*Airbus A380* Robert Jackson, Glen Ashley, 2021-07-30 “A great addition to the highly popular Flight Craft Series. This book reviews the history of . . . an iconic and important aircraft in civil aviation.” —Firetrench On April 27 2005, an aircraft under the power of six massive Rolls-Royce Trent 900 turbofan engines was making its first flight, and it was making history. For this was the Airbus A380, the largest passenger aircraft in the world. With air traffic continuing to double every fifteen years, the A380 was designed by Airbus Industrie to meet the needs of the passengers and airports, while also delivering the level of efficiency necessary to protect the environment for future generations. The design incorporated two full-length decks with wide-body dimensions, meaning its two passenger levels offered an entire deck’s worth of additional space compared to the next largest twin-engine jetliner. With more seats than any other aircraft, the A380 offered solutions to overcrowding; needing fewer journeys to carry 60 percent more passengers, making it the perfect solution to airport congestion, fleet planning optimization and traffic growth. Typical seating capacity was 525, although the aircraft was certified to carry up to 853 passengers. Production of the A380 peaked at thirty aircraft per year in 2012 and 2014. Then, in February 2019, the biggest customer, Emirates, announced that it was to reduce its latest order by thirty-nine aircraft in favour of two other Airbus Models, the A350 and A330neo, a version using the same engines as the Boeing 787 Dreamliner. For Airbus, it was the last act. The Company announced that production of the A380 would cease by 2021. “Full of great information.” —Airport Spotting

*The Airbus A380* Graham M. Simons, 2014-08-13 Every 7 minutes, an A380 takes off or lands somewhere in the world...The Airbus was initially designed and developed in order to provide a contender to the Boeing's growing monopoly of the skies in the biggest large-aircraft market in the world. Ambitious in design, the undertaking seemed mammoth. Yet scores of aviation engineers and pilots worked to get the design off the ground and the Airbus in our skies. This double-decker, wide-body, 4 engine jet airliner promised to redefine expectations when it came to commercial flight. Five years on from its launch, Graham Simons provides us with this, an impressively illustrated narrative history of the craft, its achievements, and the legacy it looks set to provide to a new generation of aviation engineers, enthusiasts and passengers. Operated by airlines such as Emirates, Singapore Airlines, Qantas and Lufthansa, the story of the A380 could be said to represent the story of modern-day travel itself, characterised by major technological advances across the world that constantly push the boundaries of expectation. Sure to appeal broadly across the market, this is very much a commemorative volume, preserving the history of this iconic craft in words and images.

Design in Flight Michael Bogle, 2008 Qantas A380.

*Airbus A380* Guy Norris, Mark Wagner, 2005 A revealing, behind-the-scenes look at the development of the biggest commercial aircraft ever built. With 200 colour photos, this book takes readers through the drama of the A380 project, introducing all the key players and unravelling the controversies surrounding its development.

**Commercial Aviation** Gerald Lee Dillingham, 2007 Airbus S.A.S., a European aircraft manufacturer, is introducing a new aircraft designated as the A380, which is expected to enter service in late 2007. The A380 will be the largest passenger aircraft in the world, with a wingspan of 262', a tail fin reaching 80' high, & a maximum takeoff weight of 1.2 million pounds. The A380 has a double deck & could seat up to 853 passengers. This report discusses: (1) the safety issues associated with introducing the A380 at U.S. airports; (2) the potential impact of A380 operations on the capacity of U.S. airports; & (3) how selected foreign airports are preparing to accommodate the A380. The author conducted site visits to the 18 U.S. airports & 11 Asian, Canadian, & European airports preparing to receive the A380. III.

**QF32** Richard de Crespigny, 2012-08-01 QF32 is the award winning bestseller from Richard de Crespigny, author of the forthcoming Fly!: Life Lessons from the Cockpit of QF32 On 4 November 2010, a flight from Singapore to Sydney came within a knife edge of being one of the world's worst air disasters. Shortly after leaving Changi Airport, an explosion shattered Engine 2 of Qantas flight QF32 - an Airbus A380, the largest and most advanced passenger plane ever built. Hundreds of pieces of shrapnel ripped through the wing and fuselage, creating chaos as vital flight systems and back-ups were destroyed or degraded. In other hands, the plane might have been lost with all 469 people on board, but a supremely experienced flight crew, led by Captain Richard de Crespigny, managed to land the crippled aircraft and safely disembark the passengers after hours of nerve-racking effort. Tracing Richard's life and career up until that fateful flight, QF32 shows exactly what goes into the making of a top-level airline pilot, and the extraordinary skills and training needed to keep us safe in the air. Fascinating in its detail and vividly compelling in its narrative, QF32 is the riveting, blow-by-blow story of just what happens when things go badly wrong in the air, told by the captain himself. Winner of ABIA Awards for Best General Non-fiction Book of the Year 2013 and Indie Awards' Best Non-fiction 2012 Shortlisted ABIA Awards' Book of the Year 2013

*Flying the Airbus A380* Gib Vogel, 2012-05-01 Since its first flight on 27 April 2005, the Airbus A380 has been the largest passenger airliner in the world. Instantly recognizable with its full-length upper deck, it represents the pinnacle of modern airliner design. Flying the A380 gives a pilot's eye view of what it is like to fly this mighty machine. It takes the reader on a trip from London to Dubai as the flight crew see it, from pre-flight planning,

through all the phases of the flight to shut-down at the parking stand many thousands of miles from the departure point.

**The A380neo Business Case** Dr Addison M Schonland, Mr Ernest S Arvai, 2015-01-15 There is significant market pressure coming from Emirates for Airbus to offer an A380neo. Airbus cannot ignore this pressure, because the A380 program is in need of more sales, and currently Emirates represents the shortest path to such orders. An A380neo should be attractive to other A380 operators as well as other airlines considering VLAs. The VLA segment as a niche but is also a valid market. This view puts the focus on order volume, rather than order revenues. VLAs have a historical average (1975-2014) order market share of 4%. Based on both the Airbus and Boeing forecast fleet size for 2033 we estimate the VLA segment to be ~1,000 aircraft.

**Business Deconstructed – QANTAS AIRWAYS LIMITED** Stefanie Aulenbach, 2007-11-14 Seminar paper from the year 2007 in the subject Business economics - General, grade: 2,0, University of Sunderland (New College Durham), 20 entries in the bibliography, language: English, abstract: The Group's principal activities are operating international and domestic air transportation services, providing freight services, selling international and domestic holiday tours and associated support activities including information technology, catering, ground handling and engineering and maintenance. (<http://www.qantas.com.au>) Qantas flies to more than 142 destinations in about 40 countries. Besides Qantas the company's operations include an Australian regional carrier, QantasLink, and a low-fare carrier, Jetstar. Overall, the company's fleet includes about 219 aircraft. Qantas is part of the Oneworld global marketing and code-sharing alliance, which is led by British Airways and American Airlines. A proposed purchase of Qantas by an investment group led by Macquarie Bank and TPG failed to win shareholder approval in 2007. (<http://www.qantas.com.au>) Stakeholders are all groups and individuals who have an interest in the company being analysed. In order to focus on these groups which have the power to influence, corporate level activities have to be identified first. This can include large shareholders, governments and trade unions. The power and interest of those stakeholder groups have an impact on the process by which strategy develops at the corporate level and in each individual business. (Williamson et al, 2004, pg. 9) Qantas' stakeholders are its shareholders, employees, customers, business partners and the community, indirect stakeholders include academics, the media, governments and non-governmental organisations. They all have a major influence on the business, its strategy and therefore its performance. According to the Institute of Chartered Accountants in England and Wales "the objective of financial statements is to provide information about the reporting entity's financial performance and financial position that is useful to a wide range of users for assessing the stewardship of the entity's management and for making economic decisions". (Institute of Chartered Accountants in England and Wales, 2002/2003, pg. 22) Furthermore, it says that this objective can usually be met by concentrating only on the information needs of present and potential investors which are the defining class of user. That is the reason why I will focus on present and potential stakeholders in the main part of this assignment.

Airbus A380 Paul E. Eden, 2015

*Flight of the Titans* Kenny Kemp, 2006 The gripping story of the biggest trade war in aviation history. In October 2007, the colossal Airbus A380, the largest commercial jet in history, will take to the skies. This gigantic double-decker is the first real competitor to Boeing's iconic 747 Jumbo Jet. Meanwhile, Boeing has thrown its weight behind the smaller 787 Dreamliner, an aircraft whose emphasis is on fuel economy and reduced emissions. The future of commercial air travel is in the balance, and the outcome is difficult to predict.

**The Men who Killed Qantas** Matthew Benns, 2011 This book is the account of the Qantas story that every airline passenger needs to read: the full and frank history of Australia's national airline. It takes you into the boardroom, where golden parachutes are signed off, and onto the hangar floor, where engineers battle accounting cuts to keep planes flying safely. It takes you back to the foundation of the airline to disprove the line that Qantas never crashes. This is the warts and all history the Qantas PR department does not want you to read ... but you can bet they'll be reading it too!

Boeing versus Airbus John Newhouse, 2008-01-08 The commercial airline industry is one of the most volatile, dog-eat-dog enterprises in the world, and in the late 1990s, Europe's Airbus overtook America's Boeing as the preeminent aircraft manufacturer. However, Airbus quickly succumbed to the same complacency it once challenged, and Boeing regained its precarious place on top. Now, after years of heated battle and mismanagement, both companies face the challenge of serving burgeoning Asian markets and stiff competition from China and Japan. Combining insider knowledge with vivid prose and insight, John Newhouse delivers a riveting story of these two titans of the sky and their struggles to stay in the air.
