**Agha, Shaikh and State** Martin van Bruinessen,1992 Exacerbated by the Gulf War, the plight of the Kurds is one of the most urgent problems facing the international community. This authoritative study of the Kurdish people provides a deep and varied insight into one of the largest primarily tribal communities in the world. It covers the collapse of the Ottoman Empire, the great Kurdish revolt against republican Turkey, the birth of Kurdish nationalism and the situation of the Kurdish people in Iraq, Turkey and Iran today. Van Bruinessen's work is already recognized as a key contribution to this subject. Tribe by tribe, he accounts for the evolution of power within Kurdish religious and other lineages, and shows how relations with the state have played a key constitutive role in the development of tribal structures. This is illustrated from contemporary Kurdish life, highlighting the complex interplay between traditional clan loyalties and their modern national equivalents. This book is essential to any Middle East collection. It has serious implications for the study of tribal life elsewhere, and it documents the history of what has until recently been a forgotten people.

**Killing Time** Nicholas J Saunders,2011-11-08 The Great War of 1914-1918 now stands at the furthest edge of living memory. And yet, hardly a month passes without some dramatic and sometimes tragic discovery being made along the old killing fields of the Western Front. Graves of British soldiers buried during battle – still lying in rows seemingly arm in arm or found crouching at the entrance to a dugout; whole 'underground cities' of trenches, dugouts and shelters have been preserved in the mud; field hospitals carved out of the chalk country of the Somme marked with graffiti; unexploded bombs and gas canisters – all of these are the poignant and sometimes deadly legacies of a war we can never forget. Killing Time digs beneath the surface of war to uncover the living reality left behind. Nicholas J. Saunders brings together a wealth of discoveries to offer fresh insights into the human and often barbaric aspect of warfare. He uses discoveries in the trenches, family photographs, diaries and souvenirs to give the dead a voice. You cannot fail to be fascinated and moved by what he unearths.

*Sustainable Agriculture Reviews 51* Praveen Guleria,Vineet Kumar,Eric Lichtfouse,2021-04-12 In the context of climate change, pollution and food safety, the current challenge is to enhance legumes production to sustain the growing population needs by 2050. This is a daunting task because abiotic and biotic stresses are threatening the growth, survival and productivity of legumes. For instance, the productivity of legumes is documented to be reduced by 14-88% by abiotic stresses. The co-occurrence of abiotic and biotic stresses under field conditions leads to interactive stress types, thus yielding positive or negative outcomes. Legumes react using antioxidant defense, osmoregulatory adjustments, hormonal regulations and molecular mechanisms to tolerate stress. Hence, improving legume productivity requires knowledge on the sensitivity, mechanisms and approaches of stress tolerance in legumes, in order to design new crops and alternative management systems. This book presents advances on bioactive compounds, applications, effect of various stresses and biotechnology-based stress tolerance mechanisms of legumes. This is our second volume on Legume Agriculture and Biotechnology, published in the series Sustainable Agriculture Reviews.

**Electrochemical Systems** John Newman,Karen E. Thomas-Alyea,2012-11-27 The new edition of the cornerstone text on electrochemistry Spans all the areas of electrochemistry, from the basics of thermodynamics and electrode kinetics to transport phenomena in electrolytes, metals, and semiconductors. Newly updated and expanded, the Third Edition covers important new treatments, ideas, and technologies while also increasing the book's accessibility for readers in related fields. Rigorous and complete presentation of the fundamental concepts In-depth examples applying the concepts to real-life design problems Homework problems ranging from the reinforcing to the highly thought-provoking Extensive bibliography giving both the historical development of the field and references for the practicing electrochemist.

*Ceramic Materials* C. Barry Carter,M. Grant Norton,2013-01-04 Ceramic Materials: Science and Engineering is an up-to-date treatment of ceramic science, engineering, and applications in a single, comprehensive text. Building on a foundation of crystal structures, phase equilibria, defects, and the mechanical properties of ceramic materials, students are shown how these materials are processed for a wide diversity of applications in today's society. Concepts such as how and why ions move, how ceramics interact with light and magnetic fields, and how they respond to temperature changes are discussed in the context of their applications. References to the art and history of ceramics are included throughout the text, and a chapter is devoted to ceramics as gemstones. This course-tested text now includes expanded chapters on the role of ceramics in industry and their impact on the environment as well as a chapter devoted to applications of ceramic materials in clean energy technologies. Also new are expanded sets of text-specific homework problems and other resources for instructors. The revised and updated Second Edition is further enhanced with color illustrations throughout the text.

*Purification of Laboratory Chemicals* W.L.F. Armarego,2003-03-07 Now in its fifth edition, the book has been updated to include more detailed descriptions of new or more commonly used techniques since the last edition as well as remove those that are no longer used, procedures which have been developed recently, ionization constants (pKa values) and also more detail about the trivial names of compounds. In addition to having two general chapters on purification procedures, this book provides details of the physical properties and purification procedures, taken from literature, of a very extensive number of organic, inorganic and biochemical compounds which are commercially available. This is the only complete source that covers the purification of laboratory chemicals that are commercially available in this manner and format. \* Complete update of this valuable, well-known reference \* Provides

purification procedures of commercially available chemicals and biochemicals \* Includes an extremely useful compilation of ionisation constants

**Gimson's Pronunciation of English** Alan Cruttenden,2014-02-05 Since its first publication in 1962, Gimson's Pronunciation of English has been the essential reference book for anyone studying or teaching the pronunciation of English. This eighth edition has been updated to describe General British (GB) as the principal accent, rather than RP, and the accompanying transcriptions have been brought into line with recent changes in pronunciation. This latest edition also includes completely rewritten chapters on the history of the language and the emergence of a standard, alongside a justification for the change from RP to GB. A further bonus to this important text is its extensive and attractive new Companion Website ([www.routledge.com/cw/cruttenden](http://www.routledge.com/cw/cruttenden)), which now includes moment-by-moment commentaries on videos showing the articulation of all GB consonants and vowels in spoken phrases, as well as cross-referencing between the book and these videos. The Companion Website also includes new recordings of Old English, Middle English, and Early Modern English, and features links to recordings of recent and current GB with comments and transcriptions. Comprehensive yet accessible, Gimson's Pronunciation of English remains the indispensable reference book for anyone for anyone with an interest in English phonetics.

**In the Land of the Romanovs** Anthony Cross,2014-04-27 Over the course of more than three centuries of Romanov rule in Russia, foreign visitors and residents produced a vast corpus of literature conveying their experiences and impressions of the country. The product of years of painstaking research by one of the world's foremost authorities on Anglo-Russian relations, In the Lands of the Romanovs is the realization of a major bibliographical project that records the details of over 1200 English-language accounts of the Russian Empire. Ranging chronologically from the accession of Mikhail Fedorovich in 1613 to the abdication of Nicholas II in 1917, this is the most comprehensive bibliography of first-hand accounts of Russia ever to be published. Far more than an inventory of accounts by travellers and tourists, Anthony Cross's ambitious and wide-ranging work includes personal records of residence in or visits to Russia by writers ranging from diplomats to merchants, physicians to clergymen, gardeners to governesses, as well as by participants in the French invasion of 1812 and in the Crimean War of 1854-56. Providing full bibliographical details and concise but informative annotation for each entry, this substantial bibliography will be an invaluable tool for anyone with an interest in contacts between Russia and the West during the centuries of Romanov rule.

**Aleksandr Deineka (1899-1969)** Александр Александрович Дейнека,Fundación Juan March,2011 Aleksandr Deineka (1899-1969): An Avant-Garde for the Proletariat is the first exhibition and publication to present this outstanding figure of socialist realism - and, by extension, the historical period from which his work was borne - in a twofold context: the end of the avant-garde and the advent of Soviet socialist realism. It covers Deineka's entire oeuvre, from his early paintings of the 1920s to the twilight of his career in the 1950s, when the dreamlike quality of his first works gave way to the harsh materiality of everyday life, the life in which the utopian ideals of socialism seemed to materialize. Combining Deineka's graphic work, extraordinary posters and celebrated contributions to illustrated magazines and books with his imposing monumental paintings, this catalogue displays a variety of subjects: factories and enthusiastic masses, athletes and farmers, the ideal and idyllic image of Soviet life.

**S.T.E.M. Education** Satasha L. Green,2014 Advancing education in science, technology, engineering, and mathematics (STEM) in U.S. public schools has been at the forefront of educational issues and a national priority (President's Council of Advisors on Science and Technology, 2010). Although there is a need for this ambitious initiative, students with disabilities has been left out of the conversation. Individuals with disabilities have been underrepresented in STEM fields for many years. Traditionally individuals with disabilities in STEM careers lag even further behind discrepancies of race and gender in these areas. Therefore, the need to provide general and special education teachers practices and strategies to improve outcomes for students with disabilities in STEM areas is imperative. The nation's changing demographics and continued need to remain globally competitive makes it clear that general and special education teachers need strategies to support, instruct and engage students with disabilities in STEM education. Students in U.S. schools are academically behind their international peers in STEM areas. Currently, the United States ranks 17th in science and 25th in mathematics among other nations (National Center for Education Statistics, 2011). In the field of engineering, college programs in China and India graduated many more engineers than in the U.S. (Gerefi, Wadhwa, Rissing, & Ong, 2008). For example, in 2011, China's engineering graduates totaled one million (Shammas, 2011), as compared to colleges in the U.S. which graduated 84,599 engineers (Deffree, 2012).
