Codex Canadensis and the Writings of Louis Nicolas François-Marc Gagnon,2011-09-29 Part art, part science, part anthropology, this ambitious project presents an early Canadian perspective on natural history that is as much artistic and fantastical as it is encyclopedic. Edited and introduced by François-Marc Gagnon,

The Codex Canadensis and the Writings of Louis Nicolas showcases an intriguing attempt to document the life of the new world - flora, fauna, and aboriginal. The book brings together for the first time the illustrated Codex Canadensis and The Natural History of the New World, following Gagnon's argument that both can be attributed to Louis Nicolas, a French Jesuit priest who travelled throughout Canada between 1664 and 1675. *Histoire Naturelle des Indes Occidentales*, originally written in classical French, has been put in modern French by Réal Ouellet and translated into English by Nancy Senior. The Natural History presents a pre-Linnaean botany and pre-Darwinian account of living things, including hundreds of species of plants and vivid descriptions of wildlife. It is thoroughly annotated, focusing on the contemporary identification of species, as the result of a pan-Canadian collaboration of experts in fields from linguistics to biology and botany. The Codex Canadensis, currently in the collection of the Gilcrease Museum in Tulsa, Oklahoma, is reproduced in full and provides both a fascinating visual account of wildlife as Nicolas saw it and a rare example of early Canadian art. Gagnon's introduction profiles Louis Nicolas and analyses connections between his work and European examples of natural

illustration from the period. The Codex Canadensis and the Writings of Louis Nicolas shows how the wildlife and native inhabitants of the new world were understood and documented by a seventeenth-century European and makes available fundamental documents in the history and visual culture of early North America.

When Lissa Yellow Bird was released from prison in 2009, she found her home, the Fort Berthold Indian Reservation in North Dakota, transformed by the Bakken oil boom. In her absence, the landscape had been altered beyond recognition, her tribal government swayed by corporate interests, and her community burdened by a surge in violence and addiction. Three years later, when Lissa learned that a young white oil worker, Kristopher “KC” Clarke, had disappeared from his reservation worksite, she became particularly concerned. No one knew where Clarke had gone, and few people were actively looking for him. Yellow Bird traces Lissa’s steps as she obsessively hunts for clues to Clarke’s disappearance. She navigates two worlds—that of her own tribe, changed by its newfound wealth, and that of the non-Native oilmen, down on their luck, who have come to find work on the heels of the economic recession. Her pursuit of Clarke is also a pursuit of redemption, as Lissa atones for her own crimes and reckons with generations of trauma. Yellow Bird is an exquisitely written, masterfully reported story about a search for justice and a

remarkable portrait of a complex woman who is smart, funny, eloquent, compassionate, and—when it serves her cause—manipulative. Drawing on eight years of immersive investigation, Sierra Crane Murdoch has produced a profound examination of the legacy of systematic violence inflicted on a tribal nation and a tale of extraordinary healing.
