CALL for widening participation: short papers from EUROCALL 2020 Karen-Margrete Frederiksen, Sanne Larsen, Linda Bradley, Sylvie Thouësny, 2020-12-14 Despite the Covid-19 pandemic, the EUROCALL society succeeded in holding the 28th EUROCALL conference, EUROCALL2020, on 20-21 August as an online, two-day gathering. The transition process required to make this happen was demanding and insightful for everyone involved, and, in many ways, a logical consequence of the core content and purpose of EUROCALL. Who would be better suited to transform an onsite conference into an online event than EUROCALL? CALL for widening participation was this year's theme. We welcomed contributions from both theoretical and practical perspectives in relation to the many forms and contexts of CALL. We particularly welcomed longitudinal studies or studies that revisited earlier studies. The academic committee accepted 300 abstracts for paper presentations, symposia, workshops, and posters under this theme; 57 short papers are published in this volume. We hope you will enjoy reading this volume, the first one to reflect a one hundred percent online EUROCALL conference/Online Gathering.

The Killing Consensus Graham Denyer Willis, 2015-03-21 We hold many assumptions about police work—that it is the responsibility of the state, or that police officers are given the right to kill in the name of public safety or self-defense. But in *The Killing Consensus*, Graham Denyer Willis shows how in São Paulo, Brazil, killing and the arbitration of "normal" killing in the name of social order are actually conducted by two groups—the police and organized crime—both operating according to parallel logics of murder. Based on three years of ethnographic fieldwork, Willis's book traces how homicide detectives categorize two types of killing: the first resulting from "resistance" to police arrest (which is often broadly defined) and the second at the hands of a crime family' known as the Primeiro Comando da Capital (PCC). Death at the hands of police happens regularly, while the PCC's

centralized control and strict moral code among criminals has also routinized killing, ironically making the city feel safer for most residents. In a fractured urban security environment, where killing mirrors patterns of inequitable urbanization and historical exclusion along class, gender, and racial lines, Denyer Willis's research finds that the city's cyclical periods of peace and violence can best be understood through an unspoken but mutually observed consensus on the right to kill. This consensus hinges on common notions and street-level practices of who can die, where, how, and by whom, revealing an empirically distinct configuration of authority that Denyer Willis calls sovereignty by consensus.

The Upanishads--II : Kena And Other Upanishads Sri Aurobindo, 2006 The Upanishads has now been expanded and brought out in two volumes, with much new material published for the first time in book form. The single volume The Upanishads has been discontinued, with all its content included in the two new volumes, each available as an independent book. The Kena Upanishad is concerned with the relation of mind-consciousness to Brahman-consciousness, writes Sri Aurobindo in his commentary on this work. The material world and the physical life exist for us only by virtue of our internal self and our internal life. According as our mental instruments represent to us the external world, according as our vital force in obedience to the mind deals with its impacts and objects, so will be our outward life and existence. Along with Sri Aurobindo's final translation of and commentary on the Kena, this book includes his translations of six other Upanishads as well as several other translations and commentaries, and essays such as 'The Philosophy of the Upanishads'.

Renaissance Futurities Charlene Villaseñor Black, Mari-Tere Álvarez, 2019-11-05 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Renaissance Futurities considers the intersections between artistic rebirth, the new science, and European imperialism in the global early modern world. Charlene Villaseñor Black and Mari-Tere Álvarez take as inspiration the work of Renaissance genius Leonardo da Vinci (1452-1519), prolific artist and inventor, and other polymaths such as philosopher Giulio "Delminio" Camillo (1480-1544), physician and naturalist Francisco Hernández de Toledo (1514-1587), and writer Miguel de Cervantes (1547-1616). This concern with futurity is inspired by the Renaissance itself, a period defined by visions of the future, as well as by recent theorizing of temporality in Renaissance and Queer Studies. This transdisciplinary volume is at the cutting edge of the humanities, medical humanities, scientific discovery, and avant-garde artistic expression.

The Genus Lachenalia Graham Duncan, 2012 This is the first complete and illustrated monograph of the genus Lachenalia, a horticulturally important and botanically diverse plant group. Lachenalia ranks with Gladiolus as one of the two most popular genera of South African bulbous plants worldwide, and next to Ornithogalum is the second-largest member of the family Hyacinthaceae in southern Africa. The flowers of some species have exceptionally showy blooms that occur in numerous interesting colours, shapes and sizes, and their fascinating leaves, many of which are attractively spotted or barred, or covered with attractive hairs or pustules. The flowers of many species are attractive in another dimension in that they emit distinctive aromas, ranging from spicy (like cloves) to various degrees of sweet (like a mixture of carnations and orchids), while one species is strongly coconut-scented. All species are described, classified and illustrated, with detailed text on history, morphology, phylogeny, phytogeography, pollination biology, cultivation and propagation. This book includes many highly attractive species which have never been illustrated in colour before, with 11 new taxa, ten of which are new species. This will become the standard reference work on all aspects of the genus and will appeal to botanists and taxonomists, bulb-growers, horticulturalists, gardeners, collectors of fine botanical works, ecologists and

nature conservationists, as well as libraries and universities.

Organic Polymers Arpit Sand, Elsayed Zaki, 2020-03-11 This book, *Organic Polymers*, covers aspects that are of immediate concern to a new entrant to the field of polymers. Taken as a whole, these eight chapters aim to help the readers easily assimilate other specialized and exhaustive treatises on the subject. Topics dealing with the chemistry and technology of polymers are presented in a careful and logical manner so as to provide an easy and enjoyable read. Several examples and analogies are included so to make the main concepts easy to follow and tables and figures are included so that the book can serve, to a limited extent, as a hand book dealing with polysaccharides with different parameters. This book is meant for students studying polysaccharides and those working on graft copolymers and other allied polymer industries but without a formal educational background in organic polymers.

Alternative Toxicological Methods Harry Salem, Sidney A. Katz, 2003-03-26 Bringing together the recent and relevant contributions of over 125 scientists from industry, government, and academia in North America and Western Europe, *Alternative Toxicological Methods* explores the development and validation of replacement, reduction, and refinement alternatives (the 3Rs) to animal testing. Internationally recognized scientist

Taken! Yoshi Yamamoto, 2011-11-30 *TAKEN!* provides an in-depth and comprehensive history and analysis of North Korea's state-sponsored policy of abducting citizens of other countries. This criminal enterprise dates back to the earliest days of the regime, and to policy decisions made by Kim II-sung himself. Those abducted came from widely diverse backgrounds, numerous nationalities, both genders, and all ages, and were taken from places as far away as London, Copenhagen, Zagreb, Beirut, Hong Kong, and China, in addition to Japan. During the 1960's, 93,000 Koreans were lured from Japan and held against their will in North Korea. A decade later, children of North Korean agents were apparently kidnapped in order to control their parents. Beginning in the late 1970's, foreigners who could teach North Korean operatives to infiltrate targeted countries were brought to North Korea and forced to teach spies. Since then, people in China who assist North Korean refugees have been targeted. By our estimation, the staggering sum of these captives who are held against their will is 180, 308.

CALL and complexity - short papers from EUROCALL 2019 Fanny Meunier, Julie Van de Vyver, Linda Bradley, Sylvie Thouësny, 2019-12-09 The theme selected for the 2019 EuroCALL conference held in Louvain-la-Neuve was 'CALL and complexity'. As languages are known to be intrinsically and linguistically complex, as are the many determinants of learning (additional) languages, complexity is viewed as a challenge to be embraced collectively. The 2019 conference allowed us to pay tribute to providers of CALL solutions and to recognize the complexity of their task. We hope you will enjoy reading this volume as it offers a rich glimpse into the numerous debates that took place during EuroCALL 2019. We look forward to continuing those debates and discussions with you at the next EuroCALL conferences!

Applied Regression Modeling Iain Pardoe, 2013-01-07 Praise for the First Edition The attention to detail is impressive. The book is very well written and the author is extremely careful with his descriptions . . . the examples are wonderful. -The American Statistician Fully revised to reflect the latest methodologies and emerging applications, *Applied Regression Modeling*, Second Edition continues to highlight the benefits of statistical methods, specifically regression analysis and modeling, for understanding, analyzing, and interpreting

multivariate data in business, science, and social science applications. The author utilizes a bounty of real-life examples, case studies, illustrations, and graphics to introduce readers to the world of regression analysis using various software packages, including R, SPSS, Minitab, SAS, JMP, and S-PLUS. In a clear and careful writing style, the book introduces modeling extensions that illustrate more advanced regression techniques, including logistic regression, Poisson regression, discrete choice models, multilevel models, and Bayesian modeling. In addition, the Second Edition features clarification and expansion of challenging topics, such as: Transformations, indicator variables, and interaction Testing model assumptions Nonconstant variance Autocorrelation Variable selection methods Model building and graphical interpretation Throughout the book, datasets and examples have been updated and additional problems are included at the end of each chapter, allowing readers to test their comprehension of the presented material. In addition, a related website features the book's datasets, presentation slides, detailed statistical software instructions, and learning resources including additional problems and instructional videos. With an intuitive approach that is not heavy on mathematical detail, Applied Regression Modeling, Second Edition is an excellent book for courses on statistical regression analysis at the upper-undergraduate and graduate level. The book also serves as a valuable resource for professionals and researchers who utilize statistical methods for decision-making in their everyday work.

English Phonetics and Phonology Paperback with Audio CDs (2) Peter Roach, 2009-03-26 Since the publication of the first edition in 1983, this course has established itself as the most practical, comprehensive text in the field and become widely used in many parts of the world in universities and other institutions of higher education. This new edition takes into account recent developments in the teaching of phonology. It includes updated references, fuller coverage of intonation, and a new chapter on different varieties of English with illustrative recorded material. At the end of each chapter in the book there are notes giving information on further reading, discussion of the more challenging issues, written exercises and, where appropriate, suggestions for teachers. In addition the audio CDs include recorded exercises for every chapter which are particularly helpful for non-native speakers. A full answer key is available at the back of the book. Additional exercises and other supporting material are available online.

Kena Upanishad Aurobindo Ghose, 1970 Commentary on the Kenopaniṣad; includes the original Sanskrit text (Devanagari and Latin script) and English translation.

The Gāndhārī Dharmapada John Brough, 2000-12-31 The famous birch-bark manuscript in the Kharosthi script, which contains a recension of the Dharmapada in a Prakrit dialect, has long been familiar to students of early Buddhist literature under the name of 'Ms. Dutreuil de Rhins'. The manuscript, written in the first or second century A.D., is generally considered to be the oldest surviving manuscript of an Indian text. It was discovered near Khotan in Central Asia in 1892, and reached Europe in two parts, one of which went to Russia and the other to France. In 1897 S. Oldenburg published one leaf of the Russian portion; and in 1898 E. Senart edited the French material in the *Journal Asiatique*, together with facsimiles of the larger leaves, but not of the fragments. Now, almost seventy years after the discovery of the manuscript, it is possible for the first time to place before scholars an edition of the whole of the extant material, together with complete facsimiles.

Emergency Triage Manchester Triage Group, 2008-04-15 The Manchester Triage System (MTS) is the most widely used triage system in the UK, Europe and Australia, with tens of millions of patients being processed through hospital emergency departments. Emergency Triage is the core text for the MTS which utilises a risk averse system of prioritisation for patients in all unscheduled care settings, and as such it is an essential text for all emergency

department staff using the MTS, in particular triagenurses themselves. The second edition has been revised throughout and takes in the changes in practice introduced into MTS since the book was first published. These include: Redesigned and expanded flow charts Additional charts for allergy and palpitations New practices – such as the possibility of revascularisation for patients with stroke New discriminators, for example acute neurological deficit and significant respiratory history Redefinition of existing discriminators Also new to this edition is the incorporation of sections on the use of the risk averse system in telephone triage, in settings where ‘streaming’ takes place and as an early warning score for patients in all unscheduled care settings. The tone of this edition reflects the more up to date, modified approach to triage while retaining the principles of clinical prioritisation, which in the authors’ words “remains a central plank of clinical risk management in emergency care”. Emergency Triage is an essential handbook for all clinicians involved in unscheduled care settings such as emergency care, walk-in centres, minor injury units, primary care out of hours services.
