Mathematical Models for Suspension Bridges Filippo Gazzola,2015-05-29 This work provides a detailed and up-to-the-minute survey of the various stability problems that can affect suspension bridges. In order to deduce some experimental data and rules on the behavior of suspension bridges, a number of historical events are first described, in the course of which several questions concerning their stability naturally arise. The book then surveys conventional mathematical models for suspension bridges and suggests new nonlinear alternatives, which can potentially supply answers to some stability questions. New explanations are also provided, based on the nonlinear structural behavior of bridges. All the models and responses presented in the book employ the theory of differential equations and dynamical systems in the broader sense, demonstrating that methods from nonlinear analysis can allow us to determine the thresholds of instability.

Hongkongers' Fight for Freedom Nam Kiu Tsing,2023-04-24 Hongkongers' Fight for Freedom: Voices from the 2019 Anti-extradition Movement documents this momentous episode in the history of Hong Kong through the voices of its participants. Drawing on the interviews of 56 participants, this book portrays how normally acquiescent Hongkongers joined the Movement en masse, driven by government intransigence, police brutality and flagrant injustice. It also conveys the deep emotions and strong sense of commitment and identity which evolved in the process. The Movement was a courageous effort by its citizens to defend their freedoms, but sadly, it also marked the beginning of the city's sharp descent into Chinese tyranny. While a curtain of silence now enshrouds Hong Kong, it is imperative that these voices of resistance be preserved and heard.

Computer and Computing Technologies in Agriculture, Volume II Daoliang Li,2008-02-19 The papers in this volume comprise the refereed proceedings of the First International Conference on Computer and Computing Technologies in Agriculture (CCTA 2007), in Wuyishan, China, 2007. This conference is organized by China Agricultural University, Chinese Society of Agricultural Engineering and the Beijing Society for Information Technology in Agriculture. The purpose of this conference is to facilitate the communication and cooperation between institutions and researchers on theories, methods and implementation of computer science and information technology. By researching information technology development and the - sources integration in rural areas in China, an innovative and effective approach is expected to be explored to promote the technology application to the development of modern agriculture and contribute to the construction of new countryside. The rapid development of information technology has induced substantial changes and impact on the development of China's rural areas. Western thoughts have exerted great impact on studies of Chinese information technology development and it helps more Chinese and western scholars to expand their studies in this academic and application area. Thus, this conference, with works by many prominent scholars, has covered computer science and technology and information development in China's rural areas; and probed into all the important issues and the newest research topics, such as Agricultural Decision Support System and Expert System, GIS, GPS, RS and Precision Farming, CT applications in Rural Area, Agricultural System Simulation, Evolutionary Computing, etc.

Dynamics of China's Economy: Zhiming Long,Rémy Herrera,2023 This book offers an analysis of China's growth from 1949 to the present day. The authors rebuild time-series databases (capital, education, R&D...), mobilize modern tools of statistics and econometrics, and use various methodologies (mainly Marxist) to carry out this research.

World Development Report 2006 Francisco H. G. Ferreira,Michael Walton,2005-01-01 Inequality of opportunity, both within and among nations, sustains extreme deprivation, results in wasted human potential and often weakens prospects for overall prosperity and economic growth, concludes the 2006 World Development Report. To correct this situation and reduce poverty more effectively, Equity and Development recommends ensuring more equitable access by the poor to health care, education, jobs, capital, and secure land rights, among others. It also calls for greater equality of access to political freedoms and political power, breaking down stereotyping and discrimination, and improving access by the poor to justice systems and infrastructure. To level the playing field among countries, and thereby reduce global inequities that hurt the poor in developing countries, the report calls for removal of trade barriers in rich countries, flexibility to allow greater in-migration of lower-skilled people from developing countries, and increased -- and more effective -- development assistance.

Tourism Product Development in China, Asian and European Countries Yuhua Luo,Jinbo Jiang,Doudou Bi,2020-05-21 This book analyzes a broad variety of tourism products in China, Asia and Europe that employ both cutting-edge IT technologies and advanced methodologies. These products are cultural tourism, recreational tourism, sport tourism, adventure tourism, medical tourism and more. Authors from different areas contributed to the book, including academic researchers, graduate students, government administrators and industry practitioners. The book covers the entire chain of tourism product business processes: product development and improvement, tourist behavior analysis, marketing and sales, customer service, etc. In addition, it addresses related issues such as tourism sustainability, policymaking, environmental protection and human resource development. Big data processing, data mining, visual content analysis and textural content analysis, semantic nets and sentiment analysis are among the cutting-edge technological tools used to study tourism product development here. The book gathers selected papers from the 9th International Conference on Tourism and Hospitality between China and Spain (www.china-spain.org) with participants from 18 countries. Though the book is mainly intended for researchers and policymakers, it will also appeal to a wider audience, due to its first-hand content, insightful analysis and broad geographic coverage.

Terrorism, Democracy, and Human Security Ronald Crelinsten,2021-03-15 This book examines the relationship between terrorism and counterterrorism and how it operates within the broader context of communication, control, power, and democratic governance at the national, international, and transnational level. A culmination of decades of research on the challenges that liberal democracies face in dealing with terrorism, this work provides an innovative framework that maps out the broader context in which terrorism and counterterrorism interact and co-evolve - the terrorism-counterterrorism nexus. In a series of models moving from local to global perspectives, the framework places this nexus within the broader context of social, cultural, political, and economic life. This framework provides a tool for maintaining situational awareness in a multi-tiered, networked world where geography and history are splintering into a rainbow of perspectives and locales, revealing the contested nature of space and time themselves. This book will be of much interest to students of political violence, terrorism studies, communication studies, and international relations, as well as security professionals.

Architecture Francis D. K. Ching,2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated Architecture: Form, Space, and Order has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment.? Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, Architecture: Form, Space, and Order encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

Deep Learning Ian Goodfellow,Yoshua Bengio,Aaron Courville,2016-11-10 An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. “Written by three experts in the field, Deep Learning is the only comprehensive book on the subject.” —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

China and Its Small Neighbors Sung Chull Kim,2023-03-01 In China and Its Small Neighbors, Sung Chull Kim examines the political implications of the economic asymmetry between China and its small neighbors, part of wider changes in international relations brought about by the rise of China. While being critical of the current trend that focuses on the China-U.S. rivalry alone, Kim argues that a microanalysis of China's advances toward its neighbors is a guide to understanding the trajectory of China's expanding influence and transitions in world politics more broadly. Economic asymmetry—as seen in trade concentration, non-transparency, and reliance on bilateral aid—has made China's small neighbors vulnerable on the political front, thus generating potential threats to their sovereignty and independence. Because China has the upper hand in the bilateral relationships, these weak states practice dual-core hedging as a strategy for survival. They hedge on China for expected economic benefits and at the same time hedge against their powerful neighbor to mitigate the risks involved in that hedging-on. Each small state's mode of hedging depends on its degree of vulnerability and its availability of policy instruments such as multilateral institutions and bilateral partnerships with extra-regional powers.
