Electric and Hybrid Cars Curtis D. Anderson, Judy Anderson, 2010-03-30 This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

What Parish Are You From? Eileen M. McMahon, 2014-07-11 For Irish Americans as well as for Chicago's other ethnic groups, the local parish once formed the nucleus of daily life. Focusing on the parish of St. Sabina's in the southwest Chicago neighborhood of Auburn-Gresham, Eileen McMahon takes a penetrating look at the response of Catholic ethnics to life in twentieth-century America. She reveals the role the parish church played in achieving a cohesive and vital ethnic neighborhood and shows how ethno-religious distinctions gave way to racial differences as a central point of identity and conflict. For most of this century the parish served as an important mechanism for helping Irish Catholics cope with a dominant Protestant-American culture. Anti-Catholicism in the society at large contributed to dependency on parishes and to a desire for separateness from the American mainstream. As much as Catholics may have wanted to insulate themselves in their parish communities, however, Chicago demographics and the fluid nature of the larger society made this ultimately impossible. Despite efforts at integration attempted by St. Sabina's liberal clergy, white parishioners viewed black migration into their neighborhood as a threat to their way of life and resisted it even as they relocated to the suburbs. The transition from white to black neighborhoods and parishes is a major theme of twentieth-century urban history. The experience of St. Sabina's, which changed from a predominantly Irish parish to a vibrant African-American Catholic community, provides insights into this social trend and suggests how the interplay between faith and ethnicity contributes to a resistance to change.

When Computers Were Human David Alan Grier, 2013-11-01 Before Palm Pilots and iPods, PCs and laptops, the term computer referred to the people who did scientific calculations by hand. These workers were neither calculating geniuses nor idiot savants but knowledgeable people who, in other circumstances, might have become scientists in their own right. When Computers Were Human represents the first in-depth account of this little-known, 200-year epoch in the history of science and technology. Beginning with the story of his own grandmother, who was trained as a human computer, David Alan Grier provides a poignant introduction to the wider world of women and men who did the hard computational labor of science. His grandmother's casual remark, I wish I'd used my calculus, hinted at a career deferred and an education forgotten, a secret life unappreciated; like many highly educated women of her generation, she studied to become a human computer because nothing else would offer her a place in the scientific world. The book begins with the return of Halley's comet in 1758 and the effort of three French astronomers to compute its orbit. It ends four cycles later, with a UNIVAC electronic computer projecting the 1986 orbit. In between, Grier tells us about the surveyors of the French Revolution, describes the calculating machines of Charles Babbage, and guides the reader through the Great Depression to marvel at the giant computing room of the Works Progress Administration. When Computers Were Human is the sad but lyrical story of workers who gladly did the hard labor of research calculation in the hope that they might be part of the scientific community. In the end, they were rewarded by a new electronic machine that took the place and the name of those who were, once, the computers.

American Holocaust David E. Stannard, 1993-11-18 For four hundred years--from the first Spanish assaults against the Arawak people of Hispaniola in the 1490s to the U.S. Army's massacre of Sioux Indians at Wounded Knee in the 1890s--the indigenous inhabitants of North and South America endured an unending firestorm of violence. During that time the native population of the Western Hemisphere declined by as many as 100 million people. Indeed, as historian David E. Stannard argues in this stunning new book, the European and white American destruction of the native peoples of the Americas was the most massive act of genocide in the history of the world. Stannard begins with a portrait of the enormous richness and diversity of life in the Americas prior to Columbus's fateful voyage in 1492. He then follows the path of genocide from the Indies to Mexico and Central and South America, then north to Florida, Virginia, and New England, and finally out across the Great Plains and Southwest to California and the North Pacific Coast. Stannard reveals that wherever Europeans or white Americans went, the native people were caught between imported plagues and barbarous atrocities, typically resulting in the annihilation of 95 percent of their populations. What kind of people, he asks, do such horrendous things to others? His highly provocative answer: Christians. Digging deeply into ancient European and Christian attitudes toward sex, race, and war, he finds the cultural ground well prepared by the end of the Middle Ages for the centuries-long genocide campaign that Europeans and their descendants launched--and in places continue to wage--against the New World's original inhabitants. Advancing a thesis that is sure to create much controversy, Stannard contends that the perpetrators of the American Holocaust drew on the same ideological wellspring as did the later architects of the Nazi Holocaust. It is an ideology that remains dangerously alive today, he adds, and one that in recent years has surfaced in American justifications for large-scale military intervention in Southeast Asia and the Middle East. At once sweeping in scope and meticulously detailed, American Holocaust is a work of impassioned scholarship that is certain to ignite intense historical and moral debate.

The Year's Best Science Fiction: Nineteenth Annual Collection Gardner Dozois, 2002-07-23 The twenty-first century has so far proven to be exciting and wondrous and filled with challenges we had never dreamed. New possibilities previously unimagined appear almost daily . . . and science fiction stories continue to explore those possibilities with delightful results: Collected in this anthology are such compelling stories as: On K2 with Kanakaredes by Dan Simmons. A relentlessly paced and absorbing tale set in the near future about three mountain climbers who must scale the face of K2 with some very odd company. The Human Front by Ken MacLeod. In this compassionate coming-of-age tale the details of life are just a bit off from things as we know them-and nothing is as it appears to be. Glacial by Alastair Reynolds. A fascinating discovery on a distant planet leads to mass death and a wrenching mystery as spellbinding as anything in recent short fiction. The twenty-six stories in this collection imaginatively takes us far across the universe, into the very core of our beings, to the realm of the gods, and the moment just after now. Included here are the works of masters of the form and of bright new talents, including: Eleanor Arnason Chris Beckett Michael Blumlein Michael Cassutt Brenda W. Clough Paul Di Filippo Andy Duncan Carolyn Ives Gilman Jim Grimsley Simon Ings James Patrick Kelly Leigh Kennedy Nancy Kress Ian R. MacLeod Ken MacLeod Paul J. McAuley Maureen F. McHugh Robert Reed Alastair Reynolds Geoff Ryman William Sanders Dan Simmons Allen M. Steele Charles Stross Michael Swanwick Howard Waldrop Supplementing the stories are the editor's insightful summation of the year's events and a lengthy list of honorable mentions, making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart.

Managing Cover Crops Profitably (3rd Ed.) Andy Clark, 2008-07 Cover crops slow erosion, improve soil, smother weeds, enhance nutrient and moisture availability, help control many pests and bring a host of other benefits to your farm. Made to Break Giles Slade, 2009-06-30 Made to Break is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

Crusade for Justice Ida B. Wells, 2020-04-17 The NAACP co-founder, civil rights activist, educator, and journalist recounts her public and private life in this classic memoir. Born to enslaved parents, Ida B. Wells was a pioneer of investigative journalism, a crusader against lynching, and a tireless advocate for suffrage, both for women and for African Americans. She co-founded the NAACP, started the Alpha Suffrage Club in Chicago, and was a leader in the early civil rights movement, working alongside W. E. B. Du Bois, Madam C. J. Walker, Mary Church Terrell, Frederick Douglass, and Susan B. Anthony. This engaging memoir, originally published 1970, relates Wells's private life as a mother as well as her public activities as a teacher, lecturer, and journalist in her fight for equality and justice. This updated edition includes a new foreword by Eve L. Ewing, new images, and a new afterword by Ida B. Wells's great-granddaughter, Michelle Duster. "No student of black history should overlook Crusade for Justice." —William M. Tuttle, Jr., Journal of American History

The role of federal military forces in domestic disorders, 1877-1945 Clayton D. Laurie, 1997-07-15 CMH 30-15. Army Historical Series. 2nd of three planned volumes on the history of Army domestic support operations. This volume encompasses the period of the rise of industrial America with attendant social dislocation and strife. Major themes are: the evolution of the Army's role in domestic support operations; its strict adherence to law; and the disciplined manner in which it conducted these difficult and often unpopular operations.

Washington's Farewell Address to the People of the United States, 1796 George Washington, 1913

The Other Wes Moore Wes Moore, 2011-01-11 NEW YORK TIMES BESTSELLER • From the governor-elect of Maryland, the "compassionate" (People), "startling" (Baltimore Sun), "moving" (Chicago Tribune) true story of two kids with the same name from the city: One went on to be a Rhodes Scholar, decorated combat veteran, White House Fellow, and business leader. The other is serving a life sentence in prison. Selected by Stephen Curry as his "Underrated" Book Club Pick with Literati The chilling truth is that his story could have been mine. The tragedy is that my story could have been his. In December 2000, the Baltimore Sun ran a small piece about Wes Moore, a local student who had just received a Rhodes Scholarship. The same paper also ran a series of articles about four young men who had allegedly killed a police officer in a spectacularly botched armed robbery. The police were still hunting for two of the suspects who had gone on the lam, a pair of brothers. One was named Wes Moore. Wes just couldn't shake off the unsettling coincidence, or the inkling that the two shared much more than space in the same newspaper. After following the story of the robbery, the manhunt, and the trial to its conclusion, he wrote a letter to the other Wes, now a convicted murderer serving a life sentence without the possibility of parole. His letter tentatively asked the questions that had been haunting him: Who are you? How did this happen? That letter led to a correspondence and relationship that have lasted for several years. Over dozens of letters and prison visits, Wes discovered that the other Wes had had a life not unlike his own: Both had had difficult childhoods, both were fatherless; they'd hung out on similar corners with similar crews, and both had run into trouble with the police. At each stage of their young lives they had come across similar moments of decision, yet their choices would lead them to astonishingly different destinies. Told in alternating dramatic narratives that take readers from heart-wrenching losses to moments of surprising redemption, The Other Wes Moore tells the story of a generation of boys trying to find their way in a hostile world.

Structures or Why things don't fall down J. Gordon, 2012-12-06 I am very much aware that it is an act of extreme rashness to attempt to write an elementary book about structures. Indeed it is only when the subject is stripped of its mathematics that one begins to realize how difficult it is to pin down and describe those structural concepts which are often called 'elementary'; by which I suppose we mean 'basic' or 'fundamental'. Some of the omissions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject. Although this volume is more or less a sequel to The New Science of Strong Materials it can be read as an entirely separate book in its own right. For this reason a certain amount of repetition has been unavoidable in the earlier chapters. I have to thank a great many people for factual information, suggestions and for stimulating and sometimes heated discussions. Among the living, my colleagues at Reading University have been generous with help, notably Professor W. D. Biggs (Professor of Building Technology), Dr Richard Chaplin, Dr Giorgio Jeronimidis, Dr Julian Vincent and Dr Henry Blyth; Professor Anthony Flew, Professor of Philosophy, made useful suggestions about the last chapter. I am also grateful to Mr John Bartlett, Consultant Neurosurgeon at the Brook Hospital. Professor T. P. Hughes of the University of the West Indies has been helpful about rockets and many other things besides. My secretary, Mrs Jean Collins, was a great help in times of trouble. Mrs Nethercot of Vogue was kind to me about dressmaking. Mr Gerald Leach and also many of the editorial staff of Penguins have exercised their accustomed patience and helpfulness. Among the dead, I owe a great deal to Dr Mark Pryor - lately of Trinity College, Cambridge - especially for discussions about biomechanics which extended over a period of nearly thirty years. Lastly, for reasons which must surely be obvious, I owe a humble oblation to Herodotus, once a citizen of Halicarnassus.

Measuring Biological Diversity Anne E. Magurran, 2013-04-18 This accessible and timely book provides a comprehensive overview of how to measure biodiversity. The book highlights new developments, including innovative approaches to measuring taxonomic distinctness and estimating species richness, and evaluates these alongside traditional methods such as species abundance distributions, and diversity and evenness statistics. Helps the reader quantify and interpret patterns of ecological diversity, focusing on the measurement and estimation of species richness and abundance. Explores the concept of ecological diversity, bringing new perspectives to a field beset by contradictory views and advice. Discussion spans issues such as the meaning of community in the context of ecological diversity, scales of diversity and distribution of diversity among taxa Highlights advances in measurement paying particular attention to new techniques such as species richness estimation, application of measures of diversity to conservation and environmental management and addressing sampling issues Includes worked examples of key methods in helping people to understand the techniques and use available computer packages more effectively

Building Shanghai Edward Denison, Guang Yu Ren, 2013-12-20 Shanghai's illustrious history and phenomenal future is celebrated in this book, which examines the

evolution of the city's architecture and urban form in order to contextualise the challenges facing the city today. The physical legacies that reflect Shanghai's uniqueness historically and contemporarily are examined chronologically using specific case studies of exemplary architecture interwoven in a compelling narrative that unlocks the many mysteries surrounding this amazing metropolis. Some of the most influential colonial architecture in the world, outstanding examples of Modernism and Art Deco, and an exceptional selection of eclectic and vernacular architecture reflecting Shanghai's many adopted cultures are revealed. This is the first book ever to examine this remarkable subject in a manner that is both comprehensive and captivating in its written content and stunningly illustrated with over 300 archive and contemporary photographs and maps.
