazim,Michael Grätzel,2022-03-14 Presents a thorough overview of perovskite research, written by leaders in the field of photovoltaics The use of perovskite-structured materials to produce high-efficiency solar cells is a subject of growing interest for academic researchers and industry professionals alike. Due to their excellent light absorption, longevity, and charge-carrier properties, perovskite solar cells show great promise as a low-cost, industry-scalable alternative to conventional photovoltaic cells. Perovskite Solar Cells: Materials, Processes, and Devices provides an up-to-date overview of the current state of perovskite solar cell research. Addressing the key areas in the rapidly growing field, this comprehensive volume covers novel materials, advanced theory, modelling and simulation, device physics, new processes, and the critical issue of solar cell stability. Contributions by an international panel of researchers highlight both the opportunities and challenges related to perovskite solar cells while offering detailed insights on topics such as the photon recycling processes, interfacial properties, and charge transfer principles of perovskite-based devices. Examines new compositions, hole and electron transport materials, lead-free materials, and 2D and 3D materials Covers interface modelling techniques, methods for modelling in two and three dimensions, and developments beyond Shockley-Queisser Theory Discusses new fabrication processes such as slot-die coating, roll processing, and vacuum sublimation Describes the device physics of perovskite solar cells, including recombination kinetics and optical absorption Explores innovative approaches to increase the light conversion efficiency of photovoltaic cells Perovskite Solar Cells: Materials, Processes, and Devices is essential reading for all those in the photovoltaic community, including materials scientists, surface physicists, surface chemists, solid state physicists, solid state chemists, and electrical engineers.

It will be a helpful reference for practitioners those in the process of implanting or about to implant robotic surgery.

Mimesis and Sacrifice Marcia Pally,2019-10-17 Central to identity, personal responsibility, economic systems, theology, and the political and military imaginaries, the practice of sacrifice has inspired, disturbed, and abused. Mimesis and Sacrifice brings together scholars from the humanities, military, business, and social sciences to examine the role that sacrifice plays in different present-day settings, from economics to gender relations. Inspired by Rene Girard's work, chapters explore (i) the extent to which the social character of human living makes us mimetic, (ii) whether mimesis necessarily leads to competitive aggression, (iii) whether aggression must be defused by aggressive sacrificial rituals-and whether all sacrifice has this aim, and (iv) the role of the "second lesson of the cross" (as Girard called it), the lesson of self-giving for others, in addressing present societal problems. By investigating sacrifice across this span of arenas and questions yet within one volume, Mimesis and Sacrifice presents a new appreciation of its influence and consequences in the world today, contributing not only to mimetic theory but to greater understanding of which societal arrangement enable us to live well together and what hobbles that goal.

Religious Individualisation Martin Fuchs,Antje Linkenbach,Martin Mulsow,Bernd-Christian Otto,Rahul Bjørn Parson,Jörg Rüpke,2019-12-16 This volume brings together key findings of the long-term research project 'Religious Individualisation in Historical Perspective' (Max Weber Centre for Advanced Cultural and Social Studies, Erfurt University). Combining a wide range of disciplinary approaches, methods and theories, the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods, in particular in Asia, the Mediterranean, and Europe from antiquity to the recent past. Contrary to standard theories of modernisation, which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon, the chapters reveal processes of religious individualisation in a large variety of non-Western and pre-modern scenarios. Furthermore, the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency, the pluralisation of religious options, dynamics of de-traditionalisation and privatisation, the development of elaborated notions of the self, the facilitation of religious deviance, and on the notion of dividuality.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Kazuo Shinohara Seng Kuan,2019-06 One of the greatest and most influential architects of Japan's postwar generation, Shinohara Kazuo (1925-2006) has remained virtually unknown outside the small community of devoted followers. As one of the leaders of architectural movement Metabolism, Shinohara achieved cult-figure stature with sublimely beautiful, purist houses that break away from Japan's postwar suburban architecture.Perhaps the most iconic of Shinohara's works, House of White (1964-66), rearranges a familiar design palette: a square plan, a pointed roof, white walls, and a symbolic heart pillar-to give the almost oceanic spaciousness through abstraction. The underlying formalism in Shinohara's architecture-its basic explorations of geometry and color-lends his work a poetic quality that fuses simplicity and surprise, the ordered and the unexpected.This volume brings together new scholarship from the foremost specialists on Shinohara and Japan's modern architecture. New perspectives and historical frameworks range from the development of the small house as a building type in postwar Japan to Shinohara's engagement with French critical theory.Hitherto

unpublished archival drawings and personal travel photographs by Shinohara complement the essays. AUTHOR: Seng Kuan holds a PhD in architectural history from Harvard University and teaches at Harvard Graduate School of Design and the Chinese University of Hong Kong. SELLING POINTS: * Kazuo Shinohara (1925-2006) was a Japanese architect who developed a cult following for his purist houses. He helped develop the architectural movement, Metabolism which is characterized by pure white spaces and megastructures. One of his most well known buildings is House of White. * This book brings together new scholarship from the foremost specialists on Shinohara. * This book deals with Japanese modern architecture which is very influential around the world. * This volume includes previously unpublished archival drawings and personal travel photographs of Shinohara.

Renovating Your Marriage Room by Room Dr. Johnny C. Parker, Jr,2012-05-01 When considering building a home, couples look for the right architect, right builder, and the right decorator to make their dream house a reality. They work with these people to sketch out plans for the structure of the house; determine what materials to use in building the house; and which decorations to use how to make the house warm and cozy. Accomplishing their goal and making sure they get exactly what they are paying for is in part due to everyone working off of the same set of blueprints and plan while they are exercising their unique talents and skills in getting the house completed. With the same care and even more, couples should invest in building their marital houses. Making sure they are working from the same plan, laying a solid foundation in the process and doing the work needed to keep their house intact and standing strong. In *Renovating Your Marriage*, Dr. Johnny Parker speaks to you and your spouse about building a house of togetherness brick by brick from the foundation up. He encourages you to consider the two possible foundations upon which marriages are built; then walks you through an inspection of your marital house, room by room. Is your marital house standing on a firm foundation or has it been shaken? Are you in need of a marriage renovation? Dr. Parker wants to help you answer these questions and make the changes necessary to give your love a new look.

Inside the Sideshow Studio . Sideshow,2015-06-16 Inside the Sideshow Studio takes readers on a behind-the-scenes tour of a unique creative environment—the eclectic and dynamic workplace of one of the world’s leading figure arts creators. Admired by collectors for its meticulous attention to detail, Sideshow Collectibles has rooted itself on a foundation of creativity, close collaboration, and boundary-pushing quality. The world of Sideshow itself, and the renaissance-like environment it fosters, is the subject of this unique photographic exploration of creativity and the spaces it inhabits. Through dynamic photography, Inside Sideshow Collectibles takes an in-depth look at an artistic haven expressly devoted to the development of high-end collectible figures, offering a one-of-a-kind examination of the relationship between innovation and spatial design. A must-have for fans and creatives, this beautifully illustrated book will not only grant a look at Sideshow that few have ever seen, but also inspire readers to push the limits of their talent and surround themselves with artistic spaces of their own.

100 Birds and How They Got Their Names Diana Wells,2001-10-30 How did cranes come to symbolize matrimonial happiness? Why were magpies the only creatures that would not go inside Noah's Ark? Birds and bird imagery are integral parts of our language and culture. With her remarkable ability to dig up curious and captivating facts, Diana Wells hatches a treat for active birders and armchair enthusiasts alike. Meet the intrepid adventurers and naturalists who risked their lives to describe and name new birds. Learn the mythical stories of the gods and goddess associated with bird names. Explore the avian emblems used by our greatest writers--from Coleridge's albatross in *The Ancient Mariner* to Poe's raven. A sampling of the bird lore you'll find inside: Benjamin Franklin didn't want the bald eagle on our National Seal because of its bad moral character, (it steals from other birds); he lobbied for the turkey instead. Chaffinches, whose Latin name means unmarried, are called bachelor birds because they congregate in flocks of one gender. Since mockingbirds mimic speech, some Native American tribes fed mockingbird hearts to their children, believing it helped them learn language. A group of starlings is called a murmuration because they chatter so when they roost in the thousands. Organized alphabetically, each of these bird tales is accompanied by a two-color line drawing. Dip into 100 Birds and you'll never look at a sparrow, an ostrich, or a wren in quite the same way.
