One World Trade Center Judith Dupré, 2016-04-26 From the bestselling author of *Skyscrapers*, the behind-the-scenes story of the most extraordinary building in the world: One World Trade Center. The new World Trade Center represents one of the most complex collaborations in human history. Nearly every state in the nation, a dozen countries around the world, and more than 25,000 workers helped raise the tower, which consumed ninety million pounds of steel, one million square feet of glass, and enough concrete to pave a sidewalk from New York to Chicago. With more than seventy interviews with the people most intimately involved, and unprecedented access to the building site, suppliers, and archives, Dupré unfurls the definitive story of fourteen years of conflict and controversy—and its triumphant resolution. This fascinating, oversize book delivers new insight into the 1,776-foot-tall engineering marvel, from design and excavation through the final placement of its spire. It offers: Access to the minds of world-class architects, engineers, ironworkers, and other tradespeople Panoramas of New York from One World Observatory-1,268 feet above the earth Dramatic cutaways that show the building's advanced structural technologies A time-lapse montage showing the evolution of the sixteen-acre site Chronologies tracking design, construction, and financial milestones, with rare historic photographs It also features extensive tour of the entire Trade Center, including in-depth chapters on Two, Three, Four, and Seven World Trade Center; the National September 11 Memorial & Museum; Liberty Park; St. Nicholas National Shrine; and the soaring Transportation Hub. One World Trade Center is the only book authorized by the Port Authority of New York & New Jersey, and the one book necessary to understand the new World Trade Center in its totality. This is a must-have celebration of American resilience and ingenuity for all who are invested in the rebuilding of Ground Zero.

Facing Hazards and Disasters National Research Council, Division on Earth and Life Studies, Committee on Disaster Research in the Social Sciences: Future Challenges and Opportunities, 2006-09-10 Social science research conducted since the late 1970's has contributed greatly to society's ability to mitigate and adapt to natural, technological, and willful disasters. However, as evidenced by Hurricane Katrina, the Indian Ocean tsunami, the September 11, 2001 terrorist attacks on the United States, and other recent events, hazards and disaster research and its application could be improved greatly. In particular, more studies should be pursued that compare how the characteristics of different types of events—including predictability, forewarning, magnitude, and duration of impact—affect societal vulnerability and response. This book includes more than thirty recommendations for the hazards and disaster community.

The Most Spectacular Restaurant in the World Tom Roston, 2019-09-10 An “engrossing” history of the restaurant atop the World Trade Center “that ruled the New York City skyline from April 1976 until September 11, 2001” (Booklist, starred review). In the 1970s, New York City was plagued by crime, filth, and an ineffective government. The city was falling apart, and even the newly constructed World Trade Center threatened to be a fiasco. But in April 1976, a quarter-mile up on the 107th floor of the North Tower, a new restaurant called Windows on the World opened its doors—a glittering sign that New York wasn't done just yet. In *The Most Spectacular Restaurant in the World*, journalist Tom Roston tells the complete history of this incredible restaurant, from its stunning \$14-million opening

to 9/11 and its tragic end. There are stories of the people behind it, such as Joe Baum, the celebrated restaurateur, who was said to be the only man who could outspend an unlimited budget; the well-tipped waiters; and the cavalcade of famous guests as well as everyday people celebrating the key moments in their lives. Roston also charts the changes in American food, from baroque and theatrical to locally sourced and organic. Built on nearly 150 original interviews, *The Most Spectacular Restaurant in the World* is the story of New York City's restaurant culture and the quintessential American drive to succeed. "Roston also digs deeply into the history of New York restaurants, and how *Windows on the World* was shaped by the politics and social conditions of its era." —The New York Times "The city's premier celebration venue, deeply woven into its social, culinary and business fabrics, deserved a proper history. Roston delivers it with power, detail, humor and heartbreak to spare." ?New York Post "A rich, complex account." ?Kirkus Reviews (starred review)

Towers Jiří Boudník, 2021 In remembrance of the fateful day 20 years ago, Jiri Boudnik, a Czech-American architect and author of the book *Towers - 9/11 Story*, will share his first-hand experiences at Ground Zero. On the morning of September 11, 2001, Jiri Boudnik wanted to warn rescue teams of a potential collapse of the World Trade Center Towers. Crossing the Brooklyn Bridge on foot, he reached the World Trade Center site too late. In the early hours of the next day, he helped recover bodies and began surveying surrounding buildings for collateral damage. Within days, Boudnik started developing a series of 3D physical models of the aftermath' World Trade Center site as a communication tool for all the rescue and recovery teams involved--Provided by Publisher.

World Trade Center Building Performance Study Therese McAllister, 2002 Report of a team of civil, structural, and fire protection engineers, deployed by the Federal Emergency Management Agency (FEMA) and the Structural Engineering Institute of the American Society of Civil Engineers (SEI/ASCE), in association with New York City and several other Federal agencies and professional organizations, to study the performance of buildings at the WTC site following the attack of September 11, 2001.

The Conspirators' Hierarchy John Coleman, 1997 This work argues for the existence of a committee of 300, an elite body which controls every aspect of politics, religion, commerce and industry, answerable to no one except itself. It maintains that the confusion of social and moral values in the free world has been deliberately created.
