## Cobra! The Attack Helicopter Mike Verier, 2014-02-10

The history of the Cobra helicopter is a long and varied one, characterised by extensive deployment in some of the most dynamic theatres of war. Designed in 1965, we are fast approaching the 50th Anniversary of the craft's inception into the world of combat flight, so it seems timely that we should be presented with this, a comprehensive historical account of the various landmarks of the Cobra's service history. This heavily illustrated volume relays the story of the Cobra from the days of early development and concept dissection right through to modern day uses, in both combat and civil contexts. Details of the early trials at Rucker are detailed, as is the birth of air mobile deployment, offering an illuminating insight into a most eventful period of developmental expansion. A full account of the Cobra's service history during the Vietnam campaign is also on display, describing the various tactics and weapons employed. The development of iconic variants such as the King Cobra and Supercobra is outlined, their individual histories set alongside those of lesser known and under-sung types, one off designs and oddities that add yet more colour to this fascinating history. Included alongside the authors text are first hand accounts that supplement the history, enlivening the facts with accounts of authentic pilot experience, the handling and flying characteristics that can perhaps only truly be described by those in command of such machinery. The work is brought thoroughly up to date with details of current deployment and uses in both combat and civil capacities. The employment of the Cobra by NASA and USCS illustrates its usefulness in a variety of fields, proving that the craft is so much more than a mere component part of the machinery of war. This book is sure to appeal to helicopter and

aviation enthusiasts keen to enhance their understanding of this iconic type. It has been long defined, and with good reason, as 'the Spitfire of the helicopter world' here it is granted the platform it deserves in order to be appreciated by a wider audience.

*Ah-1 Cobra Attack Helicopter Pilot's Flight Operating Instructions* Headquarters Department of the Army, 2011-05 During the Vietnam War fleets of transport helicopters provided U.S. forces with an unprecedented level of mobility and proved the concept of air cavalry . But without adequate support, helicopters such as the Bell UH-1 proved vulnerable to enemy ground fire. The solution was to develop a helicopter gunship. Bell s first foray into the category was rejected by the Army, but after Lockheed s AH-56 failed to meet critical goals, Bell answered the call with a new design. Equipped with a tandem cockpit, stub wings for weapons and a chin-mounted gun turret, Bell s Model 209 prototype was smaller and lighter than the AH-56, and used proven components from the UH-1. Developed in less than nine months, the 209 performed well and easily won the Army competition. In April 1966 the Army placed its first order for 110 aircraft, now designated the AH-1 Cobra or HueyCobra (but also widely known by the nickname Snake ). Over 1100 would eventually be built, including twin-engine SeaCobra and SuperCobra versions for the Marine Corps. After entering service in June of 1967, Cobras provided extensive support in Vietnam as fire support platforms, and achieved over a million operational hours. Cobras also flew in Operation Desert Shield, Desert Storm and in Somalia before being

retired in the late 1990s. They continue to fly for the Marine Corps, NATO allies and elsewhere. They also serve in a civil role as fire fighting helicopters. Created by Bell and the U.S. Army, this pilot s flight operating manual profiles the AH-1F Cobra. Over 300 pages long, this unclassified document is reprinted here in its entirety.

*Attack Helicopter Operations In Urban Terrain* Major Timothy A. Jones, 2014-08-15 Today's Army faces an environment much different from that which it prepared for in the Cold War. Massed armor battles on the plains of Europe, for which the Army was trained and equipped, have become much less likely while involvement in smaller and more limited conflict has become more probable. Future conflict is more likely to resemble Grenada, Panama, or Somalia than Desert Storm. As world demographics shift from rural to urban areas, the cities will increasingly become areas of potential conflict. They cannot be avoided as a likely battlefield, and have already played a prominent part in Army combat operations in the last decade. If the Army is to keep pace in this changing environment it must look to the cities when developing doctrine, technology, and force structure. The close battlefield of Mogadishu or Panama City is much different from the premier training areas of the National Training Center or Hohenfels. Yet aviators have been presented the dilemma of training for the latter environment and being deployed to the former. For most aviators facing urban combat, it is a matter of learning as they fight. To avoid the high casualties and collateral damage likely in an urban fight against a determined opponent, however. Army aviation must train and prepare before they fight. Attack helicopters are inextricably woven into the fabric of combined arms operations. But for the Army to operate effectively as a combined arms team in an urban

environment, both aviators and the ground units they support must understand the capabilities and limitations attack helicopters bring to the battle. This paper presents an historical perspective of how attack helicopters have already been used in this environment. It also discusses the factors that make city fighting unique, and the advantages and disadvantages for attack helicopter employment in an urban environment, as well as implications for future urban conflicts.

**Snake Pilot** Randy R. Zahn,2003 Based on audiotapes he recorded during the war and sent home to his family, Randy Zahn's Snake Pilot recounts his experiences flying AH-1 Cobra helicopters during the Vietnam War. First deployed in Vietnam in 1967 and loaded with a formidable arsenal of weaponry, the Cobra was the first helicopter designed from inception as an attack aircraft. It dramatically changed the nature of the war in Vietnam by offering the Army, for the first time, its own powerful and highly accurate weapons platform for close-air-support missions. Randy Zahn arrived in Vietnam shortly before the 1970 U.S. invasion of Cambodia, one of the most impressive demonstrations by the Cobra in the war. He describes his stunning transformation from a naive, middle-class teenager from southern California to a hardened killer during his tour in Vietnam. Unlike the pilots who flew the fast-moving strike jets, Zahn experienced the war up close and personal, witnessing the grisly effects of the Cobra's firepower on enemy soldiers. The author does not glorify killing but rather explains in sharp relief the kaleidoscope of emotions associated with combat: fear, revenge, hate, remorse, pity, and even ecstasy. He captures many of the ironies and nuances inherent in Vietnam, especially during the final years of the

conflict. Zahn displays a sensitivity rarely found in memoirs written by battle-hardened warriors. This human element, combined with the vast amount of archival research and interviews with members of his former unit, ensures that Snake Pilot will become the definitive account of the role helicopters played in Vietnam.

*US Army AH-1 Cobra Units in Vietnam* Jonathan Bernstein,2012-11-20 Bell's AH-1 Cobra was the first dedicated helicopter gunship to reach frontline service anywhere in the world. Developed as a private venture by the manufacturer, and based on the mechanics of the ubiquitous UH-1 Huey, the Cobra proved a huge success once introduced into combat with the US Army in 1966. Built as a key weapon in the Advanced Aerial Fire Support System concept of 1965, the AH-1 was one of the few aircraft to reach the combat zone after actual combat experience went into its design. The AH-1 helped reduce the losses being suffered by vulnerable troop transport helicopters by providing effective fire suppression during airmobile operations. This book explores its history, technology and crew.

**AH-1W Super Cobras** Carlos Alvarez,2010-08-01 The United States Marine Corps uses the Super Cobra to support Marines and take out enemy vehicles. Loaded with missiles, guns, and rockets, the Super Cobra is a very efficient force on the battlefield. Readers will explore the history of the Super Cobra and how this attack helicopter helps the Marine Corps complete missions.

**Eliminating Fratricide From Attack Helicopter Fires: An Army Aviator's Perspective** Major James A.

Towe,2014-08-15 In the aftermath of the euphoria brought on by our military victory in the Persian Gulf War, is the realization that we still have much to learn. The Persian Gulf War appears to have validated the quality of U.S. doctrine, leadership and military prowess. It showcased the technical superiority of our equipment, and confirmed under fire the courage and competence of our soldiers, sailors, airmen, and marines. Yet, even in an overwhelming victory there are painfully hard lessons to be learned, or in the case of fratricide, relearned. Perhaps no other aspect of our failures strike the military psyche harder than fratricide. This study will suggest that we do not have to accept the fratricide statistics of the past, however factual, as inevitable of future U.S. conflicts. It will propose that the facts of fratricide should be gathered not as a casualty prediction planning tool, but as a focus to design training and operational procedures, which in conjunction with advanced technology will work towards the significant reduction if not the elimination of fratricide from attack helicopter fires.

*Russian Gunship Helicopters* Yefim Gordon,Dmitriy Komissarov,2013-11-04 Features;\* Profiles of iconic types such as the Mil MI-24 'Hind', the Mil-28 and the Kamov Ka-52 'Alligator'.\* Summary of design histories and careers\* Colour reference for paint schemes \* Critical review of available kits\* Over 180 colour and black and white illustrations, including 20 full colour side-views and a range of various 3-view line-drawings. With profiles of a host of exciting designs, accompanied by a descriptive narrative history of the various types, this volume

combines practical information with reflective historical analysis, making for a visually rich volume providing modellers with all they need to know about the most exciting Russian Gunship helicopter designs and associated model kits. This edition deals primarily with the three principal attack helicopter types of the present-day Russian Army; The Mil MI-24 'Hind' otherwise known as 'the Flying Crocodile' has been produced in large numbers with many versions and variants produced. It has been supplied to a host of countries and seen considerable combat action in conflicts both in the Soviet Union and abroad. It still forms the backbone of army aviation in Russia and remains at the forefront of national exposure. The Mil-28 is a more contemporary type and is broadly the equivalent of the McDonnell Douglas AH-64 Apache. The Kamov Ka-52 'Alligator' NATO name 'Hokum-B' also features. This helicopter is in service with the Army and is entering service also with the Russian Navy. Well-illustrated histories and structural analyses are supplemented with detailed descriptions of the various plastic scale model kits which have been released, along with commentary concerning their accuracy and available modifications and decals. This level of detail and insight is sure to prove invaluable to a wide community of model-makers, both at home and overseas.

*Snake Driver!* Bob Rosenburgh, 1993 This is the saga of the Cobra--the attack helicopter--its development and introduction into Vietnam during the summer of '67, and the stories of the men who flew it. For a Cobra pilot--a Snake Driver--every launch meant he was going headlong into combat. As key providers of fire support, Snake Drivers always had missions, and every mission was real war--flying into hot LZs or kill zones that were literally

walls of lead and high explosives. These are their tales of bravery and skill in the hellfire that was Vietnam.

**Ah-64 Apache Attack Helicopter Pilot's Flight Operating Instructions** Headquarters Department of the Army, 2011-05 Developed and deployed in a short time due to the pressure of the Vietnam War, Bell's AH-1 Cobra performed well; but Army planners believed a better attack helicopter would be needed in the next war. In 1976, Hughes Helicopter's YAH-64A prototype bested the Cobra in firepower, performance and range, and won the competition to replace it. It would be 1982 before production commenced, but eventually over 1100 would be produced including the advanced AH-64D Apache Longbow. Dubbed the Apache, the AH-64 is a four-blade, twin-engine, tandem-cockpit design with tailwheel landing gear. The AH-64 features double and triple-redundant systems that ensure maximum survivability in combat, and an awesome array of weapons that can include Hellfire missiles and a 30mm M230 Chain Gun that can be slaved to the pilot's head movements via a helmet mounted display (IHADSS). The Apache first saw combat during the invasion of Panama in 1989, and conducted the first attack of Operation Desert Storm in 1991, flying into Iraq to destroy enemy radar systems. AH-64s are credited with destroying over 500 tanks during that conflict. They continued their service in Bosnia and Kosovo, in Operation Iraqi Freedom, and Operation Enduring Freedom in Afghanistan. The AH-64 is now also deployed by the United Kingdom, Israel, the Netherlands, Saudi Arabia, Japan and other air forces worldwide. Created by the Army for the AH-64A version of the Apache, this unclassified pilot's flight manual runs over 600 pages, and contains chapters about aircraft systems and procedures. It is reprinted here in its entirety.
