Hardware: The Definitive SF Works of Chris Foss Chris Foss,2011-09-06

Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career. "Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." – Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." – Alejandro Jodorowsky

How to Make Adorable Baby Animal Dolls Jonni Good,2013-06 In this book the author shows you exactly how to make your own adorable baby animal collector's dolls, leading you through the entire process every step of the way. Your dolls won't cost much to make, and every doll will be an original, one-of-a-kind work of art. Since no two dolls ever come out exactly alike, each doll will have it's own personality and character. You won't have to learn how to make molds for the doll heads, because each one is hand-sculpted over a simple armature. You don't need a kiln, because you'll be using home-made air-dry clay instead of porcelain. The resulting heads are seamless, hollow, and surprisingly strong. The bodies and ears are made out of soft, huggable cotton velour, and the toes are sculpted with a few easy stitches. Adorable!

The Women of Little Lon Barbara Minchinton, 2021-08-16 A vivid account of a

remarkable but little-known chapter in Melbourne's history Sex workers in nineteenth-century Melbourne were judged morally corrupt by the respectable world around them. But theirs was a thriving trade, with links to the police and political leaders of the day, and the leading brothels were usually managed by women. While today a city lane is famously named after Madame Brussels, the identities of the other 'flash madams', the 'dressed girls' who worked for them and the hundreds of women who solicited on the streets of the Little Lon district of Melbourne are not remembered. Who were they? What did their daily lives look like? What became of them? Drawing on the findings of recent archaeological excavations, rare archival material and family records, historian Barbara Minchinton brings the fascinating world of Little Lon to life. Barbara Minchinton is a historian and independent researcher. For several years she collaborated with a team of archaeologists on the interpretation of artefacts from Melbourne's Little Lon district. She is the co-editor of *The Commonwealth Block*, Melbourne, a historical archaeology of the city's working-class and immigrant communities, and the author of *The Women of Little Lon*.

Moon Shot Alan Shepard, Deke Slayton, Jay Barbree, 2011-05-03 New York Times bestseller for fans of *First Man*: A “breathtaking” insider history of NASA’s space program—from astronauts Alan Shepard and Deke Slayton (Entertainment Weekly). On October 4, 1957, the Soviet Union launched Sputnik I, and the space race was born. Desperate to beat the Russians into space, NASA put together a crew of the nation’s most daring test pilots: the seven men who were to lead America to the moon. The first into space was Alan Shepard; the last was Deke Slayton, whose irregular heartbeat kept him grounded until 1975. They spent the 1960s at the forefront of NASA’s effort to conquer space, and *Moon Shot* is their inside account of what many call the twentieth century’s greatest feat—landing humans on another world. Collaborating with NBC’s veteran space reporter Jay Barbree, Shepard and Slayton narrate in gripping detail the story of America’s space exploration from the time of Shepard’s first flight until he and eleven others had walked on the moon.

Watson-Gandy on Accountants Mark Watson-Gandy,2008 Accountants play an increasingly important and diverse role in society today. Traditionally, in the UK, accountants are the first port of call for businessmen seeking any form of professional advice or assistance. They undertake a wide range of functions which stretch far beyond their traditional roles of preparing accounts, financial reporting, auditing, and tax planning. Today, accountants
