And to Willa Fowler, who was born just after G-day, it's pretty awesome. You can fly through the air! I mean, sure, you can also die if you jump too high. So you just don't jump too high. And maybe don't get mixed up in your dad's secret plan to bring gravity back that could get you killed! From writer JOE HENDERSON (showrunner of Fox's *Lucifer*) and artist LEE GARBETT (*Lucifer*, *Loki: Agent of Asgard*) comes the story of a young woman's journey to find her place in a world turned upside down. Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Approaches to Prototyping R. Budde, K. Kuhlenskamp, L. Mathiassen, H. Züllighoven, 2012-12-06 This conference will focus on the user-oriented development of information systems. Against a background of recent concepts for the implementation of distributed systems based on workstation computers, various communicational, organizational and social issues gain increasing importance in the construction of computer based information systems. There is an urgent need to integrate end-users and other affected groups into the development process. New strategies for system development are thus needed. This was the beginning of the Call for Papers to the Working Conference on Prototyping. Working in the fields of user-oriented software construction and the analysis of communication problems between developers and users we, that is the GMD team involved in this conference and in preparing its Proceedings, sooner or later came across various new concepts to overcome the problems sketched above. Concepts focusing on the quick construction of an operative system such as rapid prototyping or concepts aiming at the human and organizational side of the development process such as Systemeering. Even on a second look, the multitude of different approaches, terms and tools still caused confusion. But despite the differences every concept seemed to have something to do with Prototyping. This, however, proved to be of little help to us, because the term Prototyping itself turned out to be quite fuzzy. In this obviously confused situation we decided that it was time for a working conference.

Tempest and Sunshine Mary J. Holmes, 2020-07-17 Reproduction of the original: Tempest and Sunshine by Mary J. Holmes

The Palaeolithic Origins of Human Burial Paul Pettitt, 2013-08-21 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead. Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age. The Palaeolithic Origins of Human Burial takes a novel approach to the long-term development of human mortuary activity – the various ways we deal with the dead and with dead bodies. It is the first comprehensive survey of Palaeolithic mortuary activity in the English language. Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify ‘core’ areas of behaviour towards the dead that probably have very deep evolutionary antiquity. From that point, the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed. The core chapters of the book survey the mortuary activities of early hominins, archaic members of the genus Homo, early Homo sapiens, the Neanderthals, the Early and Mid Upper Palaeolithic, and the Late Upper Palaeolithic world. Burial is a striking component of Palaeolithic mortuary activity, although existing examples are odd and this probably does not reflect what modern societies believe burial to be, and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene. When did symbolic aspects of mortuary ritual evolve? When did the dead themselves become symbols? In discussing such questions, The Palaeolithic Origins of Human Burial offers an engaging contribution to the debate on modern human origins. It is illustrated throughout, includes up-to-date examples from the Lower to Late Upper Palaeolithic, including information hitherto unpublished.

Dare to Fly Martha McSally, 2020-05-26 "Like the A-10 aircraft she flew in combat, retired colonel and fighter pilot Martha McSally is a gritty individual who loves our Air Force and personified its core values of excellence, integrity, and service before self, while standing up to make it a better institution for everyone who serves. How to be resolute, do the right thing, persevere, find gratitude, and learn compassion are just some of the lessons in her inspirational life story." –Ron FOGLEMAN, General (ret.), U.S. Air Force; former Air Force Chief of Staff Combining the soulful honesty of *Make Your Bed* with the inspiring power of *You Are a Badass*, America's first female combat jet pilot and Arizona Senator Martha McSally shows you how to clear the runway of your life: embrace fear, transform doubt, succeed when you are expected to fail, and soar to great heights in this motivational life guide. Martha McSally is an extraordinary achiever whose inner strength and personal principles have helped her overcome adversity throughout her life. Initially rejected from Air Force flight school because she was too short, she refused to give up, becoming the first female fighter pilot to fly in combat and the first to command a combat fighter squadron in United States history. During her twenty-six-year military career, she fought to free American servicewomen stationed in the Middle East from restrictions requiring them to don full-body, black abayas and ride in the backs of cars – and won. McSally has continued to serve America, first in the House of Representatives, and now as a U.S. Senator from Arizona. McSally is also a survivor. She shares how her experiences propelled her to become a fighter for justice in and out of the cockpit. In this powerful, uplifting book, McSally reflects on her successes and failures, shares key principles that have guided her, and reveals invaluable lessons to break barriers, thrive through darkness, and make someone proud in your life. "Courage isn't magic or genetics. It is a choice. By choosing to do things afraid, you discover your own power to overcome." Filled with fresh stories and insights, *Dare to Fly* will help each of us find the courage inside to break our barriers, endure turbulence, and keep flying high.
