Eliminating the Public Health Problem of Hepatitis B and C in the United States National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on a National Strategy for the Elimination of Hepatitis B and C, 2016-06-01 Hepatitis B and C cause most cases of hepatitis in the United States and the world. The two diseases account for about a million deaths a year and 78 percent of world's hepatocellular carcinoma and more than half of all fatal cirrhosis. In 2013 viral hepatitis, of which hepatitis B virus (HBV) and hepatitis C virus (HCV) are the most common types, surpassed HIV and AIDS to become the seventh leading cause of death worldwide. The world now has the tools to prevent hepatitis B and cure hepatitis C. Perfect vaccination could eradicate HBV, but it would take two generations at least. In the meantime, there is no cure for the millions of people already infected. Conversely, there is no vaccine for HCV, but new direct-acting antivirals can cure 95 percent of chronic infections, though these drugs are unlikely to reach all chronically-infected people anytime soon. This report, the first of two, examines the feasibility of hepatitis B and C elimination in the United States and identifies critical success factors. The phase two report will outline a strategy for meeting the elimination goals discussed in this report.

Vladislaus Henry Martin Wihoda, 2015-09-17 In Vladislaus Henry Martin Wihoda offers a biography of this ruler, who ruled the Margraviate of Moravia from 1198 to 1222, and also reflects on the beginnings of the politically emancipated community of the Moravians during the 13th century.

Reimagining Europe Christian Raffensperger, 2012-03-12 Main description: An overriding assumption has long directed scholarship in both European and Slavic history: that Kievan Rus' in the tenth through twelfth centuries was part of a Byzantine commonwealth separate from Europe. Christian Raffensperger refutes this conception and offers a new frame for two hundred years of history, one in which Rus' is understood as part of medieval Europe and East is not so neatly divided from West. With the aid of Latin sources, the author brings to light the considerable political, religious, marital, and economic ties among European kingdoms, including Rus', restoring a historical record rendered blank by Russian monastic chroniclers as well as modern scholars ideologically motivated to build barriers between East and West. Further, Raffensperger revises the concept of a Byzantine Commonwealth that stood in opposition to Europe and under which Rus' was subsumed toward that of a Byzantine Ideal esteemed and emulated by all the states of Europe. In this new context, appropriation of Byzantine customs, law, coinage, art, and architecture in both Rus' and Europe can be understood as an attempt to gain legitimacy and prestige by association with the surviving remnant of the Roman Empire. *Reimagining Europe* initiates an expansion of history that is sure to challenge ideas of Russian exceptionalism and influence the course of European medieval studies.

The Roma in Romanian History Viorel Achim, 2004-08-01 One of the greatest challenges during the enlargement process of the European Union towards the east is how the issue of the Roma or Gypsies is tackled. This ethnic minority group represents a much higher share by numbers, too, in some regions going above 20% of the population. This enormous social and political problem cannot be solved without proper historical studies like this book, the most comprehensive history of Gypsies in Romania. It is based on academic research, synthesizing the entire historical Romanian and foreign literature concerning this topic, and using lot of

information from the archives. The main focus is laid on the events of the greatest consequence. Special attention is devoted to aspects linked to the long history of the Gypsies, such as slavery, the process of integration and assimilation into the majority population, as well as the marginalization of Gypsies, which has historic roots. The process of emancipation of Gypsies in the mid-19th century receives due treatment. The deportation of Gypsies to Transnistria during the Antonescu regime, between 1942-1944, is reconstructed in a special chapter. The closing chapters elaborate on the policy toward Gypsies in the decades after the Second World War that explain for the latest developments and for the situation of this population in today's Romania.

Agricultural and Pastoral Landscapes in Pre-Industrial Society Fèlix Retamero, Inge Schjellerup, Althea Davies, 2014-12-01 Through a series of case studies, this third volume in the Earth series deals with the technological constraints and innovations that enabled societies to survive and thrive across a range of environmental conditions. The contributions are structured into three sections to draw out particular commonalities and contrasts in the choices made by pre-industrial communities in the construction of varied landscapes and cultural heritage: Landnam, from the Old Norse for 'taking of land', deals with colonisation, including the drivers and processes through which colonisers developed an understanding of the productive potential and limitations of their new lands. Fields and field systems: Field-walls are a distinctive and apparently timeless characteristic of many pre-industrial farming landscapes but they present many the challenges to their study, such as the effects of ploughing, abandonment and land-use change and of urban development in fertile lowland zones which may eradicate, reduce or conceal past systems of land-use and division. The importance of indirect and proxy evidence is illustrated and the value of interdisciplinary and modelling approaches emphasised. Agro-pastoralism: focuses on the complex 'time-space adaptations' devised for managing cultivation and livestock production, particularly the need to prevent stock incursions into arable fields during the growing season whilst making effective use of seasonal grazing resources. The contributions focus on mountainous areas, where temporary migrations, in the form of transhumance, provided access to a diversity of resources based around seasonal constraints on their availability and productivity.

Assyria to Iberia Joan Aruz, Michael Seymour, 2016-12-30 The exhibition Assyria to Iberia at the Dawn of the Classical Age (The Metropolitan Museum of Art, New York, 2014) offered a comprehensive overview of art and cultural exchange in an era of vast imperial and mercantile expansion. The twenty-seven essays in this volume are based on the symposium and lectures that took place in conjunction with the exhibition. Written by an international group of scholars from a wide variety of disciplines, they include reports of new archaeological discoveries, illuminating interpretations of material culture, and innovative investigations of literary, historical, and political aspects of the interactions that shaped art and culture in the in the early first millennium B.C. Taken together, these essays explore the cultural encounters of diverse populations interacting through trade, travel, and migration, as well as war and displacement, in the ancient world. Assyria to Iberia: Art and Culture in the Iron Age contributes significantly to our understanding of the epoch-making exchanges that spanned the Near East and the Mediterranean and exerted immense influence in the centuries that followed.

Borders of Socialism L. Siegelbaum, 2016-04-15 This fascinating book argues that in Russia the relations between culture and nation, art and life, commodity and trash, often diverged from familiar Western European or American versions of modernity. The

essays show how public and private overlapped and shaped each other, creating new perspectives on individuals and society in the Soviet Union.

Between Heaven and Hell G. Diment, Y. Slezkine, 2016-04-30 Siberia has no history of independent political existence, no claim to a separate ethnic identity, and no clear borders. Yet, it could be said that the elusive country 'behind the Urals' is the most real and the most durable part of the Russian landscape. For centuries, Siberia has been represented as Russia's alter ego, as the heavenly or infernal antithesis to the perceived complexity or shallowness of Russian life. It has been both the frightening heart of darkness and a fabulous land of plenty; the 'House of the Dead' and the realm of utter freedom; a frozen wasteland and a colourful frontier; a dumping ground for Russia's rejects and the last refuge of its lost innocence. The contributors to *Between Heaven and Hell* examine the origin, nature, and implications of these images from historical, literary, geographical, anthropological, and linguistic perspectives. They create a striking, fascinating picture of this enormous and mysterious land.

Vegetation History and Cultural Landscapes Alexander Fehér, 2017-08-04 This book focuses on the vegetation history of the cultural landscape in southwestern Slovakia, which was established and adopted by mankind and has since constantly evolved in response to ongoing changes (in environmental conditions, biodiversity, land use, etc.). The book analyses four dominant ecosystems typical for the cultural landscape and affected by humans: woodlands, wetlands, grasslands and agricultural land. Each ecosystem is discussed in separate chapters. The chapters include (a) basic information, general aspects, development processes, trends and interpretations, (b) a published or non-published case study based on the author's own research, and (c) an extensive bibliography. A set of maps on the vegetation history and indices of geographical names and plants names serve to round out the coverage. The work provides an essential point of departure for describing the typical regional characteristics of the cultural landscape, with an eye to its future preservation.

Khirbet Qeiyafa in the Shephelah Silvia Schroer, Stefan Münzer, 2017 Excavations at the early Iron age site of Khirbet Qeiyafa (Israel), directed from 2007 to 2011 by Yosef Garfinkel and Saar Ganor under the auspices of the Hebrew University of Jerusalem and the Israel Antiquities Authority, have attracted considerable scholarly and media attention since the very first season, when the discovery of an inscribed ostrakon sparked controversies over the site's historical significance and nature. Located at the entrance of the Elah Valley, protected by a casemate wall and two monumental gateways, the settlement of Qeiyafa existed for barely half a century. Its dating and the correlation of the archaeological evidence with the regional history, not least the rise of an early Judahite

monarchy, have become matters of intense academic debate. Resulting from a colloquium of the Swiss Society of Ancient Near Eastern Studies, this volume offers a condensed report by main excavator Yosef Garfinkel as well as several in-depth studies on archaeological, historical, epigraphical, iconographical and biblical issues.

The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the “2030 Agenda for Sustainable Development”. On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. The Encyclopedia encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 3, namely Ensure healthy lives and promote well-being for all at all ages and contains the description of a range of terms, to grow a better understanding and foster knowledge. Ensuring healthy lives and promoting the well-being for all at all ages is essential to sustainable development. Significant strides have been made in increasing life expectancy and reducing some of the common killers associated with child and maternal mortality. Major progress has been made on increasing access to clean water and sanitation, reducing malaria, tuberculosis, polio and the spread of HIV/AIDS. However, many more efforts are needed to fully eradicate a wide range of diseases and address many different persistent and emerging health issues. Concretely, the defined targets are: Reduce the global maternal mortality ratio to less than 70 per 100,000 live births End preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births End the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, water-borne diseases and other communicable diseases Reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and wellbeing Strengthen the prevention and treatment of substance abuse, including narcotic drug abuse and harmful use of alcohol Halve the number of global deaths and injuries from road traffic accidents Ensure universal access to sexual and reproductive health-care services, including for family planning, information and education, and the integration of reproductive health into national strategies and programmes Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all Substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination Strengthen the implementation of the World Health Organization Framework Convention on Tobacco Control in all countries, as appropriate Support the research and development of vaccines and medicines for the communicable and non-communicable diseases that primarily affect developing countries, provide access to affordable essential medicines and vaccines, in accordance with the Doha Declaration on the TRIPS Agreement and Public Health, which affirms the right of developing countries to use to the full the provisions in the Agreement on Trade-Related Aspects of Intellectual Property Rights regarding flexibilities to protect public health, and, in particular, provide access to medicines for all Substantially increase health financing and the recruitment, development, training and retention of the health workforce in developing countries, especially in least

Assyria to Iberia at the Dawn of the Classical Age Joan Aruz, Sarah B. Graff, Yelena Rakic, 2014-09-15 Bringing together the research of internationally renowned scholars, *Assyria to Iberia at the Dawn of the Classical Age* contributes significantly to our understanding of the epoch-making artistic and cultural exchanges that took place across the Near East and Mediterranean in the early first millennium B.C. This was the world of Odysseus, in which seafaring Phoenician merchants charted new nautical trade routes and established prosperous trading posts and colonies on the shores of three continents; of kings Midas and Croesus, legendary for their wealth; and of the Hebrew Bible, whose stories are brought vividly to life by archaeological discoveries. Objects drawn from collections in the Middle East, Europe, North Africa, and the United States, reproduced here in sumptuous detail, reflect the cultural encounters of diverse populations interacting through trade, travel, and migration as well as war and displacement. Together, they tell a compelling story of the origins and development of Western artistic traditions that trace their roots to the ancient Near East and across the Mediterranean world. Among the masterpieces brought together in this volume are stone reliefs that adorned the majestic palaces of ancient Assyria; expertly crafted Phoenician and Syrian bronzes and worked ivories that were stored in the treasuries of Assyria and deposited in tombs and sanctuaries in regions far to the west; and lavish personal adornments and other luxury goods, some imported and others inspired by Near Eastern craftsmanship. Accompanying texts by leading scholars position each object in cultural and historical context, weaving a narrative of crisis and conquest, worship and warfare, and epic and empire that spans both continents and millennia. Writing another chapter in the story begun in *Art of the First Cities* (2003) and *Beyond Babylon* (2008), *Assyria to Iberia* offers a comprehensive overview of art, diplomacy, and cultural exchange in an age of imperial and mercantile expansion in the ancient Near East and across the Mediterranean in the first millennium B.C.—the dawn of the Classical age.
