*Fish for Supper* M.B. Goffstein,2021-03-02 Selected as a Caldecott Honor Book in 1977, and now back in print for the first time in a decade, this is a charming picture book about a grandmother and her simple, idyllic daily routine. *Fish for Supper* is M.B. Goffstein's Caldecott Honor story of a grandmother and her regular routine in summer: waking at five o'clock in the morning to make the most of a day on the lake, "with cans of worms and minnows, some fruit for lunch, bobbers, lines, hooks, and sinkers." Delightfully and wittily, Goffstein departs from the usual fisherman's tale to give us a day in the life of this no-nonsense, patient fisherwoman who catches "sunfish, crapper, perch, and sometimes a big northern pike," who capably cleans her catch, and who can bake to boot. She relishes every bite of her well-earned supper, and the pleasure she takes in her self-sufficiency and graceful work becomes the reader's as well. Based on Goffstein's own childhood summers at her grandparents' house on Lake Minnetonka, Minnesota, *Fish for Supper* transforms her indelible memories into a story that is as honed and gratifying as its heroine's days.

**Under the Sea Origami** Duy Nguyen, 2005 From a slithering electric eel to a ferocious barracuda, Duy Nguyen shows you simple paper folding techniques for crafting extraordinary sea creatures. These striking projects, specially designed for Under the Sea Origami, are fun to make using Nguyen's instructions. You don't have to dive under the sea to spot dolphins because these mammals enjoy jumping out of the water. Your origami model will emulate this graceful leaping motion once you create its intricately-folded arched back, fins, and snout. With a long, wide body and whip-like tail, the stingray is a most distinctive-looking fish. It appears to be in mid-flight even though it's nimbly swimming in the water. The hammerhead shark is easily recognized by the shape of its skull. A large tail, made by using mountain and valley folds, rises dramatically to give the hammerhead a great silhouette. The origami blue shark, on the other hand, will attract attention because of its large gaping mouth! To complete the swordfish, you'll need to attach two pieces of folded paper together. Anyone might be frightened by the appearance of a creature that has a swordlike beak and pointy head, unless it was made of paper like this one is! The squid is as fun to create as the swordfish. Its creepy tentacles will take shape after you cut the valley-folded tail into layers. You will find that these unusual origami projects are among the most original ever designed. Book jacket.

**Jungle Animal Origami** Duy Nguyen, 2004 Explains how to create numerous jungle animals, including vultures, gorillas, lions, zebras, gazelles, and elephants.

**Works and Lives** Clifford Geertz, 1988 The illusion that ethnography is a matter of sorting strange and irregular facts into familiar and orderly categories—this is magic, that is technology—has long since been exploded. What it is instead, however, is less clear. That it might be a kind of writing, putting things to paper, has now and then occurred to those engaged in producing it, consuming it, or both. But the examination of it as such has been impeded by several considerations, none of them very reasonable. One of these, especially weighty among the producers, has been simply that it is an unanthropological sort of thing to do. What a proper ethnographer ought properly to be doing is going out to places, coming back with information about how people live there, and making that information available to the professional community in practical form, not lounging about in libraries reflecting on literary questions. Excessive concern, which in practice usually means any concern at all, with how ethnographic texts are constructed seems like an unhealthy self-absorption—time wasting at best, hypochondriacal at worst. The advantage of shifting at least part of our attention from the fascinations of field work, which have held us so long in thrall, to those of writing is not only that this difficulty will become more clearly understood, but also that we shall learn to read with a more percipient eye. A hundred and fifteen years (if we date our profession, as conventionally, from Tylor) of asseverational prose and literary innocence is long enough.
