The Greenhouse Gas Protocol ,2004 The GHG Protocol Corporate Accounting and Reporting Standard helps companies and other organizations to identify, calculate, and report GHG emissions. It is designed to set the standard for accurate, complete, consistent, relevant and transparent accounting and reporting of GHG emissions.

Liquid Modernity Zygmunt Bauman,2013-07-10 In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and unreachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. Liquid Modernity concludes the analysis undertaken in Bauman's two previous books Globalization: The Human Consequences and In Search of Politics. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

Critical Theory Today Lois Tyson,2012-09-10 Critical Theory Today is the essential introduction to contemporary critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. The chapters provide an extended explanation of each theory, using examples from everyday life, popular culture, and literary texts; a list of specific questions critics who use that theory ask about literary texts; an interpretation of F. Scott Fitzgerald's *The Great Gatsby* through the lens of each theory; a list of questions for further practice to guide readers in applying each theory to different literary works; and a bibliography of primary and secondary works for further reading.

Slides for Students Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Explaining Postmodernism Stephen R. C. Hicks,2004

Sissy Jacob Tobia,2019-03-05 THE NATIONAL BESTSELLER Transformative ... If Tobia aspires to the ranks of comic memoirists like David Sedaris and Mindy Kaling, Sissy succeeds. --The New York Times Book Review A heart-wrenching, eye-opening, and giggle-inducing memoir about what it's like to grow up not sure if you're (a) a boy, (b) a girl, (c) something in between, or (d) all of the above. A beautiful book . . . honest and funny.--Trevor Noah, The Daily Show Sensational.--Tyler Oakley Jacob Tobia is a force. --Good Morning America A trans Nora Ephron . . . both honest and didactic. --OUT Magazine A rallying cry for anyone who's ever felt like they don't belong. - Woman's Day As a young child in North Carolina, Jacob Tobia wasn't the wrong gender, they just had too much of the stuff. Barbies? Yes. Playing with bugs? Absolutely. Getting muddy? Please. Princess dresses? You betcha. Jacob wanted it all, but because they were a boy, they were told they could only have the masculine half. Acting feminine labelled them a sissy and brought social isolation. It took Jacob years to discover that being a sissy isn't something to be ashamed of. It's a source of pride. Following Jacob through bullying and beauty contests, from Duke University to the United Nations to the podiums of the Methodist church--not to mention the parlors of the White House--this unforgettable memoir contains multitudes. A deeply personal story of trauma and healing, a powerful reflection on gender and self-acceptance, and a hilarious guidebook for wearing tacky clip-on earrings in today's world, Sissy guarantees you'll never think about gender--both other people's and your own--the same way again.

How to Change Your Mind Michael Pollan,2019-05-14 Now on Netflix as a 4-part documentary series! "Pollan keeps you turning the pages . . . cleareyed and assured." --New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's mental travelogue is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

The Cigarette Century Allan Brandt,2009-01-06 From agriculture to big business, from medicine to politics, The

Cigarette Century is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. The Cigarette Century shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

Looking At Philosophy: The Unbearable Heaviness of Philosophy Made Lighter Donald Palmer, 2005-06-07 Distilled from Donald Palmer's more than 30 years of teaching experiences, this approachable text, historically organized text exemplifies Dr. Palmer's very successful light-hearted approach to teaching introduction to philosophy. Through the use of humor, drawings, charts, and diagrams, serious philosophical topics come alive for the readers—without compromising the seriousness of the subject matter. The text can be used as a core text or as a supplement to any reader.

The Postmodern Condition Jean-François Lyotard, 1984 In this book it explores science and technology, makes connections between these epistemic, cultural, and political trends, and develops profound insights into the nature of our postmodernity.

You Gotta Get Bigger Dreams Alan Cumming, 2016-09-13 A magical concoction of the mischievous, tender, whimsical, and debauched real-life adventures of Alan Cumming, told in his own words and pictures. Described by the New York Times as “a bawdy countercultural sprite” and named one of the most fun people in show business by Time magazine, Alan Cumming is a genuine quadruple threat—an internationally acclaimed, award-winning star of stage, television, and film, as well as a New York Times best-selling author whose real-life vivacity, wit, and charm shine through every page of his third book, You Gotta Get Bigger Dreams. In these forty-five picture essays, Cumming recounts his real-life adventures (and often, misadventures), illustrated by his own equally entertaining photographs. From an awkward bonding session with Elizabeth Taylor to poignant stories about his family and friends to some harsh words of wisdom imparted by Oprah that make up the title of this collection, You Gotta Get Bigger Dreams is as eclectic, enchanting, and alive as its author.

The Adventures of Honey & Leon Alan Cumming, 2017 Determined to keep their dads safe on their trip to France, two dogs disguise themselves and follow along.

Cities as Sustainable Ecosystems Peter Newman, Isabella Jennings, 2012-09-26 Modern city dwellers are largely detached from the environmental effects of their daily lives. The sources of the water they drink, the food they eat, and the energy they consume are all but invisible, often coming from other continents, and their waste ends up in places beyond their city boundaries. Cities as Sustainable Ecosystems shows how cities and their residents can begin to reintegrate into their bioregional environment, and how cities themselves can be planned with nature's organizing principles in mind. Taking cues from living systems for sustainability strategies, Newman and Jennings reassess urban design by exploring flows of energy, materials, and information, along with the interactions between human and non-human parts of the system. Drawing on examples from all corners of the world, the authors explore natural patterns and processes that cities can emulate in order to move toward sustainability. Some cities have adopted simple strategies such as harvesting rainwater, greening roofs, and producing renewable energy. Others have created biodiversity parks for endangered species, community gardens that support a connection to their foodshed, and pedestrian-friendly spaces that encourage walking and cycling. A powerful model for urban redevelopment, Cities as Sustainable Ecosystems describes aspects of urban ecosystems from the visioning process to achieving economic security to fostering a sense of place.

The Viewpoints Book Anne Bogart, Tina Landau, 2004-08-01 First major exploration of a ground-breaking new technique for actors and theatre artists.

Britain, France and the Decolonization of Africa Andrew W.M. Smith, Chris Jeppesen, 2017-03-01 Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of ‘late colonial shift’ after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for ‘colonial futures’, and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power. Praise for Britain, France and the Decolonization of Africa ‘...this ambitious volume represents a significant step forward for the field. As is often the case with rich and stimulating work, the volume gestures towards more themes than I have space to properly address in this review. These include shifting terrains of temporality, spatial Scales, and state sovereignty, which together raise important questions about the relationship between decolonization and globalization. By bringing all of these crucial issues into the same frame, Britain, France and the Decolonization of Africa is sure to inspire new thought-provoking research.’ - H-France vol. 17, issue 205

Down to Earth Ted Steinberg, 2002-05-09 In this ambitious and provocative text, environmental historian Ted Steinberg offers a sweeping history of our nation—a history that, for the first time, places the environment at the very center of our story. Written with exceptional clarity, Down to Earth re-envision the story of America from the ground up. It reveals how focusing on plants, animals, climate, and other ecological factors can radically change the way that we think about the past. Examining such familiar topics as colonization, the industrial revolution, slavery, the Civil War, and the emergence of modern-day consumer culture, Steinberg recounts how the natural world influenced the course of human history. From the colonists' attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good, the author reminds readers that many critical episodes in our history were, in fact, environmental events. He highlights the ways in which we have

attempted to reshape and control nature, from Thomas Jefferson's surveying plan, which divided the national landscape into a grid, to the transformation of animals, crops, and even water into commodities. The text is ideal for courses in environmental history, environmental studies, urban studies, economic history, and American history. Passionately argued and thought-provoking, Down to Earth retells our nation's history with nature in the foreground--a perspective that will challenge our view of everything from Jamestown to Disney World.

Kurt Hahn Nick Veevers,Pete Allison,2011-10-29 Kurt Hahn had a huge influence on the fields of outdoor and experiential learning, adventure education and, not least, badge schemes (Gordonstoun, Moray, and County Badges; and Duke of Edinburgh Award) throughout the world. This book provides a detailed historical account, centred on Hahn and the movement which surrounded him, of the early development of adventure education up to 1944. This includes an examination of themes present throughout Hahn's educational endeavours. It looks at Hahn's founding of Salem School (Germany) in 1920 and then Gordonstoun School (Scotland) in 1934. At both of these fee-paying schools activities such as sailing and hill-walking, often through expeditions lasting more than one day, played a prominent role in the education of the students. At Gordonstoun Hahn expanded his educational ventures, through the use of badge schemes, to include young people from the surrounding district who were not students at his school. Hahn expanded his badge schemes, firstly across the county in which Gordonstoun was situated, Morayshire, and then across Britain. The Outward Bound Sea School was founded by Hahn and Lawrence Holt, a ship-owner, at Aberdovey (Wales) in October 1941. It was a training centre where students could go for four week courses and it followed the badge scheme syllabus. During this period Hahn's educational vision was one of those that influenced the Norwood Report and consequently the 1944 Education Act in terms of outdoor activities. This act provided the framework within which Outdoor Centres were set up by Local Education Authorities in the UK. This book looks at the various contexts, which came together through Hahn, and which help the reader understand his actions: German educational practice; Hahn's and Prince Max's (owner of Salem School) experiences of the First World War and its aftermath and the need to educate people to speak out and act upon their convictions; Hahn's and Prince Max's inclusive agenda; British educational practice; the Second World War; and Hahn's expansionist aims. Kurt Hahn was one of the field's greatest advocates and this book provides a detailed historical examination of his work and brings light to the complex tapestry of events which led to the rise and development of adventure education.

Essentials of Business Communication Mary Ellen Guffey,2004 This text-workbook is a streamlined, no-nonsense approach to business communication. It takes a three-in-one approach: (1) text, (2) practical workbook, and (3) self-teaching grammar/mechanics handbook. The chapters reinforce basic writing skills, then apply these skills to a variety of memos, letters, reports, and resumes. This new edition features increased coverage of contemporary business communication issues including oral communication, electronic forms of communication, diversity and ethics.
