*The Turns of Translation Studies* Mary Snell-Hornby,2006-06-09 What's new in Translation Studies? In offering a critical assessment of recent developments in the young discipline, this book sets out to provide an answer, as seen from a European perspective today. Many "new" ideas actually go back well into the past, and the German Romantic Age proves to be the starting-point. The main focus lies however on the last 20 years, and, beginning with the cultural turn of the 1980s, the study traces what have turned out since then to be ground-breaking contributions (new paradigms) as against what was only a change in position on already established territory (shifting viewpoints). Topics of the 1990s include nonverbal communication, gender-based Translation Studies, stage translation, new fields of interpreting studies and the effects of new technologies and globalization (including the increasingly dominant role of English). The author's aim is to stimulate discussion and provoke further debate on the current profile and future perspectives of Translation Studies.

**Glamour** Professor Carol Dyhouse,2013-04-04 How do we understand glamour? Has it empowered women or turned them into objects? Once associated with modernity and the cutting edge, is it entirely bound up with nostalgia and tradition? This unique and fascinating book tells the story of glamour. It explores the changing meanings of the word, its relationship to femininity and fashion, and its place in twentieth century social history. Using a rich variety of sources - from women's magazines and film to social surveys and life histories - Carol Dyhouse examines with wit and insight the history and meaning of costume, cosmetics, perfume and fur. Dyhouse disentangles some of the arguments surrounding femininity, appearance and power, directly addressing feminist concerns. The book explores historical contexts in which glamour served as an expression of desire in women and an assertion of entitlement to the pleasures of affluence, finally arguing that glamour can't simply be dismissed as oppressive, or as male fantasy, but can carry celebratory meanings for women.

**From Inquiry to Academic Writing** Stuart Greene, April Lidinsky,2018 Demystifies academic reading and writing, step by step. From Inquiry to Academic Writing helps students understand academic culture and its ways of reading, thinking, and writing. With a practical and now widely proven step-by-step approach, the text demystifies cross-curricular thinking and writing. An extensive thematic reader brings students into interdisciplinary debates that not only bear on their college careers but also reflect larger cultural issues that they will encounter outside the academy. The fourth edition provides extensive coverage of academic habits and skills (reflection, summarization, synthesis, and visual analysis) and features more than 40% new readings grouped by interdisciplinary themes.--Publisher website.

Posthegemony Jon Beasley-Murray,2010 A challenging new work of cultural and political theory rethinks the concept of hegemony.

*Against Meritocracy* Jo Littler,2017-08-16 Meritocracy today involves the idea that whatever your social position at birth, society ought to offer enough opportunity and mobility for 'talent' to combine with 'effort' in order to 'rise to the top'. This idea is one of the most prevalent social and cultural tropes of our time, as palpable in the speeches of politicians as in popular culture. In this book Jo Littler argues that

meritocracy is the key cultural means of legitimation for contemporary neoliberal culture – and that whilst it promises opportunity, it in fact creates new forms of social division. *Against Meritocracy* is split into two parts. Part I explores the genealogies of meritocracy within social theory, political discourse and working cultures. It traces the dramatic U-turn in meritocracy's meaning, from socialist slur to a contemporary ideal of how a society should be organised. Part II uses a series of case studies to analyse the cultural pull of popular 'parables of progress', from reality TV to the super-rich and celebrity CEOs, from social media controversies to the rise of the 'mumpreneur'. Paying special attention to the role of gender, 'race' and class, this book provides new conceptualisations of the meaning of meritocracy in contemporary culture and society.

**A Companion to the History of the Book** Simon Eliot, Jonathan Rose, 2011-08-24 *A COMPANION TO THE HISTORY OF THE BOOK* Edited by Simon Eliot and Jonathan Rose "As a stimulating overview of the multidimensional present state of the field, the Companion has no peer." Choice "If you want to understand how cultures come into being, endure, and change, then you need to come to terms with the rich and often surprising history Of the book ... Eliot and Rose have done a fine job. Their volume can be heartily recommended. " Adrian Johns, *Technology and Culture* From the early Sumerian clay tablet through to the emergence of the electronic text, this Companion provides a continuous and coherent account of the history of the book. A team of expert contributors draws on the latest research in order to offer a cogent, transcontinental narrative. Many of them use illustrative examples and case studies of well-known texts, conveying the excitement surrounding this rapidly developing field. The Companion is organized around four distinct approaches to the history of the book. First, it introduces the variety of methods used by book historians and allied specialists, from the long-established discipline of bibliography to newer IT-based approaches. Next, it provides a broad chronological survey of the forms and content of texts. The third section situates the book in the context of text culture as a whole, while the final section addresses broader issues, such as literacy, copyright, and the future of the book. Internationalizing "International Communication" Chin-Chuan Lee, 2015-01-06 International communication as a field of inquiry is, in fact, not very "internationalized." Rather, it has been taken as a conceptual extension or empirical application of U.S. communication, and much of the world outside the West has been socialized to adopt truncated versions of Pax Americana's notion of international communication. At stake is the "subject position" of academic and cultural inquirers: Who gets to ask what kind of questions? It is important to note that the quest to establish universally valid "laws" of human society with little regard for cultural values and variations seems to be running out of steam. Many lines of intellectual development are reckoning with the important dimensions of empathetic understanding and subjective consciousness. In *Internationalizing International Communication*, Lee and others argue that we must reject both America-writ-large views of the world and self-defeating mirror images that reject anything American or Western on the grounds of cultural incompatibility or even cultural superiority.

The point of departure for internationalizing “international communication” must be precisely the opposite of parochialism – namely, a spirit of cosmopolitanism. Scholars worldwide have a moral responsibility to foster global visions and mutual understanding, which forms, metaphorically, symphonic harmony made of cacophonous sounds.

**Literary Theory** Johannes Willem Bertens, Hans Bertens, 2001 This accessible guide provides the ideal first step in understanding literary theory.

**Ten Lessons in Theory** Calvin Thomas, 2013-08-01 An introduction to literary theory unlike any other, *Ten Lessons in Theory* engages its readers with three fundamental premises. The first premise is that a genuinely productive understanding of theory depends upon a considerably more sustained encounter with the foundational writings of Hegel, Marx, Nietzsche, and Freud than any reader is likely to get from the introductions to theory that are currently available. The second premise involves what Fredric Jameson describes as the conviction that of all the writing called theoretical, Lacan's is the richest. Entertaining this conviction, the book pays more (and more careful) attention to the richness of Lacan's writing than does any other introduction to literary theory. The third and most distinctive premise of the book is that literary theory isn't simply theory about literature, but that theory fundamentally is literature, after all. *Ten Lessons in Theory* argues, and even demonstrates, that theoretical writing is nothing if not a specific genre of creative writing, a particular way of engaging in the art of the sentence, the art of making sentences that make trouble sentences that make, or desire to make, radical changes in the very fabric of social reality. As its title indicates, the book proceeds in the form of ten lessons, each based on an axiomatic sentence selected from the canon of theoretical writing. Each lesson works by creatively unpacking its featured sentence and exploring the sentence's conditions of possibility and most radical implications. In the course of exploring the conditions and consequences of these troubling sentences, the ten lessons work and play together to articulate the most basic assumptions and motivations supporting theoretical writing, from its earliest stirrings to its most current turbulences. Provided in each lesson is a working glossary: specific critical keywords are boldfaced on their first appearance and defined either in the text or in a footnote. But while each lesson constitutes a precise explication of the working terms and core tenets of theoretical writing, each also attempts to exemplify theory as a practice of creativity (Foucault) in itself.

**Crime, Fear and the Law in True Crime Stories** Anita Biressi, 2001-06-26 Why do true crime stories exert such popular fascination? What do they have to say about the fear of crime in the present moment? This book examines the historical origins and development of true crime and its evolution into distinctive contemporary forms. Embracing a range of non-fiction accounts - true crime book and magazines, law and order television, popular journalism - it traces how they harness and explore current concerns about law and order, crime and punishment and personal vulnerability.
