Ship Modeling Simplified: Tips and Techniques for Model Construction from Kits Frank Mastini,1990-03-22 In Ship Modeling Simplified, master model builder Frank Mastini puts to paper the methods he's developed over 30 years at the workbench to help novices take their first steps in an exciting pastime. You don't need the deftness of a surgeon or the vocabulary of an old salt to build a model. What you need is an understanding coach. Mastini leads readers from the mysteries of choosing a kit and setting up a workshop through deciphering complicated instructions and on to painting, decorating, and displaying finished models--with patience and clarity, not condescension. He reveals dozens of shortcuts: How to plank a hull egg-shell tight; how to build and rig complicated mast assemblies without profanity; how to create sails that look like sails. . . . And along the way he points out things that beginners usually do wrong--beforehand, not after they've taken hammers to their projects. Ship Modeling Simplified even includes an Italian-English dictionary of nautical terms, the key to assembling the many high-quality Italian kits on the American market. Model building is fun, and not nearly as difficult as some experts would have you believe. Here is everything you'll ever need to get started in a hobby that will last a lifetime.

A Bibliography of Robertson Davies Carl Spadoni,Judith Skelton Grant,2014-08-01 Robertson Davies (1913–1995), one of Canada's most distinguished authors of the twentieth century, was known for his work as a novelist, playwright, critic, journalist, and professor. This descriptive bibliography is dedicated to his writing career, covering all publications from his first venture into print at the age of nine to works published posthumously to 2011. Entries include each of Davies' signed publications and those pseudonymous or anonymous writings he acknowledged having written. Included are his plays, novels, journalism, academic writing, translations, interviews, speeches, lectures, unsigned articles and editorials, films, audio recordings, and multimedia editions. Also listed is a generous sampling of unsigned articles and editorials. Using Davies' archives and the archives of other authors, organizations, and publishers, Carl Spadoni and Judith Skelton Grant present A Bibliography of Robertson Davies to serve the research demands of Canadian literature and book history scholars.

The Viking Ship Gareth Williams,2014 The Viking ship is one of the most iconic images of the Viking Age. As well as including well-known vessels such as the spectacular ship-burials from Gokstad and Oseberg in southern Norway, Viking Ships introduces the newly-conserved Roskilde 6 ship from Denmark. Measuring at over 37 metres, this is the longest Viking ship ever discovered and will form the core of the touring exhibition Vikings: life and legend. The Vikings used their shipbuilding skills to command the sea; their famous ships permitted the exploration, colonization and the raids for which they are best known. This book will explore the evolution of their sea-going vessels and celebrate this outstanding feature of the Viking Age.

Silk for the Vikings Marianne Vedeler,2014-05-30 The analysis of silk is a fascinating topic for research in itself but here, focusing on the 9th and 10th centuries, Marianne Vedeler takes a closer look at the trade routes and the organization of production, trade and consumption of silk during the Viking Age. Beginning with a presentation of the silk finds in the Oseberg burial, the richest Viking burial find ever discovered, the other silk finds from high status graves in Scandinavia are discussed along with an introduction to the techniques used to produce raw silk and fabrics. Later chapters concentrate on trade and exchange, considering the role of silk items both as trade objects and precious gifts, and in the light of coin finds. The main trade routes of silk to Scandinavia along the Russian rivers, and comparable Russian finds are described and the production and regulation of silk in Persia, early Islamic production areas and the Byzantine Empire discussed. The final chapter considers silk as a social actor in various contexts in Viking societies compared to the Christian west.

Up-helly-aa Callum G. Brown,1998 Up-Helly-Aa is Europe's largest and most spectacular winter fire festival. In the biting Arctic wind on the last Tuesday of every January, a Guizer Jarl leads one thousand men in guising costumes with flaming torches through the streets of Lerwick, the capital of the Shetland Isles, accompanying a Viking galley to its ceremonial burning.

Wisconsin Richard Nelson Current,2001 A haven for summer tourists and winter sport enthusiasts, Wisconsin is famed for its physical beauty and its prodigious production of cheese and dairy products. Richard Nelson Current's compact history reveals the colorful past of America's Dairyland, from early explorers and gangsters to sports heroes and cheeseheads. Both the Ringling Brothers' World's Greatest Shows and Barnum & Bailey's Greatest Show on Earth originated in Wisconsin, along with the typewriter, Johnson's Wax, and the first automatic assembly line (for manufacturing automobile frames). Wisconsin inventors contributed to the mechanization of American farms by developing harvesters, reapers, cultivators, threshers, and other machinery. Sen. Robert M. (Fighting Bob) La Follette brought progressive reform to the state; a few decades later another Wisconsin native, Joseph McCarthy, revealed his agenda as a U.S. senator. The Gideons, who place Bibles in hotel room nightstands, got their start in Wisconsin, and the state's factories produced most of the 107 steam shovels that dug the Panama Canal. Even before American Motors in Kenosha became Wisconsin's largest employer, Wisconsinites were responsible for such car-related developments as the first four-wheel-drive vehicle and an early tire-patching kit. To football fans, the capital of Wisconsin is Green Bay, where in 1919 Earl Louis Lambeau organized the Packers. Even during the team's fifteen-year losing streak, Green Bay consisted, as one reporter observed, of nearly 50,000 wild-eyed maniacs [who] know more about football than any other 50,000 people on the face of the earth. Fast-paced and entertaining, Current's history chronicles how Wisconsin's homegrown ideas, from the Wisconsin Idea of efficient state government to ski-tows and speedometers, made their way into the broader marketplace of American culture.

High Speed Catamarans and Multihulls Liang Yun,Alan Bliault,Huan Zong Rong,2018-10-29 High speed catamaran and multihull high speed marine vessel have become very popular in the last two decades. The catamaran has become the vessel of choice for the majority of high speed ferry operators worldwide. There have been significant advances in structural materials, and structural design has been combined with higher power density and fuel efficient engines to deliver ferries of increasing size. The multihull has proven itself to be a suitable configuration for active power projection across oceans as well as for coastal patrol and protection, operating at high speedd for insertion or retrieval with a low energy capability. At present there is no easily accessible material covering the combination of hydrodynamics, aerodynamics, and design issues including structures, powering and propulsion for these vehicles. Coverage in High Speed Catamarans and Multihulls includes an introduction to the history, evolution, and development of catamarans, followed by a theoretical calculation of wave resistance in shallow and deep water, as well as the drag components of the multihull. A discussion of vessel concept design describing design characteristics, empirical regression for determination of principal dimensions in preliminary design, general arrangement, and methods is also included. The book concludes with a discussion of experimental future vehicles currently in development including the small waterplane twin hull vessels, wave piercing catamarans, planing catamarans, tunnel planing catamarans and other multihull vessels.

XXV Olympiad George Constable,2015-11-18 XXV Olympiad, the twenty-third volume in The Olympic Century series, begins with the story of the Barcelona Summer Games of 1992. The Barcelona Games were the first without boycotts since 1972, and played host to a wealth of nations participating for the first time.The book explores how the Barcelona Games reflected a rapidly changing world. With the devolution of the Soviet Union in 1991, Barcelona played host to teams from the Baltic States and to a e;Unified Teame; made up of athletes from the former Soviet republics. The former member states of Yugoslavia participated as independent nations, and South Africa was welcomed back into the Olympic fold for the first time since 1960. The book also profiles heroes of Barcelona like the Chinese diver Fu Mingxia, who became the youngest-ever Olympic gold medalist at age 13; and Vitaly Scherbo of Belarus, who won four golds in artistic gymnastics in a single day.Following Barcelona, the book turns its focus to the 1994 Winter Games in Lillehammer, Norway, the first Winter Games not held in the same year as the Summer Games. Lillehammer featured aerial skiing as a full event for the first time, and saw Australia win its first ever Winter Olympic medal. The book also tells the story of the drama swirling around the women's figure skating competition, where Americans Nancy Kerrigan and Tonya Harding battled with eventual gold-medal winner Oksana Baiul of Ukraine.Juan Antonio Samaranch, former President of the International Olympic Committee, called The Olympic Century, e;The most comprehensive history of the Olympic games ever publishede;.
