Advanced French Grammar Monique L'Huillier, 1999-06-17

This 1999 reference grammar, written for advanced students of French, their teachers, and others who want a better understanding of the French language, combines the best of modern and traditional approaches. Its objective is not only practical mastery of the language, but familiarity with its structure. Taking into account modern linguistic research, Advanced French Grammar approaches the French language primarily through the study of syntactic structures, but without excessive emphasis on formalism. It provides a generous number of examples, based on the author's own experience of teaching French to English-speakers, to help the student to understand the different meanings of apparently similar syntactic alternatives. The norms of 'correct expression' are given together with current usage and deviations, and appendixes provide information on the 1990 spelling reforms and on numbers. A substantial index of French and English words and of topics provides easy access to the text itself.

The Structure of Modern Standard French Maj-Britt Mosegaard Hansen,2016 This book is an advanced student's grammar of French that integrates traditional grammar with knowledge and insights from modern linguistics. Maj-Britt Mosegaard Hansen takes a structural approach to French grammar: she provides clear descriptions of grammatical rules based explicitly on syntactic structure, and places descriptive emphasis on instances where the grammatical structures of French differ from those used in corresponding contexts in English. The first part of the book provides an introduction to French sentence structure, before the following parts examine the grammar of verbs, nominals, particles, and clauses and sentences. The Structure of Modern Standard French will be a valuable resource for students of French at undergraduate level and beyond. It assumes some prior knowledge of French grammar but is designed to be accessible to those with no background in linguistics.
