The Book of Dave Will Self, 2012-08-02 The Book of Dave is Booker-shortlisted author Will Self's dazzling sixth novel What if a demented London cabbie called Dave Rudman wrote a book to his estranged son to give him some fatherly advice? What if that book was buried in Hampstead and hundreds of years later, when rising sea levels have put London underwater, spawned a religion? What if one man decided to question life according to Dave? And what if Dave had indeed made a mistake? Shuttling between the recent past and a far-off future where England is terribly altered, The Book of Dave is a strange and troubling mirror held up to our times: disturbing, satirizing and vilifying who and what we think we are. At once a meditation upon the nature of received religion, a love story, a caustic satire of contemporary urban life and a historical detective story set in the far future - this

compulsive novel will be enjoyed by readers everywhere, including fans of Martin Amis and Anthony Burgess's *A Clockwork Orange*. 'Vivid, visceral and breathtakingly ambitious, this is Self's best yet' *GQ* 'Mindboggling ... darkly hilarious ... A fascinating book' *Evening Standard* Will Self is the author of nine novels including *Cock and Bull*; *My Idea of Fun*; *Great Apes*; *How the Dead Live*; *Dorian, an Imitation*; *The Book of Dave*; *The Butt*; *Walking to Hollywood and Umbrella*, which was shortlisted for the Man Booker Prize. He has written five collections of shorter fiction and three novellas: *The Quantity Theory of Insanity*; *Grey Area*; *License to Hug*; *The Sweet Smell of Psychosis*; *Design Faults in the Volvo 760 Turbo*; *Tough, Tough Toys for Tough, Tough Boys*; *Dr. Mukti and Other Tales of Woe and Liver: A Fictional Organ with a Surface Anatomy of Four Lobes*. Self has also compiled a number of nonfiction works, including *The Undivided Self: Selected Stories*; *Junk Mail*; *Perfidious Man*; *Sore Sites*; *Feeding Frenzy*; *Psychogeography*; *Psycho Too* and *The Unbearable Lightness of Being a Prawn Cracker*.

The Nuragic Civilization Skira, 2021-12-14 A revelatory guide to one of the oldest and most mysterious civilizations of the Mediterranean With no written record of their own, the Nuragic

civilization has long remained shrouded in mystery to contemporary scholars. The ancient Mediterranean civilization is thought to have occupied what is present-day Sardinia from the Bronze Age to 238 BCE, and it takes its name from the Sardinian word for the monument considered most representative of the culture: the nuraghe. A nuraghe is a towering fortress constructed of large stone slabs stacked on top of one another, rough-hewn or cut with varying degrees of regularity, each containing one or more chambers. Over 7,000 nuraghi dot the island, along with other structures such as sacred springs and giants' tombs. This book guides readers on a tour back in time through several European cities, exploring archaeological sites and uncovering the secrets of this enigmatic society with stunning photography accompanied by historical research.

Studies of Rare-metal Deposits in the Northwest Territories W. D. Sinclair,D. G. Richardson,1994

This volume contains four papers that report on a wide range of geoscientific activities related to various rare-metal deposits in the Northwest Territories. Two papers represent the results of work

carried out on the Blatchford Lake intrusive suite and the associated Thor Lake rare-metal deposits of niobium, tantalum, beryllium, yttrium, rare-earth elements, and gallium. A detailed gravity survey and computer modelling provides an understanding of the three dimensional geometry of the 23 km wide Blatchford Lake. Another paper summarizes some of the extensive pegmatite research done by the University of Manitoba in the Northwest Territories during the 1980s, providing information on the geological setting, geochemistry, and economic potential of four previously undocumented or poorly known rare-element pegmatite occurrences at Ayler Lake, Torp Lake, Chantry Inlet, and the Foxe fields in the Rae Province. Another paper presents a thorough documentation of the geological settings, characteristics, and metallogeny of selected mineral occurrences in the southern part of the Proterozoic Great Bear magnetic zone.

Guidebook to the Pegmatites of Western Australia Mark Ivan Jacobson, Mark Andrew Calderwood, Benjamin Alexander Grguric, 2007-01-01 Summarises the history, geology and minerology of all known pegmatites in Western Australia, as well as providing specific geodetic locations of these

deposits and their ownership, where known.

Rock Forming Minerals William Alexander Deer, Robert Andrew Howie, J. Zussman, 1978 This extensive revision deals with the minerals talc, pyrophyllite, chlorite, serpentine, stilpnomelane, zussmanite, prehnite and apophyllite. The text has been completely rewritten and very much expanded

to take account of the many advances that have been made in all aspects of the Earth sciences, not least mineralogy. Each chapter is headed by a brief tabulation of mineral data and ends with full references. Crystal structures are described and illustrated, followed by discussion of structural information gained from spectroscopic as well as X-ray and electron-optic methods. Chemical sections include many analyses and structural formulae, phase relations, igneous, metamorphic and sedimentary geochemistry, alteration and weathering. Examples are given of a range of mineral parageneses. Correlation between the various aspects of mineralogy are emphasized in order to provide a scientific understanding of minerals as well as their description and identification. So great has been the expansion of research on layered silicates that a separate volume (3A, 2003) was devoted entirely to micas and another (3C), entirely for clay minerals will also be published. Rock-Forming Minerals is an essential reference work for professionals, researchers and postgraduate students in Earth science and related fields in chemistry, physics, engineering, environmental and soil sciences.
