*The Australia-European Union Free Trade Agreement* Marc Bungenberg, Andrew Mitchell, 2022-02-26 This book gathers a selection of peer-reviewed chapters reflecting on the Australia-European Union Free Trade Agreement (AEUFTA). Since 18 June 2018, ten rounds of negotiations for a AEUFTA have been held in a constructive atmosphere, showing a shared commitment to move forward with this ambitious and comprehensive agreement. After a lengthy and arduous process interrupted by the United Kingdom's withdrawal from the European Union (EU), the United States' hesitations regarding the EU's global strategy and the outbreak of the COVID-19 pandemic, the negotiations between Australia and the European Union finally appear to be nearing completion. In challenging times, both parties share a commitment to a positive trade agenda, and to the idea that good trade agreements benefit both sides by boosting jobs, growth and investment. This book explores the challenges, achievements and missed opportunities in the AEUFTA negotiation process, and examines current legal and political relations between the EU, its Member States and Australia. Furthermore, it examines in detail a wide and diverse range of negotiated areas, including digital trade, services, intellectual property rules, trade remedies and investment screening, as well as dispute settlement mechanisms. Lastly, it sheds light on the likely nature of future commercial relations between Australia and the EU. Written by a team of respected authors from leading institutions in both Australia and Europe, the book provides a valuable, interdisciplinary analysis of the AEUFTA.

## **A Pattern Language** Christopher

Alexander, 2018-09-20 You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely. The three books are *The Timeless Way of Building*, *The Oregon Experiment*, and this book, *A Pattern Language*. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain languages, which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. Patterns, the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of

the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.

*Ferry and Brandon's Cost Planning of Buildings* Richard Kirkham, 2013-02-05 Ferry and Brandon's

Cost Planning of Buildings provides a comprehensive introduction to the practice and procedures of cost planning in the procurement of buildings. The eighth edition of this leading textbook has been thoroughly updated to reflect the significant changes that have occurred in the UK construction industry since the new millennium. Whilst retaining its core structure of the three-phase cost planning process originally developed by Ferry and Brandon, the text provides a thorough grounding in contemporary issues including procurement innovation, whole life-cycle costing and modelling techniques. Designed to support the core cost planning studies covered by students reading for degrees in quantity surveying and construction management, it provides a platform for understanding the fundamental importance of effective cost planning practice. The principals of elemental cost planning are covered from both pre- and post- contract perspectives; the role of effective briefing and client/stakeholder engagement as best practice is also reinforced in this text. In his revisions, Richard Kirkham reflects the many changes in the construction industry in the past eight years: procurement is given prominence early in the book; the changing role of the quantity surveyor and building economist is discussed, as is the crucial role they assume throughout the project life cycle. He emphasises the importance of early and collaborative working in the design team, as well as the impact of whole life-cycle costing.

**Home Truths** Liam Halligan, 2021-01-13 The UK's chronic housing shortage is lowering the quality of life for millions, turning the British dream of home ownership into a cruel nightmare - not least for 'generation rent'. Countless vulnerable families are meanwhile being deprived of access to decent social housing, causing homelessness to spiral. In this searing polemic, Liam Halligan offers radical solutions to the most urgent political issue of our times. Fully updated, with a foreword from former Chancellor Sajid Javid and drawing on extensive interviews with Cabinet ministers, civil servants, leading developers and struggling homebuyers across the country, Home Truths is a no-holds-barred critique of the UK's housing crisis.
