Guns, Democracy, and the Insurrectionist Idea Joshua

Horwitz, Casey Anderson, 2018-05-09 The NRA steadfastly maintains that the 30,000 gun-related deaths and 300,000 assaults with firearms in the United States every year are a small price to pay to guarantee freedom. As former NRA President Charlton Heston put it, freedom isn't free. And when gun enthusiasts talk about Constitutional liberties guaranteed by the Second Amendment, they are referring to freedom in a general sense, but they also have something more specific in mind--- freedom from government oppression. They argue that the only way to keep federal authority in check is to arm individual citizens who can, if necessary, defend themselves from an aggressive government. In the past decade, this view of the proper relationship between government and individual rights and the insistence on a role for private violence in a democracy has been co-opted by the conservative movement. As a result, it has spread beyond extreme militia groups to influence state and national policy. In *Guns, Democracy, and the Insurrectionist Idea*, Josh Horwitz and Casey Anderson reveal that the proponents of this view base their argument on a deliberate misreading of history. The Insurrectionist myth has been forged by twisting the facts of the American Revolution and the founding of the United States, the denial of civil rights to African-Americans after the Civil War, and the rise of the Third Reich under Adolf Hitler. Here, Horwitz and Anderson set the record straight. Then, challenging the proposition that more guns equal more freedom, they expose Insurrectionism---not government oppression---as the true threat to freedom in the U.S. today. Joshua Horwitz received a law degree from George Washington University and is currently a visiting scholar at the Johns Hopkins Bloomberg School of Public Health. He is Executive Director of the Coalition to Stop Gun Violence and the Educational Fund to Stop Gun Violence. He has spent nearly two decades working on gun violence prevention issues. He lives

in Arlington, Virginia. Casey Anderson holds a law degree from Georgetown University and is currently a lawyer in private practice in Washington, D.C. He has served in senior staff positions with the U.S. Congress, the Coalition to Stop Gun Violence, and Americans for Gun Safety. He lives in Arlington, Virginia.

Little by Little Rich Little, 2017-01-25 "How did I become an impersonator? Perhaps my mother was conceived by a Zerox machine!" So, how did a kid from Ottawa, Canada, growing up in the '50s become an impressionist? No one in our family had ever been in show business. No one ever had "show biz" yearnings. My father was a doctor. My mother was a housewife. So where did my desire to become an impressionist come from? I've often asked myself this question. I didn't know the answer, but I did love the movies. As a boy, I would go every weekend, sometimes staying to see the show twice. Just going to the movies and getting so involved in the storytelling and the characters made me want to be that person up on the screen, never dreaming that I could turn it into a career. The glory days of Hollywood and their icons, like no other, have remained as indelible images in our hearts and minds for decades. I, like many, idolized these giants of the screen and comedy, but was so fortunate to have had the opportunity to meet, work with, and get to know many of them along the way during my career. From the genius of Jack Benny, the unmatched humor of George Burns, the debonair, handsome Cary Grant, the unforgettable John Wayne, the king of late night hosts Johnny Carson, and the former actor-turned-president Ronald Reagan to name a few. In this gem of a book are insights into the likes of many of these great people I've had the privilege and fortune to meet and imitate, shining new light on our beloved stars. This is really not a biography, but more of a humorous glimpse of the people I've impersonated and some of the funny stories that happened along the way.

Corcoran Gallery of Art Corcoran Gallery of Art, Sarah Cash, Emily Dana Shapiro, Jennifer Carson, 2011 This authoritative

catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

Psychological Testing and Assessment Ronald Jay Cohen, 2022

Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. **Communities in Action: Pathways to Health Equity** seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Founder's Dilemmas Noam Wasserman, 2013-04 The **Founder's Dilemmas** examines how early decisions by entrepreneurs can make or break a startup and its team. Drawing

on a decade of research, including quantitative data on almost ten thousand founders as well as inside stories of founders like Evan Williams of Twitter and Tim Westergren of Pandora, Noam Wasserman reveals the common pitfalls founders face and how to avoid them.

Wikinomics Don Tapscott, Anthony D. Williams, 2008-04-17
The acclaimed bestseller that's teaching the world about the power of mass collaboration. Translated into more than twenty languages and named one of the best business books of the year by reviewers around the world, Wikinomics has become essential reading for business people everywhere. It explains how mass collaboration is happening not just at Web sites like Wikipedia and YouTube, but at traditional companies that have embraced technology to breathe new life into their enterprises. This national bestseller reveals the nuances that drive wikinomics, and share fascinating stories of how masses of people (both paid and volunteer) are now creating TV news stories, sequencing the human genome, remixing their favorite music, designing software, finding cures for diseases, editing school texts, inventing new cosmetics, and even building motorcycles.

Pandemic Exposures Fassin Didier, Marion Fourcade, 2021-11
An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds with the pursuit of economic and social life. Yet this naive alternative belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the

pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath.

Disability and Christian Theology Embodied Limits and Constructive Possibilities Deborah Beth Creamer, 2009-01-05
Attention to embodiment and the religious significance of bodies is one of the most significant shifts in contemporary theology. In the midst of this, however, experiences of disability have received little attention. This book explores possibilities for theological engagement with disability, focusing on three primary alternatives: challenging existing theological models to engage with the disabled body, considering possibilities for a disability liberation theology, and exploring new theological options based on an understanding of the unsurprisingness of human limits. The overarching perspective of this book is that limits are an unavoidable aspect of being human, a fact we often seem to forget or deny. Yet not only do all humans experience limits, most of us also experience limits that take the form of disability at some point in our lives; in this way, disability is more normal than non-disability. If we take such experiences seriously and refuse to reduce them to mere instances of suffering, we discover insights that are lost when we take a perfect or generic body as our starting point for theological reflections. While possible applications of this insight are vast, this work focuses on two areas of particular interest: theological anthropology and metaphors for God. This project challenges theology to consider the undeniable diversity of human embodiment. It also enriches previous disability work by providing an alternative to the dominant medical and minority models, both of which fail to acknowledge the full diversity of disability experiences. Most notably, this project offers new images and possibilities for theological construction that attend appropriately and creatively to diversity in human embodiment.

The Death Penalty Brandon Garrett, Lee Kovarsky, 2018

Softbound - New, softbound print book.

The Sciences of the Artificial, reissue of the third edition with a new introduction by John Laird Herbert A. Simon, 2019-08-13

Herbert Simon's classic work on artificial intelligence in the expanded and updated third edition from 1996, with a new introduction by John E. Laird. Herbert Simon's classic and influential *The Sciences of the Artificial* declares definitively that there can be a science not only of natural phenomena but also of what is artificial. Exploring the commonalities of artificial systems, including economic systems, the business firm, artificial intelligence, complex engineering projects, and social plans, Simon argues that designed systems are a valid field of study, and he proposes a science of design. For this third edition, originally published in 1996, Simon added new material that takes into account advances in cognitive psychology and the science of design while confirming and extending the book's basic thesis: that a physical symbol system has the necessary and sufficient means for intelligent action. Simon won the Nobel Prize for Economics in 1978 for his research into the decision-making process within economic organizations and the Turing Award (considered by some the computer science equivalent to the Nobel) with Allen Newell in 1975 for contributions to artificial intelligence, the psychology of human cognition, and list processing. *The Sciences of the Artificial* distills the essence of Simon's thought accessibly and coherently. This reissue of the third edition makes a pioneering work available to a new audience.

Westward into Kentucky Chester Raymond

Young, 2021-12-14 In his youth Daniel Trabue (1760–1840) served as a Virginia soldier in the Revolutionary War. After three years of service on the Kentucky frontier, he returned home to participate as a sutler in the Yorktown campaign. Following the war he settled in the Piedmont, but by 1785 his yearning to return westward led him to take his family to Kentucky, where they settled for a few

years in the upper Green River country. He recorded his narrative in 1827, in the town of Columbia, of which he was a founder. A keen observer of people and events, Trabue captures experiences of everyday life in both the Piedmont and frontier Kentucky. His notes on the settling of Kentucky touch on many important moments in the opening of the Bluegrass region.

Raising Her Voice Rodger Streitmatter, 2021-09-15 Each chapter is a biographical sketch of an influential black woman who has written for American newspapers or television news, including Maria W. Stewart, Mary Ann Shadd Cary, Gertrude Bustill Mossell, Ida B. Wells-Barnett, Josephine St. Pierre Ruffin, Delilah L. Beasley, Marvel Cooke, Charlotta A. Bass, Alice Allison Dunnigan, Ethel L. Payne, and Charlayne Hunter-Gault.

From Neurons to Neighborhoods National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Integrating the Science of Early Childhood Development, 2000-11-13 How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of expertise. The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about brain wiring and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child

care, community-within which the child grows.

The Improv Handbook Tom Salinsky, Deborah Frances-White, 2017-10-19 The Improv Handbook is the most comprehensive, smart, helpful and inspiring guide to improv available today. Applicable to comedians, actors, public speakers and anyone who needs to think on their toes, it features a range of games, interviews, descriptions and exercises that illuminate and illustrate the exciting world of improvised performance. First published in 2008, this second edition features a new foreword by comedian Mike McShane, as well as new exercises on endings, managing blind offers and master-servant games, plus new and expanded interviews with Keith Johnstone, Neil Mullarkey, Jeffrey Sweet and Paul Rogan. The Improv Handbook is a one-stop guide to the exciting world of improvisation. Whether you're a beginner, an expert, or would just love to try it if you weren't too scared, The Improv Handbook will guide you every step of the way.

The Meanings of Social Life Jeffrey C.

Alexander, 2003-09-18 In *The Meanings of Social Life*, Jeffrey Alexander presents a new approach to how culture works in contemporary societies. Exposing our everyday myths and narratives in a series of empirical studies that range from Watergate to the Holocaust, he shows how these unseen yet potent cultural structures translate into concrete actions and institutions. Only when these deep patterns of meaning are revealed, Alexander argues, can we understand the stubborn staying power of violence and degradation, but also the steady persistence of hope. By understanding the darker structures that restrict our imagination, we can seek to transform them. By recognizing the culture structures that sustain hope, we can allow our idealistic imaginations to gain more traction in the world. A work that will transform the way that sociologists think about culture and the social world, this book confirms Jeffrey Alexander's reputation as one of the major social theorists of our day.

The Archive and the Repertoire Diana Taylor, 2003-09-12 In

The Archive and the Repertoire preeminent performance studies scholar Diana Taylor provides a new understanding of the vital role of performance in the Americas. From plays to official events to grassroots protests, performance, she argues, must be taken seriously as a means of storing and transmitting knowledge. Taylor reveals how the repertoire of embodied memory—conveyed in gestures, the spoken word, movement, dance, song, and other performances—offers alternative perspectives to those derived from the written archive and is particularly useful to a reconsideration of historical processes of transnational contact. The Archive and the Repertoire invites a remapping of the Americas based on traditions of embodied practice. Examining various genres of performance including demonstrations by the children of the disappeared in Argentina, the Peruvian theatre group Yuyachkani, and televised astrological readings by Univision personality Walter Mercado, Taylor explores how the archive and the repertoire work together to make political claims, transmit traumatic memory, and forge a new sense of cultural identity. Through her consideration of performances such as Coco Fusco and Guillermo Gómez-Peña's show *Two Undiscovered Amerindians Visit . . .*, Taylor illuminates how scenarios of discovery and conquest haunt the Americas, trapping even those who attempt to dismantle them. Meditating on events like those of September 11, 2001 and media representations of them, she examines both the crucial role of performance in contemporary culture and her own role as witness to and participant in hemispheric dramas. The Archive and the Repertoire is a compelling demonstration of the many ways that the study of performance enables a deeper understanding of the past and present, of ourselves and others.

Making News at The New York Times Nikki

Usher, 2014-04-24 Making News at The New York Times is the first in-depth portrait of the nation's, if not the world's, premier newspaper in the digital age. It presents a lively chronicle of months spent in the newsroom observing daily conversations,

meetings, and journalists at work. We see Page One meetings, articles developed for online and print from start to finish, the creation of ambitious multimedia projects, and the ethical dilemmas posed by social media in the newsroom. Here, the reality of creating news in a 24/7 instant information environment clashes with the storied history of print journalism, and the tensions present a dramatic portrait of news in the online world. This news ethnography brings to bear the overarching value clashes at play in a digital news world. The book argues that emergent news values are reordering the fundamental processes of news production. Immediacy, interactivity, and participation now play a role unlike any time before, creating clashes between old and new. These values emerge from the social practices, pressures, and norms at play inside the newsroom as journalists attempt to negotiate the new demands of their work. Immediacy forces journalists to work in a constant deadline environment, an ASAP world, but one where the vaunted traditions of yesterday's news still appear in the next day's print paper. Interactivity, inspired by the new user-computer directed capacities online and the immersive Web environment, brings new kinds of specialists into the newsroom, but exacts new demands upon the already taxed workflow of traditional journalists. And at time where social media presents the opportunity for new kinds of engagement between the audience and media, business executives hope for branding opportunities while journalists fail to truly interact with their readers.

Health Psychology Shelley E. Taylor, 2006 Offering a balanced perspective, this text incorporates the latest research findings and statistics. It provides explanations of biological, psychological and social factors in health issues, reinforced with case studies.

The Search for the First Americans Robert V. Davis, 2023-03-07 Who were the First Americans? Where did they come from? When did they get here? Are they the ancestors of

modern Native Americans? These questions might seem straightforward, but scientists in competing fields have failed to convince one another with their theories and evidence, much less Native American peoples. The practice of science in its search for the First Americans is a flawed endeavor, Robert V. Davis tells us. His book is an effort to explain why. Most American history textbooks today teach that the First Americans migrated to North America on foot from East Asia over a land bridge during the last ice age, 12,000 to 13,000 years ago. In fact, that theory hardly represents the scientific consensus, and it has never won many Native adherents. In many ways, attempts to identify the first Americans embody the conflicts in American society between accepting the practical usefulness of science and honoring cultural values. Davis explores how the contested definition of First Americans reflects the unsettled status of Native traditional knowledge, scientific theories, research methodologies, and public policy as they vie with one another for legitimacy in modern America. In this light he considers the traditional beliefs of Native Americans about their origins; the struggle for primacy--or even recognition as science--between the disciplines of anthropology and archaeology; and the mediating, interacting, and sometimes opposing influences of external authorities such as government agencies, universities, museums, and the press. Fossil remains from Mesa Verde, Clovis, and other sites testify to the presence of First Americans. What remains unsettled, as *The Search for the First Americans* makes clear, is not only who these people were, where they came from, and when, but also the very nature and practice of the science searching for answers.
