**Twelve Years a Slave** Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Tacky Rax King,2021-11-02 An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column Store-Bought Is Fine” Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to good taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in You Wanna Be On Top, Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. The PLA's Unmanned Aerial Systems - New Capabilities for a New Era of Chinese Military Power Elsa B. Kania,2018-08-10 The Chinese People's Liberation Army (PLA) continues to work diligently on all aspects of their aerospace forces. This includes areas not only of traditional aircraft, but also in more modern, and some cutting edge, technologies. The UAV is one area in which the People's Republic of China, and the PLA in specific, has invested significant time and effort. While we recognize that the term unmanned is the common and official term, it is rather misleading in the fact that humans, at least up until today, still play a critical role in their operations. Nonetheless, we will not buck convention at this moment, and continue to use unmanned for the 'U' in UAV, for this paper. The PRC is the world's largest producer of UAVs at this time, and captures a vast portion of the commercial market, as well as the military one. While it is important to keep the commercial aspects in mind, this particular paper will focus on military UAVs, their development, deployments, and current and potential uses on the battlefield of today and tomorrow. The paper seeks to serve as a starting point to understand this growing field, and to give analysts a common baseline from which to work, and from which to judge growth, both rapidity and complexity, in the future.

**Angels and Demons in Art** Rosa Giorgi,2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

Brigadization of the PLA Air Force Lawrence "Sid" Trevethan,2018-05 In 2016, China's People's Liberation Army (PLA) began to implement its 11th large-scale reorganization, including a 300,000-man force reduction. One key component of the reorganization was the PLA Air Force's (PLAAF) shift away from its traditional Division-Regiment system to a Base-Brigade structure for its fighter and ground attack aircraft. This transition originally began in 2011 but implementation was apparently delayed soon after it began and did not restart until 2017. This paper discusses the evolution of the PLAAF's fighter and ground attackcombat aircraft units and flight colleges to a brigade structure.

*Modern Chinese Warplanes: Chinese Air Force - Combat Aircraft and Units* Andreas Rupprecht,2018-12-19 In 2012 the original Modern Chinese Warplanes set the standard as a uniquely compact yet comprehensive directory of modern Chinese air power, combining magnificent illustrations and in-depth analysis. Now almost six years later, much of the fascination that Chinese military aviation holds for the analyst and enthusiast still stems from the thick veil of secrecy that surrounds it. However, in the time that has passed since the first edition a plethora of new types, systems and weapons has been revealed. What is more, the structure of the People's Liberation Army Air Force (PLAAF) has been completely revised by transforming the former Military Regions into Theatre Commands. In parallel, the general structure has been thoroughly modernized to cope with China's latest challenges.Consequently, this fully revised edition is organized in three parts: the most important military aircraft and their weapons found in service today; aircraft markings and serial number systems; and orders of battle for the PLAAF. The study includes the latest developments emerging from behind the 'Great Wall', including the J-20 stealth fighter program, Y-20 strategic transport and the latest developments in UAVs that are equipping a rapidly modernizing air arm. The centerpiece consists of almost 100 fully illustrated pages detailing the organizational structure of the air force, providing an easy-to-use review of all known flying units, their equipment and their markings. No other book has ever attempted to present this level of accuracy in this way: Modern Chinese Air Power portrays the PLAAF in a degree of detail that was previously unavailable.
