Fundamentals of Machine Component Design Robert C. Juvinall,Kurt M. Marshek,2020-06-23 Fundamentals of Machine Component Design presents a thorough introduction to the concepts and methods essential to mechanical engineering design, analysis, and application. In-depth coverage of major topics, including free body diagrams, force flow concepts, failure theories, and fatigue design, are coupled with specific applications to bearings, springs, brakes, clutches, fasteners, and more for a real-world functional body of knowledge. Critical thinking and problem-solving skills are strengthened through a graphical procedural framework, enabling the effective identification of problems and clear presentation of solutions. Solidly focused on practical applications of fundamental theory, this text helps students develop the ability to conceptualize designs, interpret test results, and facilitate improvement. Clear presentation reinforces central ideas with multiple case studies, in-class exercises, homework problems, computer software data sets, and access to supplemental internet resources, while appendices provide extensive reference material on processing methods, joinability, failure modes, and material properties to aid student comprehension and encourage self-study.

Outdoor Recreation David Huddart,Tim Stott,2019-10-25 This textbook presents a comprehensive overview of the environmental impacts of various types of outdoor recreation, and how these can be best managed. As a field of study, recreational ecology is both multidisciplinary and interdisciplinary, and the authors seek to develop a deeper understanding of both the role and function of the factors that influence visitor numbers and their impact. An accessible and comprehensive textbook, it features numerous types of outdoor recreational activities including hill walking, rock climbing, mountain marathons, skiing, scuba diving and more. Drawn from several global case studies, the authors estimate the current and future numbers involved in outdoor recreation, and how best these numbers can be managed. Effective visitor impact management actions arise from collaboration between recreation ecologists, social scientists, experienced recreation managers, recreation stakeholders and the recreationalists themselves: as such, this book will be multi-disciplinary in scope. This practical and engaging textbook will be invaluable to students and scholars of outdoor recreation and adventure tourism as well as practitioners and managers working in the field.

Explorer's Guide Vermont (Thirteenth Edition) Christina Tree,Rachel Carter,2012-09-17 The definitive guide to the Green Mountain State Christina Tree and new coauthor Rachel Carter have more lovingly than ever updated the Explorer's Guide to Vermont, especially since floods in August 2011 caused by Tropical Storm Irene devastated so many of the communities, businesses, iconic covered bridges, and scenic backroads in the state. As these towns and storefronts rebuild, so have Tree and Carter This 13th edition of Explorer's Guide Vermont reviews hundreds of dining and lodging options from the remote reaches of the Northeast Kingdom to quaint Manchester and bustling Burlington. The authors offer great recommendations for the most rewarding spots to visit—artists' studios, farmers' markets, historic sites, and more—and highlight the best biking, hiking, swimming, winter sports, horseback riding, fishing, and paddling. Enjoy four seasons of events and activities; whether you're a visitor or a resident, you've got to get this guide!

Explorer's Guide Vermont (Thirteenth Edition) (Explorer's Complete) Christina Tree,Rachel Carter,2012-09-17 Surveys the parks, campgrounds, inns, motels, restaurants, stores, sports, cultural activities, special events, and historic villages in Vermont.

Touching Spirit Bear Ben Mikaelson,2010-04-20 In his Nautilus Award-winning classic *Touching Spirit Bear*, author Ben Mikaelson delivers a powerful coming-of-age story of a boy who must overcome the effects that violence has had on his life. After severely injuring Peter Driscal in an empty parking lot, mischief-maker Cole Matthews is in major trouble. But instead of jail time, Cole is given another option: attend Circle Justice, an alternative program that sends juvenile offenders to a remote Alaskan Island to focus on changing their ways. Desperate to avoid prison, Cole fakes humility and agrees to go. While there, Cole is mauled by a mysterious white bear and left for dead. Thoughts of his abusive parents, helpless Peter, and his own anger cause him to examine his actions and seek redemption—from the spirit bear that attacked him, from his victims, and, most importantly, from himself. Ben Mikaelson paints a vivid picture of a juvenile offender, examining the roots of his anger without absolving him of responsibility for his actions, and questioning a society in which angry people make victims of their peers and communities. *Touching Spirit Bear* is a poignant testimonial to the power of a pain that can destroy, or lead to healing. A strong choice for independent reading, sharing in the classroom, homeschooling, and book groups.

Worlds in Miniature Jack Davy,Charlotte Dixon,2020-10-09 Miniaturisation is the creation of small objects that resemble larger ones, usually, but not always, for purposes different to those of the larger original object. *Worlds in Miniature* brings together researchers working across various regions, time periods and disciplines to explore the subject of miniaturisation as a material culture technique. It offers original contribution to the field of miniaturisation through its broad geographical scope, interdisciplinary approach, and deep understanding of miniatures and their diverse contexts. Beginning with an introduction by the editors, which offers one possible guide to studying and comparing miniatures, the following chapters include studies of miniature

Neolithic stone circles on Exmoor, Ancient Egyptian miniature assemblages, miniaturisation under colonialism as practiced by the Makah People of Washington State, miniature surf boats from India, miniaturised contemporary tourist art of the Warao people of Venezuela, and dioramas on display in the Science Museum. Interspersing the chapters are interviews with miniature-makers, including two miniature boat-builders at the National Maritime Museum Cornwall and a freelance architectural model-maker. Professor Susanne Küchler concludes the volume with a theoretical study summarising the current state of miniaturisation as a research discipline. The interdisciplinary nature of the volume makes it suitable reading for anthropologists, archaeologists, historians and artists, and for researchers in related fields across the social sciences. Social Assistance in Albania Harold Alderman, 1998-01-01 Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

The Culture of Technology Arnold Pacey, 1985-09-10 The Culture of Technology examines our often conflicting attitudes toward nuclear weapons, biological technologies, pollution, Third World development, automation, social medicine, and industrial decline. It disputes the common idea that technology is value-free and shows that its development and use are conditioned by many factors-political and cultural as well as economic and scientific. Many examples from a variety of cultures are presented. These range from the impact of snowmobiles in North America to the use of water pumps in rural India, and from homemade toys in Africa to electricity generation in Britain-all showing how the complex interaction of many influences in every community affects technological practice. Arnold Pacey, who lives near Oxford, England, has a degree in physics and has lectured on both the history of technology and technology policy, with a particular focus on the development of technologies appropriate to Third World needs. He is the author of The Maze of Ingenuity (MIT Press paperback).
