Germa Rudolf, Carlo Mattogno

**Auschwitz** Carlo Mattogno, 2016-04-10 The first gassing of human beings at Auschwitz, a pivotal nadir in human history, is claimed to have occurred on Sept. 3, 1941. The accounts reporting it are the archetypes for all later gassing accounts. In *Auschwitz: The First Gassing*, renowned Italian Holocaust historian Carlo Mattogno exhibits the sources about this alleged event and analyzes them critically. He shows that these sources contradict each other in every essential point, rendering it impossible to extract a consistent story. Original wartime documents inflict a final blow to the tale of the first homicidal gassing. Every historical proposition that moves the world depends critically on its purported genesis. Pointing to how it all began decides whether the masses will accept or reject the story. Hence unparalleled efforts were made to concoct a historical origin for the gas chamber myth, with which then an unprecedented world propaganda was started: The story of the first gassing. But this study demonstrates that the officially sanctioned version of this alleged event turns out to be mere fiction, an invention of political historiography with no historical basis at all. Third, slightly corrected edition.

**The Case for Auschwitz** Robert Jan Van Pelt, 2016-03-23 From January to April 2000 historian David Irving brought a high-profile libel case against Penguin Books and Deborah Lipstadt in the British High Court, charging that Lipstadt's book, *Denying the Holocaust* (1993), falsely labeled him a Holocaust denier. The question about the evidence for Auschwitz as a death camp played a central role in these proceedings. Irving had based his alleged denial of the Holocaust in part on a 1988 report by an American execution specialist, Fred Leuchter, which claimed that there was no evidence for homicidal gas chambers in Auschwitz. In connection with their defense, Penguin and Lipstadt engaged architectural historian Robert Jan van Pelt to present evidence for our knowledge that Auschwitz had been an extermination camp where up to one million Jews were killed, mainly in gas chambers. Employing painstaking historical scholarship, van Pelt prepared and submitted an exhaustive forensic report that he successfully defended in cross-examination in court.

*Auschwitz Lies* Germar Rudolf, Carlo Mattogno, 2016-07-08 What do Prof. Wellers, Prof. Markiewicz, Prof. Roth, Dr. Green, Prof. Zimmerman, and Prof. Shermer have in common? They all tried to refute the scientific findings of Holocaust revisionism - and they all failed. This volume discusses these and more authors and exposes their attempts at refutation as a mixture of scientific bungling and fraud...

**The Rudolf Report** Rudolf Germar, 2011-09-30

*Auschwitz* Carlo Mattogno, 2016 2nd expanded edition of 2016. In spring and summer of 1944, 400,000 Hungarian Jews are said to have been deported to Auschwitz and allegedly murdered there in gas chambers. The Auschwitz crematoria are said, and would in fact have been unable to cope with so many corpses. Therefore, every single day thousands of corpses are claimed to have been incinerated on huge pyres burning in deep trenches. The sky over Auschwitz was said to have been, and would have been, filled with thick smoke. This is what some witnesses want us to believe. This study investigates all available documentary, physical, and anecdotal evidence. Carlo Mattogno shows that the witness statements contradict each other in every regard. They also contradict what would have been physically possible.

The fact that there is no documentary or forensic evidence supporting the claims is finally confirmed by air photos taken from German and Allied aircraft in 1944. They prove that the witnesses were wrong: No traces of huge pyres or massive clouds of smoke covering the camp can be seen. Although based on a kernel of truth, Mattogno concludes, the witness statements are vastly exaggerated, and their homicidal claims are untrue. This 2016 2nd edition of includes three papers in its new Part Three which explore the matter of groundwater levels at Birkenau, and of recent mass incineration of cattle cadavers after major outbreaks of hoof-and-mouth disease, and what implications these have for the claimed mass cremations at Auschwitz.

**Auschwitz** ,2017-12

**Concentration Camp Majdanek** Carlo Mattogno,Jürgen Graf,2021-08-18 Until the late 1990s, little new research had been directed toward the Concentration Camp Lublin-Majdanek in central Poland, even though up to two million Jews are claimed to have been murdered there by the Germans during World War II. Until the first appearance of this book, the only information available came from discredited Polish Communist propaganda. This glaring research gap has been filled with the present study. Based on exhaustive research of primary sources and a thorough exploration of the physical remainders of the former concentration camp, the authors strike a death blow to the lie of homicidal gassings at Majdanek. They also critically investigate the legendary mass executions of Jews in anti-tank trenches (Operation Harvest Festival) and prove them groundless. The authors' investigations lead to unambiguous and unsparing conclusions about the real history and the actual functioning of the camp which thoroughly destroy the official theses without excusing the abuses tolerated by Majdanek's wartime commanders. Majdanek was not an extermination camp, but a labor camp, and the vast majority of inmates who died during their incarceration succumbed to diseases rather than wanton killings. With this work, Mattogno and Graf have once again produced a careful, methodical investigative work that sets the standard for all other treatments of Majdanek. This third edition has three supplements reviewing new developments in this field of research. In particular the Polish Majdanek Museum has officially admitted that large parts of this study are indeed correct, and many of the Museum's own claims are untrue.

The Leuchter Reports Fred A. Leuchter,Robert Faurisson,Germar Rudolf,2005 The Holocaust is often characterized as the greatest crime in the history of mankind. Yet for 44 years not a single forensic investigation into this alleged crime was ever undertaken. This changed in 1988, when Fred A. Leuchter, the American expert for execution technologies, was asked by German-Canadian Ernst Zündel to go to Poland and investigate the facilities in the Auschwitz, Birkenau, and Majdanek camps, which are claimed to have served as chemical slaughterhouses for hundreds of thousands of victims also called gas chambers. Leuchter changed the course of history when he concluded in his report: There were no execution gas chambers at any of these locations. Subsequently, Fred Leuchter also went to other camps, where mass murder with poison gas is claimed to have happened (Dachau, Mauthausen, Hartheim). He then wrote a similarly devastating report, which concluded that there were no gas execution chambers at any of these locations. This study was accompanied by an annotated bibliography about the claims regarding these three alleged locations of mass murder compiled by Dr. Faurisson. In a third expert report, Fred Leuchter described in detail the technique of execution

gas chambers as used in the U.S. for capital punishment and juxtaposed it with claims about alleged Third Reich gassings. In a fourth report, Leuchter criticized a book on gas chambers written by French scholar J.-C. Pressac. This edition publishes all these reports in one volume and subjects the first of them, which has caused a huge controversy and triggered a landslide of new research, to a thorough critique, backing up Leuchters claims with more information and references, where he is right, and correcting him, where he erred.

**Treblinka** Carlo Mattogno, Jürgen Graf, 2016-10-07 It is claimed that at Treblinka camp, up to 3,000,000 Jews were murdered in 1942 and 1943. The weapons used were allegedly either stationary and/or mobile gas chambers, poison gases of both fast acting and slow acting varieties, unslaked lime, superheated steam, electricity, diesel exhaust fumes... This thorough study exposes the Treblinka hoax...

**Belzec** Carlo Mattogno, 2021-08-18 At Belzec, up to 3,000,000 Jews were allegedly killed using either diesel-exhaust gas chambers; unslaked lime in trains; high voltage; vacuum chambers... These claims are analyzed, and forensic excavations are explained and critically reviewed

*Concentration Camp Stutthof and Its Function in National Socialist Jewish Policy* Jürgen Graf, Carlo Mattogno, 2003 The NS concentration camp of Stutthof (West Prussia) has never been the subject of scientific study by western historians. Although there exists some Polish literature on the subject, it must be treated with caution, because it is heavily influenced by Soviet-Communist ideology. According to this literature, Stutthof became a 'makeshift' extermination camp within the framework of the so-called 'Final Solution of the Jewish Question' in 1944. Jürgen Graf and Carlo Mattogno have examined this view of Stutthof based on Polish literature and documents located in Russian, Polish, and Dutch archives, paying particular attention to mass transports to and from Stutthof in 1944. Not only do the authors prove that the Stutthof camp did not serve as a 'makeshift' extermination camp -- the room claimed to have been used as a homicidal gas chamber was never anything else but a delousing chamber. This book also sheds some light on the fate of those prisoners who were deported to Auschwitz but were never registered in that camp. The present volume is a milestone of research, which no historian with any claim to seriousness can afford to ignore.

**Auschwitz** Carlo Mattogno, 2005 In this study, Italian scholar and prolific Revisionist author Carlo Mattogno analyzes the most important witness testimonies and juxtaposes them with original German wartime documents as well as material evidence still available today. Mattogno shows that the witness testimonies are either extremely vague or, where they are specific, that they contradict each other or claim physical impossibilities.

*Exactitude* Robert H. Countess, Christian Lindtner, Germar Rudolf, 2015 On January 25, 1929, 75 years before this book was first published, a man was born who probably deserves the title of the most courageous intellectual of the last third of the 20th century and the beginning of the 21st century: Robert Faurisson. With hitherto unheard of bravery and steadfastness, he challenged the dark forces of historical and political fraud, deception, and deceit with his unrelenting exposure of their lies and hoaxes. His method of analytical exactitude in historiography and his striving for clear brevity in presenting the results of his research have become both famous and infamous at once. Over the last 30 years, Robert Faurisson has become a role model of

character strength to many, a lodestar for his method to his disciples, an idol for his breathtaking research activities to his admirers. This Festschrift is dedicated to him by some of his closest friends in his struggle for exactitude in historiography and his ongoing fight not only for historical and political, but also for individual justice. It describes and celebrates the man and his work. Happy Birthday, Robert! (Reprint of the first edition of 2004)

## Attachment Id84216 Introduction

In today's digital age, the availability of Attachment Id84216 books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Attachment Id84216 books and manuals for download, along with some popular platforms that

offer these resources. One of the significant advantages of Attachment Id84216 books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Attachment Id84216 versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Attachment Id84216 books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Attachment Id84216 books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project

Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Attachment Id84216 books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Attachment Id84216 books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why

not take advantage of the vast world of Attachment Id84216 books and manuals for download and embark on your journey of knowledge?
