Habibi Craig Thompson, 2011-09-20 From the internationally acclaimed author of *Blankets* ("A triumph for the genre."—Library Journal), a highly anticipated new graphic novel. Sprawling across an epic landscape of deserts, harems, and modern industrial clutter, *Habibi* tells the tale of Dodola and Zam, refugee child slaves bound to each other by chance, by circumstance, and by the love that grows between them. We follow them as their lives unfold together and apart; as they struggle to make a place for themselves in a world (not unlike our own) fueled by fear, lust, and greed; and as they discover the extraordinary depth—and frailty—of their connection. At once contemporary and timeless, *Habibi* gives us a love story of astounding resonance: a parable about our relationship to the natural world, the cultural divide between the first and third worlds, the common heritage of Christianity and Islam, and, most potently, the magic of storytelling.

Truths, Half Truths and Little White Lies Nick Frost, 2015-10-08 'If I'm going to tell the story of a life, my life, then I need to tell it warts and all. If the tale is too saccharine sweet then what can the reader take away from it? What do they learn about you? I've written everything down. The shit, the death, fun, naughtiness, addiction, laughter, laughter, laughter, some tears and lots of love and happiness. That to me is a better reflection of a human's life.' Nick's family life was difficult, blighted by alcoholism, illness and sudden misfortune meaning they lost everything overnight. He left school early and drifted from job to job dogged by his own personal demons. It's something of a miracle that Nick survived and even more that he would achieve such success with his writing, acting and comedy. In *Truths, Half Truths and Little White Lies* Nick paints a brilliantly funny, moving and brutally candid portrait of childhood, adolescence and eventual success.

Masters of the Ninth Art Matthew Screech, 2005-01-01 In English-speaking countries, Francophone comic strips like Hergé's *Les Aventures de Tin Tin* and Goscinny and Uderzo's *Les Aventures d'Asterix* are viewed—and marketed—as children's literature. But in Belgium and France, their respective countries of origin, such strips—known as *bandes dessinées*—are considered a genuine art form, or, more specifically, the ninth art. But what accounts for the drastic difference in the way such comics are received? In *Masters of the Ninth Art*, Matthew Screech explores that difference in the reception and reputation of *bandes dessinées*. Along with in-depth looks at Tin Tin and Asterix, Screech considers other major comics artists such as Jacque Tardi, Jean Giraud, and Moebius, assessing in the process their role in Francophone literary and artistic culture. Illustrated with images from the artists discussed, *Masters of the Ninth Art* will appeal to students of European popular culture, literature, and graphic art.

Crogan's Vengeance Chris Schweizer, 2008-10-22 The debut volume in an ongoing series of historical adventures focusing on the various branches of the fictional Crogan Family Tree. In *CROGAN'S VENGEANCE*, Catfoot Crogan is an able-bodied mariner plying his trade for a dastardly legitimate captain with a grudge against Crogan for a slight committed well before he was born. But when his ship is taken by pirates, will Crogan stay loyal to his law-abiding, if despicable, captain or will he find a new life on the high seas living by the Pirate's Code?

Tintin and the Secret of Literature Tom McCarthy, 2008-03-03 Arguing that the Tintin books' characters are as strong and their plots as complex as any dreamed up by the great novelists, Tom McCarthy asks a simple question: Is Tintin literature? Taking a cue from Tintin himself – who spends much of his time tracking down illicit radio signals, entering crypts, and decoding puzzles – McCarthy suggests that we too need to tune in and decode if we want to capture what's going on in Hergé's extraordinarily popular work. What emerges from McCarthy's examination of Tintin is a remarkable story of illegitimacy and deceit, in both Hergé's work and his own family history. McCarthy's irresistibly clever, tightly constructed book shows how the themes Tintin generates – expulsion from home, violation of the sacred, the host–guest relationship turned sour, and anxieties around questions of forgery and fakes – are the same that have fueled and troubled writers from the classical era to the present day.

Comics as Philosophy Jeff McLaughlin, 2005 Through the combination of text and images, comic books offer a unique opportunity to explore deep questions about aesthetics, ethics, and epistemology in nontraditional ways. The essays in this collection focus on a wide variety of genres, from mainstream superhero comics, to graphic novels of social realism, to European adventure classics. Included among the contributions are essays on existentialism in Daniel Clowes's graphic novel *Ghost World*, ecocriticism in Paul Chadwick's long-running *Concrete* series, and political philosophies in Hergé's perennially popular *The Adventures of Tintin*. Modern political concerns inform Terry Kading's discussion of how superhero comics have responded to 9/11 and how the genre reflects the anxieties of the contemporary world. Essayists also explore the issues surrounding the development and appreciation of comics. Amy Kiste Nyberg examines the rise of the Comics Code, using it as a springboard for discussing the ethics of censorship and child protection in America. Stanford W. Carpenter uses interviews to analyze how a team of Marvel artists and writers reimagined the origin of one of Marvel's most iconic superheroes, Captain America. Throughout, essayists in *Comics as Philosophy* show how well the form can be used by its artists and its interpreters as a means of philosophical inquiry. Jeff McLaughlin is assistant professor of philosophy at Thompson Rivers University in Kamloops, British Columbia.

The Adventures of Hergé Jose-Louis Bocquet, Jean-Luc Fromental, 2011-12-06 A GRAPHIC BIOGRAPHY OF TINTIN'S CREATOR by Jose-Louis Bocquet and Jean-Luc Fromental, Illustrated by Stanislas Barthélémy The *Adventures of Hergé* is a biographical comic about the world-renowned comics artist Georges Prosper Remi, better known by his pen name, Hergé. Meticulously researched, with references to many of the Tintin albums and complete with a bibliography and mini-bios for each of the main characters, the biography is appropriately drawn in Hergé's iconic clear line style as an homage to the Tintin adventures that have commanded the attention of readers across the world and of many generations. Seven-year-old Hergé first discovered his love of drawing in 1914 when his mother gave him some crayons to stay out of trouble. He continued drawing in school when he fatefully met the editor of *XXe Siècle* magazine, where Tintin first appeared. His popularity skyrocketed from the 1930s through post-World War Two. Hergé

was perceived by some to have aided the Nazi government in Belgium by continuing to publish Tintin in a government-sanctioned magazine, and he was briefly imprisoned in the aftermath of the war and narrowly escaped execution. Also covered are his marriage troubles in the 1950s and subsequent affair with Fanny Vlamynck, who went on to become his lifelong partner; his late career in the 1960s, as his interest in Tintin waned and he occasionally disappeared for weeks at a time as he contemplated giving up his career to become a fine-arts painter; and a recounting of a humorous encounter with Andy Warhol.

Red Rackham's Treasure Hergé, 2012 Hergé's classic comic book creation Tintin is one of the most iconic characters in children's books. These highly collectible editions of the original 24 adventures will delight Tintin fans old and new. Perfect for lovers of graphic novels, mysteries and historical adventures. The world's most famous travelling reporter sets out in search of Red Rackham's treasure. Determined to find the treasure of the notorious pirate Red Rackham, Tintin and Captain Haddock set sail aboard the Sirius to find the shipwreck of the Unicorn. With the help of an ingenious shark-shaped submarine, Tintin follows the clues deep down on this ocean adventure. The Adventures of Tintin are among the best books for readers aged 8 and up. Hergé (Georges Remi) was born in Brussels in 1907. Over the course of 54 years he completed over 20 titles in The Adventures of Tintin series, which is now considered to be one of the greatest, if not the greatest, comics series of all time. Have you collected all 24 graphic novel adventures? Fabricating Modern Societies: Education, Bodies, and Minds in the Age of Steel, 2019-09-02 Fabricating Modern Societies: Education, Bodies, and Minds in the Age of Steel, edited by Karin Priem and Frederik Herman, offers new interdisciplinary and transnational perspectives on the history of industrialization and societal transformation in early twentieth-century Luxembourg. The individual chapters focus on how industrialists addressed a large array of challenges related to industrialization, borrowing and mixing ideas originating in domains such as corporate identity formation, mediatization, scientification, technological innovation, mechanization, capitalism, mass production, medicalization, educationalization, artistic production, and social utopia, while competing with other interest groups who pursued their own goals. The book looks at different focus areas of modernity, and analyzes how humans created, mediated, and interacted with the technospheres of modern societies. Contributors: Klaus Dittrich, Irma Hadzalic, Frederik Herman, Enric Novella, Ira Plein, Françoise Poos, Karin Priem, and Angelo Van Gorp.

Facing Gaia Bruno Latour, 2017-09-05 The emergence of modern sciences in the seventeenth century profoundly renewed our understanding of nature. For the last three centuries new ideas of nature have been continually developed by theology, politics, economics, and science, especially the sciences of the material world. The situation is even more unstable today, now that we have entered an ecological mutation of unprecedented scale. Some call it the Anthropocene, but it is best described as a new climatic regime. And a new regime it certainly is, since the many unexpected connections between human activity and the natural world oblige every one of us to reopen the earlier notions of nature and redistribute what had been packed inside. So the question now arises: what will replace the old ways of looking at nature? This book explores a potential candidate proposed by James Lovelock when he chose the name 'Gaia' for the fragile, complex system through which living phenomena modify the Earth. The fact that he was immediately misunderstood proves simply that his readers have tried to fit this new notion into an older frame, transforming Gaia into a single organism, a kind of giant thermostat, some sort of New Age goddess, or even divine Providence. In this series of lectures on 'natural religion,' Bruno Latour argues that the complex and ambiguous figure of Gaia offers, on the contrary, an ideal way to disentangle the ethical, political, theological, and scientific aspects of the now obsolete notion of nature. He lays the groundwork for a future collaboration among scientists, theologians, activists, and artists as they, and we, begin to adjust to the new climatic regime.

Evolutionary Pathways in Nature John C. Avise, 2006-05-04 Reconstructing phylogenetic trees from DNA sequences has become a popular exercise in many branches of biology, and here the well-known geneticist John Avise explains why. Molecular phylogenies provide a genealogical backdrop for interpreting the evolutionary histories of many other types of biological traits (anatomical, behavioral, ecological, physiological, biochemical and even geographical). Guiding readers on a natural history tour along dozens of evolutionary pathways, the author describes how creatures ranging from microbes to elephants came to possess their current phenotypes. Essential reading for college students, professional biologists and anyone interested in natural history and biodiversity, this book is packed with fascinating examples of evolutionary puzzles from across the animal kingdom; how the toucan got its enormous bill, how reptiles grow back lost limbs and why Arctic fish don't freeze.
