Advanced Dynamic Modeling of Economic and Social Systems Araceli N. Proto,Massimo Squillante,Janusz Kacprzyk,2012-09-18 In this volume recent advances in the use of modern quantitative models for the analysis of various problems related to the dynamics of social and economic systems are presented. The majority chapters describe tools and techniques of broadly perceived computational intelligence, notably fuzzy logic, evolutionary computation, neural networks and some non-standard probabilistic and statistical analyses. Due to the high complexity of the systems and problems considered, in many situations it is necessary to consider at the same time analytic, topological and statistical aspects and apply appropriate procedures and algorithms. This volume is a direct result of vivid discussions held during the Fifth International Workshop on Dynamics of Social and Economical Systems (DYSES) which was held at Benevento, Italy September 20-25, 2010, as well as a couple of post-workshop meetings and consultations.

Czechoslovak Arms Exports to the Middle East Martin Smisek,2023-07-21 Revolución Libertadora  or the Liberating Revolution  is the name by which the military dictatorship that ruled Argentina is known after overthrowing the constitutional president, Juan Domingo Perón, closing the National Congress, deposing the members of the Supreme Court, the provincial and municipal authorities and university and commissioning the entire Judicial Power through a coup that began on September 16 1955 and that, after more than two years, transferred the government to President-elect Arturo Frondizi, on May 1 1958, who would be overthrown in 1962. The preparations for the coup of September 1955 were intense and very careful, since the plotters did not want to repeat the mistakes made in the events of June. For this coup, the collaboration of several important army units was finally obtained, in addition to the Navy and the Air Force. Revolución Libertadora Volume 2 details the warlike actions of both sides day by day, along with the eventual resignation, exile and return of President Perón. The text is supported by an extensive number of rare images, tables and specially-commissioned colour artwork.

Quality of Spatial Data in Command and Control System Václav Talhofer,Šárka Hošková-Mayerová,Alois Hofmann,2018-07-28 This monograph aims to familiarize readers with the problem of evaluating the quality and reliability of digital geographic information in terms of their use. It identifies the key requirements for the functionality of this information and describes the system of evaluating its quality and reliability. The whole text is supplemented by examples that document the impact of different quality of the information on the entire decision-making process in command and control systems at the rescue and military levels. The monograph is primarily intended for professionals who are responsible for the implementation of digital geographic information in command and control systems, or for those who use them in their work. For this reason, particular attention is paid especially to the user aspects of the digital geographic information used. Václav Talhofer is Full Professor of Cartography and Geoinformatics at the University of Defense in Brno, Czech Republic. Šárka Hošková-Mayerová is Associate Professor of Mathematics at the University of Defense in Brno, Czech Republic. Alois Hofmann is a teacher and scientist of Cartography and Geoinformatics at the University of Defense in Brno, Czech Republic. All authors contributing to this book have been extensively studying the methods and procedures for the use of digital geographic information, especially in the environment of the Czech Armed Forces.

No Room For Watermelons Ron Fellowes,Lynne Fellowes,2018-09-01 In 2012, while others his age were enjoying quiet retirement, Ron Fellowes set off on the challenge of a lifetime. His dream to ride a 102 year-old FN motorcycle across the world - to the Belgian factory where the bike originated - had all the hallmarks of an epic adventure: one that was never going to be easy. For eight months Ron rode 14,600 kilometres through 15 countries under grueling conditions, into some of the world's most hostile territory. He faced desert sandstorms, mountains too steep for the motorcycle's capability, the threat of rockslides and bombings when he took a detour, and pressure from armed police through conflict zones. He was robbed, and when held at gunpoint, Ron came face-to-face with his own mortality. The motorcycle's limited capacity - no gears, inadequate brakes and pedal assisted - made it a daily struggle. Breakdowns were common, and only Ron's ingenuity and single-mindedness, Lynne's logistical support, and the generosity of others kept him going. Beautifully illustrated in full colour throughout, No Room for Watermelons is co-written by Ron and Lynne. It is an engaging, and entertaining account of one man's stoic determination to fulfill his dream. You will be carried along for the ride, and inspired to achieve your own dreams... no matter how impossible they seem.

The Structure of the Defense Industry Nicole Ball,Milton Leitenberg,2021-05-30 Proponents of arms control and disarmament are often confronted with the argument that reductions in defense expenditure lead to cutbacks in military industries and thus to economic hardship. While a reduction in defense production would cause some economic dislocation, this would be mitigated by the ability of the economy to adapt to changing patterns of production. This book, first published in 1983, assesses the likely effects of reductions in defense industries by an examination of the roles these industries play in national economies. Each chapter discusses industry employment, output, research and development, capital value, profitability, concentration and competition, internal organization and regional employment concentration. Other questions considered include the economic importance of weapons exports, the defense industry as a 'leading edge' in maintaining national technological capabilities, and the reliance of individual firms on defense contracting.

India and Central Europe Rajendra K. Jain,2021-09-01 This book explores the transformation of India's relations with Central and Eastern Europe from being a subset of Indo-Soviet relations during the Cold War to the rediscovery and rebuilding of relations with the region almost from scratch in the post-Cold War era. It examines how the combination of Brexit, the rise of China and India's expanding geo-economic interests in Europe has led the Narendra Modi government to contemplate relations with Central Europe through a more strategic lens and treat the region as an autonomous element within India's foreign policy rather than a footnote of its relations with other great powers. Fulfilling a long-felt gap in existing literature, this volume examines India's political, economic, investment, defence and cultural relations with the Visegrad Four (the Czech Republic, Hungary, Poland and Slovakia). It analyzes Indian

perceptions of Central Europe and explores prospects of New Delhi’s political and economic engagement with the region. The painstakingly compiled appendices on the exchange of bilateral visits and agreements between India and the Visegrad Four would be of immense use as a handy reference to scholars, policy-makers, and other interested persons and institutions.

Wood & Fire Safety Linda Makovicka Osvaldova, Frank Markert, Samuel L. Zelinka, 2020-03-14 This proceedings volume presents new scientific works of the research workers and experts from the field of Wood Science & Fire. It looks into the properties of various tree species across the continents affecting the fire-technical properties of wood and wood-based materials, its modifications, fire-retardant methods and other technological processes that have an impact on wood ignition and burning. The results of these findings have a direct impact on Building Construction and Design describing the fire safety of wooden buildings, mainly large and multi-story ones. The results of these experiments and findings may be applied, or are directly implemented into Fire Science, Hazard Control, Building Safety which makes the application of wood and wood materials in buildings possible, while maintaining strict fire regulations. One part of the contributions focuses on the symbiosis of the material and the fire-fighting technologies. Wood burning has its own specific features, therefore, the fire protection technologies need to be updated regularly. It also includes the issue of the intervention of fire-fighting and rescue teams in the fires of wooden buildings. Presentations deal with the issue of forest fires influenced by the climate changes, relief, fuel models based on the type and the age of the forest stand.

A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant, 2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book’s main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant’s important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons ‘buffs’.

A Successful Transformation? Petr Pavlínek, 2008-04-30 This is a brilliant examination of the complex processes of the post-1990 transformation in the Czech automotive industry and its selective integration into the West European system. The post-1990 restructuring of the industry is analyzed in the context of its pre-1990 development and in the context of the East European automobile industry as a whole. Specifically, the book examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

Modern Trends in Cartography Jan Brus, Alena Vondrakova, Vit Vozenilek, 2014-12-02 The fast exchange of information and knowledge are the essential conditions for successful and effective research and practical applications in cartography. For successful research development, it is necessary to follow trends not only in this domain, but also try to adapt new trends and technologies from other areas. Trends in cartography are also quite often topics of many conferences which have the main aim to link research, education and application experts in cartography and GIS&T into one large platform. Such the right place for exchange and sharing of knowledge and skills was also the CARTOCON2014 conference, which took place in Olomouc, Czech Republic, in February 2014 and this book is a compilation of the best and most interesting contributions. The book content consists of four parts. The first part New approaches in map and atlas making collects studies about innovative ways in map production and atlases compilation. Following part of the book Progress in web cartography brings examples and tools for web map presentation. The third part Advanced methods in map use includes achievement of eye-tracking research and users’ issues. The final part Cartography in practice and research is a clear evidence that cartography and maps played the significant role in many geosciences and in many branches of the society. Each individual paper is original and has its place in cartography.

Tatra – The Legacy of Hans Ledwinka Ivan Margolius, John G Henry, 2015-11-13 Hans Ledwinka’s innovative Tatra cars were models of design excellence, and were highly influential in shaping modern car design concepts and the development of the Volkswagen. This book places Ledwinka in his well-deserved place amongst the great car designers. This enlarged 2nd edition contains updated material and additional illustrations.

Technology for Combating WMD Terrorism P. Stopa, Zvonko Orahovec, 2013-03-19 Much has been written on WMD terrorism, but few books present a systems approach to this problem. In this book, we present an integrated view of WMD terrorism. The threat section reviews several scenarios that a terrorist might use and a very comprehensive list of the possible biological organisms and compounds that can be used as biological, mid-spectrum, and chemical threats. In the science and technology section, the technical aspects of a successful defense against WMD agents are presented. Arguments are presented for the control of the release of scientific information to bolster CB defense. Approaches to biological agent detection and a system for ranking detection technologies are discussed next. The generic approach to biological screening and detection is then illustrated with some applications of generic detectors to water, food, and aerosol. The future of biological detection and identification is also presented, along with a call to perhaps change the paradigms that we are using. The last section of the book deals with response system planning. An example of regional cooperation is presented. Risk-based management is discussed and a practical example of this approach to emergency planning is presented. Arguments for an epidemiological reporting system are presented, while the last chapter discusses means to integrate the various components of a response system via a software tool.

STatra 815 Introduction

In todays digital age, the availability of STatra 815 books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of STatra 815 books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of STatra 815 books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing STatra 815 versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, STatra 815 books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether youre a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to

open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing STatra 815 books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for STatra 815 books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, STatra 815 books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of STatra 815 books and manuals for download and embark on your journey of knowledge?
