**Twelve Years a Slave** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

*Artificial Gravity* Gilles Clément, Angeli Bukley, 2007-05-28 This book reviews the principle and rationale for using artificial gravity during space missions, and describes the current options proposed, including a short-radius centrifuge contained within a spacecraft. Experts provide recommendations on the research needed to assess whether or not short-radius centrifuge workouts

can help limit deconditioning of physiological systems. Many detailed illustrations are included.

The Dragon and the Dazzle Marco Pellitteri, Jean-Marie Bouissou, Gianluca Di Fratta, Cristiano Martorella, Bounthavy Suvilay, 2010 In the worldwide circulation of the products of cultural industries, an important role is played by Japanese popular culture in European contexts. Marco Pellitteri shows that the contact between Japanese pop culture and European youth publics occurred during two phases. By use of metaphor, the author calls them the Dragon and the Dazzle. The first took place between 1975 and 1995, the second from 1996 to today. They can be distinguished by the modalities of circulation and consumption/re-elaboration of Japanese themes and products in the most receptive countries: Italy, France, Spain, Germany and, across the ocean, the United States. During these two phases, several themes have been perceived, in Europe, as rising from Japan's social and mediatic systems. Among them, this book examines the most apparent from a European point of view: the author names them machine, infant, and mutation, visible mostly through manga, anime, videogames, and toys. Together with France, Italy is the European country that in this respect has had the most central role. There, Japanese imagination has been acknowledged not only by young people, but also by politicians, television programmers, the general public, educators, comics and cartoons authors. The growing influence of Japanese pop culture, connected to the appreciation of its manga, anime, toys, and videogames, also urges political and mediologic questions linked to the identity/ies of Japan as they are understood--wrongly or rightly--in Europe and the West, and to the increasingly important role of Japan in international relations.--Back cover

The Vibration of Heat Exchanger Tubes Prof. Bharat Raj Singh, Late (Prof.) Dinesh Jha, 2019-12-07 The vibration of Heat Exchange Tubes due to hydrodynamic fluid coupling is an international problem for Nuclear fuel assemblies etc. on account of frequent failure of Heat

exchanger tube, which causes not only expensive repair but a great loss to the plant. Thus, several studies in this field have been made so far. But here, a study of three circular cylindrical tubes in a liquid is done on the analytical approach. The author also describes the various parameters for maximum efficiency of heat transmission from Heat Exchanger's, which is defined as;  $\eta_H = \frac{F}{G/R, V}$  = Heat transmission efficiency of the heat exchanger, where G=gap between two adjoining tubes, R= Radius of cylindrical tubes (if considered of same diameters) and V= fluid flow velocity and geometry of tubes. The relations amongst the above parameters are yet to derive to solve this problem.

*The Social Semantic Web* John G Breslin,Alexandre Passant,Stefan Decker,2009-10-03 The Social Web (including services such as MySpace, Flickr, last.fm, and WordPress) has captured the attention of millions of users as well as billions of dollars in investment and acquisition. Social websites, evolving around the connections between people and their objects of interest, are encountering boundaries in the areas of information integration, dissemination, reuse, portability, searchability, automation and demanding tasks like querying. The Semantic Web is an ideal platform for interlinking and performing operations on diverse person- and object-related data available from the Social Web, and has produced a variety of approaches to overcome the boundaries being experienced in Social Web application areas. After a short overview of both the Social Web and the Semantic Web, Breslin et al. describe some popular social media and social networking applications, list their strengths and limitations, and describe some applications of Semantic Web technology to address their current shortcomings by enhancing them with semantics. Across these social websites, they demonstrate a twofold approach for interconnecting the islands that are social websites with semantic technologies, and for powering semantic applications with rich community-created content.

They conclude with observations on how the application of Semantic Web technologies to the Social Web is leading towards the Social Semantic Web (sometimes also called Web 3.0), forming a network of interlinked and semantically-rich content and knowledge. The book is intended for computer science professionals, researchers, and graduates interested in understanding the technologies and research issues involved in applying Semantic Web technologies to social software. Practitioners and developers interested in applications such as blogs, social networks or wikis will also learn about methods for increasing the levels of automation in these forms of Web communication.

**The Apple House** John Blankenship, 2018-04-19 Yours can be the first APPLE house on the block! Learn how to save time and money by using your Apple II computer to control your home: the security, lights, temperature, telephone, and much more. With John Blankenship's system of software and hardware, your house can accept verbal commands and respond with its own voice. It does not need human instruction and performs many useful tasks on its own. Once you get used to an intelligent house, you will wonder how you ever got along without one. Even though devices featured in The Apple House can be purchased, the author shows how you can save money by building some from scratch. He also points out that you can substitute equipment you already own because of the system's modularity. Although written with an Apple II computer in mind, the principles discussed can easily be transferred to other computer systems.

Role-Playing Games of Japan Björn-Ole Kamm, 2020-08-28 This book engages non-digital role-playing games—such as table-top RPGs and live-action role-plays—in and from Japan, to sketch their possibilities and fluidities in a global context. Currently, non-digital RPGs are experiencing a second boom worldwide and are increasingly gaining scholarly attention for their inter-media relations. This

study concentrates on Japan, but does not emphasise unique Japanese characteristics, as the practice of embodying an RPG character is always contingently realised. The purpose is to trace the transcultural entanglements of RPG practices by mapping four arenas of conflict: the tension between reality and fiction; stereotypes of escapism; mediation across national borders; and the role of scholars in the making of role-playing game practices.

Studies in the History of the Third Dynasty of Vijayanagara N. Venkata Ramanayya, 2009 The Empire of Vijayanagara was the last flicker of Hindu State and administration in India. The Empire played an important role in the history of medieval India, not only for its victorious army, progressive foreign relations and sound administration, but also for its patronage to art, culture, literature and religion. The present work is a history of the Vijayanagara Empire during the rule of its third dynasty, i.e. since 1530. The work is divided into three parts, dealing with (1) principal events in the history of Vijayanagara between 1529 and 1543, (2) System of administration under which the Empire of the Rayas was governed in the sixteenth century and (3) religious and social conditions. The work is based on authentic source materials, viz. inscriptions and literature. The inscriptions used for this research fall in to two classes, (1) those copied by the Epigraphy Department and (2) those that included in the Mackenzie Manuscripts. The texts of the Inscriptions, some of which are still unpublished, have been diligently scrutinized and interpreted. Among the contemporary literary creations, relevant portions of the prabandhas and kavyas have been compared with the inscriptions and Portuguese records. Works of the Muslim historians have also been occasionally consulted. The work presents a detailed study of the administrative system, fiscal policy, law enforcing machinery, social conditions, religious sects and movements during the period under study. The work is a valuable contribution to the history of South India.

**Talking Animals And Other People** Shamus Culhane, 1998-03-21 Shamus Culhane (1908-1996) enchanted several generations of animation lovers with his characters Pluto, Pinocchio, Woody Woodpecker, Betty Boop, and Popeye, as well as with his famous Heigh-ho sequence in Snow White and the Seven Dwarfs. He started as an errand boy at age fifteen at the Bray studio but went on to become president of his own company and later head of the animation studio at Paramount. Talking Animals and Other People is both a memoir of Culhane's life and career and a history of the art, taking readers from the earliest days of animation, the creation of the flipbook, and the first animated motion picture to the assembly-line Saturday morning TV cartoons and recent advances in computer animation. Culhane gives an unsparing insider's view of the industry: from harsh labor relations and brutal internal politics to comical anecdotes and frank portraits of animation giants. Filled with over 150 photographs and illustrations, Talking Animals also includes detailed descriptions of the craft, technique, and processes of cartoon-making. Entertaining and informative,

this book brings to animated life the everyday world of this beloved art form and the man who helped build it.
