Makers of the Russian Revolution Georges Haupt, Jean-Jacques Marie, 2017-02-17 Until the publication of this book in 1974, the leaders of the October Revolution remained very badly known. This book exhumes the autobiographies written by the men whose actions and ideas have moulded events. Unique as sources of documentation on the Bolsheviks, these autobiographies, encompassing personal and political information up to 1917 add an important historical dimension. They allow the reader to appreciate more accurately the role played by each of the protagonists in preparing and carrying out the Revolution and beyond this they put the Bolsheviks of 1917 in the context of their social milieu and of the circumstances that shaped their minds.

A Matter of Death and Life Andrey Kurkov,2016-11-17 Marital troubles? Sick of life? Suicide the answer? Why not get yourself a contract killer? Nothing easier, provided you communicate only by phone and box number. You give him your photograph, specify when and where to find you, then sit back and prepare to die. Murdered, you will be of greater interest than ever you were in life. More to him than met the eye will be the judgement. A mysterious killing lives long in the popular memory. Our hero meticulously plans his own demise, except for one detail: what if he suddenly decides he wants to live? 'Kurkov's eye for the absurdities of Ukrainian life is as sharp as ever' - Sunday Telegraph

Russian-Soviet Unconventional Wars in the Caucasus, Central Asia, and Afghanistan [Illustrated Edition] Dr.

Robert F. Baumann, 2015-11-06 [Includes 12 maps and 4 tables]

In recent years, the U.S. Army has paid increasing attention to the conduct of unconventional warfare. However, the base of historical experience available for study has been largely American and overwhelmingly Western. In *Russian-Soviet Unconventional Wars in the Caucasus, Central Asia, and Afghanistan*, Dr. Robert F. Baumann makes a significant contribution to the expansion of that base with a well-researched analysis of four important episodes from the Russian-Soviet experience with unconventional wars. Primarily employing Russian sources, including important archival documents only recently declassified and made available to Western scholars, Dr. Baumann provides an insightful look at the Russian conquest of the Caucasian mountaineers (1801-59), the subjugation of Central Asia (1839-81), the reconquest of Central Asia by the Red Army (1918-33), and the Soviet war in Afghanistan (1979-89). The history of these wars—especially as it relates to the battle tactics, force structure, and strategy employed in them—offers important new perspectives on elements of continuity and change in combat over two centuries. This is the first study to provide an in-depth examination of the evolution of the Russian and Soviet unconventional experience on the predominantly Muslim southern periphery of the former empire. There, the Russians encountered fierce resistance by peoples whose cultures and views of war differed sharply from their own. Consequently, this Leavenworth Paper addresses not only issues germane to combat but to a wide spectrum of civic and propaganda operations as well.

Where Two Worlds Met Michael Khodarkovsky, 1992 During the seventeenth and eighteenth centuries the expanding Russian empire was embroiled in a dramatic confrontation with the

nomadic people known as the Kalmyks who had moved westward from Inner Asia onto the vast Caspian and Volga steppes. Drawing on an unparalleled body of Russian and Turkish sources--including chronicles, epics, travelogues, and previously unstudied Ottoman archival materials--Michael Khodarkovsky offers a fresh interpretation of this long and destructive conflict, which ended with the unruly frontier becoming another province of the Russian empire. Khodarkovsky first sketches a cultural anthropology of the Kalmyk tribes, focusing on the assumptions they brought to the interactions with one another and with the sedentary cultures they encountered. In light of this portrait of Kalmyk culture and internal politics, Khodarkovsky rereads from the Kalmyk point of view the Russian history of disputes between the two peoples. Whenever possible, he compares Ottoman accounts of these events with the Russian sources on which earlier interpretations have been based. Khodarkovsky's analysis deepens our understanding of the history of Russian expansion and establishes a new paradigm for future study of the interaction between the Russians and the non-Russian peoples of Central Asia and Transcaucasia.

The Tsar's Colonels David Alan Rich, 2010-05-01 In this impressive study, David Rich demonstrates how the modernization of Russia's general staff during the second half of the nineteenth century reshaped its intellectual and strategic outlook and equipped the staff to play a strong, and at times dominant, role in shaping Russian foreign policy. Rich weaves together several levels of narrative to show how the increasingly sophisticated, scientific, and positivistic work attitudes and habits of the general staff acculturated younger officers, redefining their relationship with, and responsibilities to, the state. In time, this new generation of officers projected their characteristic notions onto the state and onto autocracy itself; professional concern for the security of the state eclipsed traditional unquestioning loyalty to the regime. Rich goes on to show how divergence between

diplomatic and military aims among those responsible for making strategy cost the state dearly in terms of economic stability and international standing. The author supports his findings with original research in Russian foreign policy and military archives and wide reading in published sources. The Tsar's Colonels contributes to a number of debates in Russian military and social history and offers new insights on the structural roots of the Great War, and on the theoretical problems of modernization and professionalization.

Russia's Orient Daniel R. Brower, Edward J.

Lazzerini, 1997-06-22 From a 1994 conference (U. of California, Berkeley), Borderlands Research Group participants present their findings based on unprecedented access to the hinterlands of what is the now the CIS. Fourteen contributors provide context for the current self-deterministic ethnic turmoil in Chechnya and elsewhere far from the Kremlin, via discussions of tsarist colonial policies and historical, heartland majority attitudes toward the ignoble savages and unfaithful subjects (read Muslim) of Russia's diverse Orient. The Military Reforms of Nicholas I F. Kagan, 1999-04-14 In the 1830s Russia was facing a crisis. The army was poorly organized, the administration was underdeveloped, inefficient, and corrupt, and the state was too poor to bear the strain. This crisis was the principal driving force behind Russia's reforms of the 1830s, and Nicholas' policies can only be understood within

the context of that crisis. Within this context, Frederick Kagan's *The Military Reforms of Nicholas I*, examines Nicholas' fundamental reorganization of the Russian military administration from 1832-1836, bringing about the birth of the modern Russian army.

Empire D. C. B. Lieven, 2002-01-01 Focusing on the Tsarist and Soviet empires of Russia, Lieven reveals the nature and meaning of all empires throughout history. He examines factors that mold the shape of the empires, including geography and culture, and compares the Russian empires with other imperial states, from ancient China and Rome to the present-day United States. Illustrations.

The Russian Empire Andreas Kappeler, 2014-08-27 The national question and how to impose control over its diverse ethnic identities has long posed a problem for the Russian state. This major survey of Russia as a multi-ethnic empire spans the imperial years from the sixteenth century to 1917, with major consideration of the Soviet phase. It asks how Russians incorporated new territories, how they were resisted, what the character of a multi-ethnic empire was and how, finally, these issues related to nationalism.
