Toys, Games, and Media Jeffrey Goldstein, David Buckingham, Gilles Brougere, 2004-09-10 This book is a state-of-the-art look at where toys have come from and where they are likely to go in the years ahead. The focus is on the interplay between traditional toys and play, and toys and play that are mediated by or combined with digital technology. As well as covering the technical aspects of computer mediated play activities, the authors consider how technologically enhanced toys are currently used in traditional play and how they are woven into childrens' lives. The authors contrast their findings about technologically enhanced toys with knowledge of traditional toys and play. They link their studies of toys to goals in education and to entertainment and information transfer. This book will appeal to students, researchers, teachers, child care workers and more broadly the entertainment industry. It is appropriate for courses that deal with the specialized subject of toys and games, media studies, education and teacher training, and child development.

The Art of Tinkering Karen Wilkinson, Mike Petrich, Exploratorium, 2014-02-04 Some of the most creative artists from today's maker scene discuss their process, workspaces and more in this inspiring guide to tinkering. The Art of Tinkering is an unprecedented celebration of what it means to tinker: to take things apart, explore tools and materials, and build wondrous, wild art that's part science, part technology, and entirely creative. Join 150+ makers as they share the stories behind their beautiful and bold work—then do some tinkering yourself! This collection of exhibits, artwork, and projects explores a whole new way to learn, in which people expand their knowledge through making and doing, working with readily available materials, getting their hands dirty, collaborating with others, and problem-solving in the most fun sense of the word. Each artist featured in The Art of Tinkering shares their process and the backstory behind their work. Whether it's dicussing their

favorite tools (who knew toenail clippers could be so handy?) or offering a glimpse of their workspaces (you'd be amazed how many electronics tools you can pack into a pantry!), the stories, lessons, and tips in *The Art of Tinkering* offer a fascinating portrait of today's maker scene. Artists include: Scott Weaver, Arthur Ganson, Moxie, Tim Hunkin, AnnMarie Thomas, Ranjit Bhatnagar and Jie Qi.

Race and Excellence Ezra E. H. Griffith, M.D., 2022-09-13 Graduate of Harvard Medical School, president of the American Board of Psychiatry and Neurology, founding national chair of the Black Psychiatrists of America: the list of Chester Pierce's accomplishments alone cement him as a luminary in the field--and that is before one considers how foundational his theories about racism as an environmental pollutant are to modern mental health. Reprinted with a new introduction, this collection of interactive conversations between Ezra Griffith and Pierce sheds light on the man behind the impressive titles and oft-cited theories. Focusing on different stages of Pierce's life and career, it traces his path of achievement in the face of obstacles both individual and institutional. What emerges is more than just a revealing portrait of one particularly determined and talented man. It is a chronicle that illustrates distinct methods of coping with the stress of racial discrimination and new ways to approach narrative stories about Black lives that will prove illuminating to anyone interested in gaining a greater understanding of how to evaluate the salience of race matters in people's lives.

Guns of the Old West Jeff Cooper,2008-10-01 Originally written in the 1950s, *Guns of the Old West* is a factual account of the guns used during, and after, one of the most romanticized and often misconstrued periods in American history. It covers a wide array of firearms, from the smallest of hideaway pistols - the Derringer - to the largest of Colt's single-action revolvers, the more recent Mauser broomhandle, and the Colt 1911 auto pistol. Illustrated throughout, this book describes not only the evolution of fighting pistols and rifles during the 1800s and before, but also the men who created and used them. Of particular interest is the chapter titled *Frontier Life Insurance* that defines the code by which men lived and fought with their pistols. It was a time when the handgun was both a defensive and offensive weapon, much more than today, when it is considered mainly for defense. The chapter on *The Long Guns* covers the development of frontier rifles, from the famous Kentucky rifle of the plains and the mountain man's Hawken to the ever-popular Winchester lever actions.

Talk to Me Paola Antonelli, 2011 Published in conjunction with an exhibition at The Museum of Modern Art, *Talk to Me* thrives on an important late 20th-century cultural development in design: a shift from the centrality of function to that of meaning. From this new perspective, objects contain information that goes well beyond their immediate use or appearance, providing access to complex systems and networks and acting as gateways and interpreters. Whether openly and actively, or in subtle, subliminal ways, things talk to us, and designers write the initial script that lets us develop and improvise the dialogue. *Talk to Me* focuses on objects that involve direct interaction, such as interfaces, information systems, communication devices, and projects that establish a practical, emotional or even sensual connection between their users and entities such as cities, companies, governmental institutions, as well as other people. The featured objects range in date from the early 1980s - beginning with the first Graphic User Interface, developed by Xerox Parc in 1981 - with particular attention given to projects from the last five years and to several ones currently in development. Included are a diverse array of examples, from computer and machine interfaces to websites, video games, devices and tools, and installations. Organized thematically, *Talk to Me* features essays by Paola Antonelli, Jamer Hunt, Alexandra Midel, Kevin Slavin, and Koi Vinh. By introducing design practices that are becoming increasingly crucial to our world, the book presents a highly distilled sample of today's best design production that uses technology in creative and unexpected ways, showing how rich and deep design's influence will be on our future.
