Systematics and Evolution of the Sthenurine Kangaroos Gavin Prideaux, 2004-05 The subfamily Sthenurinae (Macropodoidea, Diprotodontia) is an extinct group of robust kangaroos. The earliest sthenurine appears in the late Miocene of central Australia, but the group is most common in the Pleistocene faunas of southern and eastern Australia. Since the Sthenurinae was last reviewed over three decades ago, species diversity has more than doubled. Many species are now also represented by series of well-preserved specimens, including complete crania and skeletons. New insights generated by these discoveries provided the major impetus for this review of sthenurine systematics, functional morphology, paleoecology, biochronology and zoogeography.

Archaeological Chemistry A Mark Pollard, Carl Heron, 2015-11-09 The application of chemistry within archaeology is an important and fascinating area. It allows the archaeologist to answer such questions as what is this artefact made of?, where did it come from? and how has it been changed through burial in the ground?, providing pointers to the earliest history of mankind. Archaeological Chemistry begins with a brief description of the goals and history of archaeological science, and the place of chemistry within it. It sets out the most widely used analytical techniques in archaeology and compares them in the light of relevant applications. The book includes an analysis of several specific archaeological investigations in which chemistry has been employed in tracing the origins of or in preserving artefacts. The choice of these investigations conforms to themes based on analytical techniques, and includes chapters on obsidian, ceramics, glass, metals and resins. Finally, it suggests a future role for chemical and biochemical applications in archaeology. Archaeological Chemistry enables scientists to tackle the fundamental issues of chemical change in the archaeological materials, in order to advance the study of the past. It will prove an essential companion to students in archaeological science and chemistry, field and museum archaeologists, and all those involved in conserving human artefacts.

Killing the Enemy Adam Leong Kok Wey, 2015-09-28 During World War II, the British formed a secret division, the 'SOE' or Special Operations Executive, in order to support resistance organisations in occupied Europe. It also engaged in 'targeted killing' - the assassination of enemy political and military leaders. The unit is famous for equipping its agents with tools for use behind enemy lines, such as folding motorbikes, miniature submarines and suicide pills disguised as coat buttons. But its activities are now also gaining attention as a forerunner to today's 'extra-legal' killings of wartime enemies in foreign territory, for example through the use of unmanned drones. Adam Leong's work evaluates the effectiveness of political assassination in wartime using four examples: Heydrich's assassination in Prague (Operation Anthropoid); the daring kidnap of Major General Kreipe in Crete by Patrick Leigh Fermor; the failed attempt to assassinate Rommel, known as Operation Flipper; and the American assassination of General Yamamoto.

A Stakeholder Approach to Corporate Social Responsibility Philip Kotler, François Maon, 2016-03-16 Corporate social responsibility has grown into a global phenomenon that encompasses businesses, consumers, governments, and civil society, and many organizations have adopted its discourse. Yet corporate social responsibility remains an uncertain and poorly defined ambition, with few absolutes. First, the issues that organizations must address can easily be interpreted to include virtually everyone and everything. Second, with their unique, often particular characteristics, different stakeholder groups tend to focus only on specific issues that they believe are the most appropriate and relevant in organizations' corporate social responsibility programs. Thus, beliefs about what constitutes a socially responsible and sustainable organization depend on the perspective of the stakeholder. Third, in any organization, the beliefs of organizational members about their organization's social responsibilities vary according to their function and department, as well as their own managerial fields of knowledge. A Stakeholder Approach to Corporate Social Responsibility provides a comprehensive collection of cutting-edge theories and research that can lead to a more multifaceted understanding of corporate social responsibility in its various forms, the pressures and conflicts that result from these different understandings, and some potential solutions for reconciling them.

Despots, Democrats and the Determinants of International Conflict Martin Sherman, 2016-07-27 An unequivocal endorsement of an assertive and resolute approach to foreign policy by democracies in their dealings with dictatorships. Drawing on the political writings of Kant, the rationale of Churchill's anti-appeasement policy, and the most up-to-date empirical research in international relations, the author forges a rigorous decision-theoretic model to account for the international interactions between despotic and democratic regimes. The model's validity is illustrated across a broad range of historical examples, while its policy-oriented implications, are shown to have far-reaching consequences for conventional perceptions of democratic deterrence posture and the security dilemma.

Juries in the Japanese Legal System Dimitri Vanoverbeke, 2015-04-10 Trial by jury is not a fundamental part of the Japanese legal system, but there has been a recent important move towards this with the introduction in 2009 of the lay assessor system whereby lay people sit with judges in criminal trials. This book considers the debates in Japan which surround this development. It examines the political and socio-legal contexts, contrasting the view that the participation of ordinary citizens in criminal trials is an important manifestation of democracy, with the view that Japan as a society where authority is highly venerated is not natural territory for a system where lay people are likely to express views at odds with expert judges. It discusses Japan's earlier experiments with jury trials in the late 19th Century, the period 1923-43, and up to 1970 in US-controlled Okinawa, compares developing views in Japan on this issue with views in other countries, where dissatisfaction with the jury system is often evident, and concludes by assessing how the new system in Japan is working out and how it is likely to develop.

Life Writing and the End of Empire Emma Parker,2024-03-21 The dismantlement of the British Empire had a profound impact on many celebrated white Anglophone writers of the twentieth century, particularly those who were raised in former British colonial territories and returned to the metropole after the Second World War. Formal decolonisation meant that these authors were unable to 'go home' to their colonial childhoods, a historical juncture with profound consequences for how they wrote and recorded their own lives. Moving beyond previous discussions of imperial and colonial nostalgia, *Life Writing and the End of Empire* is the first critical study of white memoirists and autobiographers who rewrote their memories of empire across numerous life narratives. By focussing on these processual homecomings, Emma Parker's study asks what it means to be 'at home' in memories of empire, whether in the settler farms of Southern Rhodesia, or amidst the neon lights of Shanghai's International Settlement. These discussions trace the legacies of empire to the habitations and detritus of everyday life, from mansions and modest railway huts, to empty swimming pools, heirlooms, and photograph albums. Exploring works by Penelope Lively, J. G. Ballard, Doris Lessing, and Janet Frame, this study establishes new connections between authors usually discussed for their fiction, and who have been hitherto unrecognised as post-imperial life writers. Offering close, sustained analysis of autobiographies, memoirs, travel narratives, and autofictions, and identifying new subgenres such as 'speculative life writing', this book advances rich new readings of autobiographical narrative. By tracing the continuing importance of colonialism to white subjectivity, the role of imperial memory in Britain, and the ways that these unsettling forces move beneath the surface of modern and contemporary literature, this study offers new conceptual insights to the fields of life writing and postcolonial studies.

All Shall Hide Taylor A. Cisco Jr,Taylor A. Cisco,2010-09 A literal interpretation of Revelation 6:12-17 states survivors from a future great earthquake shall flee to hide in dens And The rocks of mountains. Such behavior is very unusual. Earthquake survivors normally flee to open spaces, away from buildings, To avoid injury from falling debris. *All Shall Hide* uses the findings from historical, aerospace, astrophysical, geophysical, and medical studies to show why world populations will be frightened into seeking heavily shielded shelters. What is the source of their terror? People suddenly collapsing in public from increased rates of heart failure caused by a great space weather storm. The awesome intensity of its cosmic ray output and harsh variations in the Earth's magnetic field will dwarf the Carrington Event of 1859. *All Shall Hide* shows the foretold darkening of the Sun to levels beneath global tempest of sunspots shall be the cause the perfect space weather storm. *All Shall Hide* formed its multidisciplinary, literal interpretation of Apostle John's scripture from the fiery truths of scientific studies. For example, statistically significant correlations between the variations in cosmic ray neutron rates and changes in the rates of death caused by acute myocardial infarction (heart attack), sudden cardiac death, cerebrovascular accident (stroke), or arrhythmia were manifested from collaborative research by Israel, Bulgaria, Lithuania, Azerbaijan, Russia, and Greece. The ability of the Moon to glow in the absence of sunlight was derived from observations and studies of solar particle induced lunar luminescence. The dates of solar blackouts, like the darkness at the crucifixion And The third Persian invasion of Greece, were deduced from trustworthy historical accounts of acute solar darkening events that could not be attributed to solar eclipses and/or clouds. *All Shall Hide* is a must read for those concerned with strengthening their beliefs in the Holy Bible.

Practices of the Sentimental Imagination Jonathan Zwicker,2020-03-23 The history of the book in nineteenth-century Japan follows an uneven course that resists the simple chronology often used to mark the divide between premodern and modern literary history.By examining the obscured histories of publication, circulation, and reception of widely consumed literary works from late Edo to the early Meiji period, Jonathan Zwicker traces a genealogy of the literary field across a long nineteenth century: one that stresses continuities between the generic conventions of early modern fiction and the modern novel. In the literature of sentiment Zwicker locates a tear-streaked lens through which to view literary practices and readerly expectations that evolved across the century.*Practices of the Sentimental Imagination* emphasizes both qualitative and quantitative aspects of literary production and consumption, balancing close readings of canonical and noncanonical texts, sophisticated applications of critical theory, and careful archival research into the holdings of nineteenth-century lending libraries and private collections. By exploring the relationships between and among Japanese literary works and texts from late imperial China, Europe, and America, Zwicker also situates the Japanese novel within a larger literary history of the novel across the global nineteenth century.
