Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Parents, Children, and the Facts of Life Henry V. Sattler,1952 Father Sattler has written *Parents, Children and the Facts of Life* to help parents fulfill the extremely important duty of training boys and girls to be pure and innocent, and eventually to enter marriage with a noble and holy purpose if God calls them to that state of life. According to the official Catholic teaching, sex education is the duty of the parents, yet many parents still struggle to convey the facts of life to their children in a natural and inspiring way. Applying traditional Catholic principles to very practical questions, Fr. Sattler explains what parents should tell their children, when and how they should tell it, what moral and psychological dangers they must avoid, and what questions they should anticipate. His conversational and down to earth style provides parents with the confidence and practical wisdom to fulfill their role as their children's primary teachers of the facts of life.

Autonomous Driving Markus Maurer,J. Christian Gerdes,Barbara Lenz,Hermann Winner,2016-05-21 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users,

and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving.

Digital Roots Gabriele Balbi, Nelson Ribeiro, Valérie Schafer, Christian Schwarzenegger, 2021-09-07 As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections, historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

The Birchbark House Louise Erdrich, 2021-11-16 This National Book Award finalist by Pulitzer Prize-winning novelist Louise Erdrich is the first installment in an essential nine-book series chronicling 100 years in the life of one Ojibwe family, and includes beautiful interior black-and-white artwork done by the author. She was named Omakayas, or Little Frog, because her first step was a hop. Omakayas and her family live on an island in Lake Superior. Though there are growing numbers of white people encroaching on their land, life continues much as it always has. But the satisfying rhythms of their life are shattered when a visitor comes to their lodge one winter night, bringing with him an invisible enemy that will change things forever—but that will eventually lead Omakayas to discover her calling. By turns moving and humorous, this novel is a breathtaking tour de force by a gifted writer. The beloved and essential Birchbark House series by Louise Erdrich includes *The Birchbark House*, *The Game of Silence*, *The Porcupine Year*, *Chickadee*, and *Makoons*.

Mobile Screens Nanna Verhoeff, 2012 Nanna Verhoeff's new book is a must for anybody interested in visual culture and media theory. It offers a rich and stimulating theoretical account of the central dimension of our contemporary existence--interfacing and navigating both data and physical world through a variety of screens (game consoles, mobile phones, car interfaces, GPS devices, etc.). In the process of exploring these new screen practices, Verhoeff offers fresh perspectives on many of the key questions in media and new media studies as well as a number of new original theoretical concepts. As the first theoretical manual for the society of mobile screens, this book will become an essential reference for all future investigations of our mobile screen condition.--Lev Manovich.--Publisher's description.

Regarding the Pain of Others Susan Sontag, 2013-10-01 A brilliant, clear-eyed new consideration of the visual representation of violence in our culture--its ubiquity, meanings,

and effects Watching the evening news offers constant evidence of atrocity--a daily commonplace in our society of spectacle. But are viewers inured -or incited--to violence by the daily depiction of cruelty and horror? Is the viewer's perception of reality eroded by the universal availability of imagery intended to shock? In her first full-scale investigation of the role of imagery in our culture since her now-classic book *On Photography* defined the terms of the debate twenty-five years ago, Susan Sontag cuts through circular arguments about how pictures can inspire dissent or foster violence as she takes a fresh look at the representation of atrocity--from Goya's *The Disasters of War* to photographs of the American Civil War, lynchings of blacks in the South, and Dachau and Auschwitz to contemporary horrific images of Bosnia, Sierra Leone, Rwanda, and New York City on September 11, 2001. As John Berger wrote when *On Photography* was first published, All future discussions or analysis of the role of photography in the affluent mass-media societies is now bound to begin with her book. Sontag's new book, a startling reappraisal of the intersection of information, news, art, and politics in the contemporary depiction of war and disaster, will be equally essential. It will forever alter our thinking about the uses and meanings of images in our world.

The Disappearing Spoon Sam Kean, 2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? *The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. *THE DISAPPEARING SPOON* masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

The Time Machine and Other Stories H. G. Wells, 2016-09-14 This book is a collection of eight short stories written by H. G. Wells. *The Short Stories of H. G. Wells* constitutes a must-have for lovers of the short story form and is not to be missed by fans of Wells' fantastic work. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as *The Time Machine* (1895), *The Invisible Man* (1897), and *The War of the Worlds* (1898). The Father of Science Fiction was also a staunch socialist, and his later works are increasingly political and didactic. The stories include: *The Time Machine*, *The Empire of the Ants*, *A Vision of Judgement*, *The Land Ironclads*, *The Beautiful Suit*, *The Door in the Wall*, *The Pearl of Love*, and *The Country of the Blind*. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.

Reality Is Broken Jane McGonigal, 2011-01-20 "McGonigal is a clear, methodical writer, and her ideas are well argued. Assertions are backed by countless psychological studies."

—The Boston Globe “Powerful and provocative . . . McGonigal makes a persuasive case that games have a lot to teach us about how to make our lives, and the world, better.” —San Jose Mercury News “Jane McGonigal's insights have the elegant, compact, deadly simplicity of plutonium, and the same explosive force.” —Cory Doctorow, author of *Little Brother* A visionary game designer reveals how we can harness the power of games to boost global happiness. With 174 million gamers in the United States alone, we now live in a world where every generation will be a gamer generation. But why, Jane McGonigal asks, should games be used for escapist entertainment alone? In this groundbreaking book, she shows how we can leverage the power of games to fix what is wrong with the real world—from social problems like depression and obesity to global issues like poverty and climate change—and introduces us to cutting-edge games that are already changing the business, education, and nonprofit worlds. Written for gamers and non-gamers alike, *Reality Is Broken* shows that the future will belong to those who can understand, design, and play games. Jane McGonigal is also the author of *SuperBetter: A Revolutionary Approach to Getting Stronger, Happier, Braver and More Resilient*.

The Nature of Spectacle Jim Igoe, 2017-09-12 A thoughtful treatise on how popular representations of nature, through entertainment and tourism, shape how we imagine environmental problems and their solutions--Provided by publisher.

Listening Is an Act of Love Dave Isay, 2007-11-08 A New York Times Bestseller “Each interview is a revelation.” —USA Today “As heartwarming as a holiday pumpkin pie and every bit as homey . . . what emerges in these compelling pages is hard-won wisdom and boundless humanity.” —Seattle Post-Intelligencer As heard on NPR, a wondrous nationwide celebration of our shared humanity StoryCorps founder and legendary radio producer Dave Isay selects the most memorable stories from StoryCorps' collection, creating a moving portrait of American life. The voices here connect us to real people and their lives—to their experiences of profound joy, sadness, courage, and despair, to good times and hard times, to good deeds and misdeeds. To read this book is to be reminded of how rich and varied the American storybook truly is, how resistant to easy categorization or stereotype. We are our history, individually and collectively, and *Listening Is an Act of Love* touchingly reminds us of this powerful truth. Dave Isay's latest book, *Callings*, published in 2016 from Penguin Press.

The Archive and the Repertoire Diana Taylor, 2003-09-12 In *The Archive and the Repertoire* preeminent performance studies scholar Diana Taylor provides a new understanding of the vital role of performance in the Americas. From plays to official events to grassroots protests, performance, she argues, must be taken seriously as a means of storing and transmitting knowledge. Taylor reveals how the repertoire of embodied memory—conveyed in gestures, the spoken word, movement, dance, song, and other performances—offers alternative perspectives to those derived from the written archive and is particularly useful to a reconsideration of historical processes of transnational contact. *The Archive and the Repertoire* invites a remapping of the Americas based on

traditions of embodied practice. Examining various genres of performance including demonstrations by the children of the disappeared in Argentina, the Peruvian theatre group Yuyachkani, and televised astrological readings by Univision personality Walter Mercado, Taylor explores how the archive and the repertoire work together to make political claims, transmit traumatic memory, and forge a new sense of cultural identity. Through her consideration of performances such as Coco Fusco and Guillermo Gómez-Peña’s show Two Undiscovered Amerindians Visit . . . , Taylor illuminates how scenarios of discovery and conquest haunt the Americas, trapping even those who attempt to dismantle them. Meditating on events like those of September 11, 2001 and media representations of them, she examines both the crucial role of performance in contemporary culture and her own role as witness to and participant in hemispheric dramas. The Archive and the Repertoire is a compelling demonstration of the many ways that the study of performance enables a deeper understanding of the past and present, of ourselves and others.
