The Complete Story of Sadako Sasaki Masahiro Sasaki, Sue DiCicco, 2020-04-07
Independent Publisher Book Award (IPPY) Winner **Middle School Book of the Year-- Northern Lights Book Awards** **Skipping Stones Honor Award Winner** For the first time, middle readers can learn the complete story of the courageous girl whose life, which ended through the effects of war, inspired a worldwide call for peace. In this book, author Sue DiCicco and Sadako's older brother Masahiro tell her complete story in English for the first time--how Sadako's courage throughout her illness inspired family and friends, and how she became a symbol of all people, especially children, who suffer from the impact of war. Her life and her death carry a message: we must have a wholehearted desire for peace and be willing to work together to achieve it. Sadako Sasaki was two years old when the atomic bomb was dropped on her city of Hiroshima at the end of World War II. Ten years later, just as life was starting to feel almost normal again, this athletic and enthusiastic girl was fighting a war of a different kind. One of many children affected by the bomb, she had contracted leukemia. Patient and determined, Sadako set herself the task of folding 1000 paper cranes in the hope that her wish to be made well again would be granted. Illustrations and personal family photos give a glimpse into Sadako's life and the horrors of war. Proceeds from this book are shared equally between The Sadako Legacy NPO and The Peace Crane Project.

I Really Really Need a Wee Karl Newson, 2020

Coding Freedom E. Gabriella Coleman, 2013 Who are computer hackers? What is free software? And what does the emergence of a community dedicated to the production of free and open source software--and to hacking as a technical, aesthetic, and moral project--reveal about the values of contemporary

liberalism? Exploring the rise and political significance of the free and open source software (F/OSS) movement in the United States and Europe, Coding Freedom details the ethics behind hackers' devotion to F/OSS, the social codes that guide its production, and the political struggles through which hackers question the scope and direction of copyright and patent law. In telling the story of the F/OSS movement, the book unfolds a broader narrative involving computing, the politics of access, and intellectual property. E. Gabriella Coleman tracks the ways in which hackers collaborate and examines passionate manifestos, hacker humor, free software project governance, and festive hacker conferences. Looking at the ways that hackers sustain their productive freedom, Coleman shows that these activists, driven by a commitment to their work, reformulate key ideals including free speech, transparency, and meritocracy, and refuse restrictive intellectual protections. Coleman demonstrates how hacking, so often marginalized or misunderstood, sheds light on the continuing relevance of liberalism in online collaboration.

Dreaming in Code Scott Rosenberg, 2008-02-26 Our civilization runs on software. Yet the art of creating it continues to be a dark mystery, even to the experts. To find out why it's so hard to bend computers to our will, Scott Rosenberg spent three years following a team of maverick software developers—led by Lotus 1-2-3 creator Mitch Kapor—designing a novel personal information manager meant to challenge market leader Microsoft Outlook. Their

story takes us through a maze of abrupt dead ends and exhilarating breakthroughs as they wrestle not only with the abstraction of code, but with the unpredictability of human behavior– especially their own.

If Anything Happens I Love You Will McCormack, Michael Govier, 2022-09-27 Unimaginable loss yields to the power of human connection in this simple,

moving story from the filmmakers of the eponymous Oscar-winning film. An elegy on grief. Heavy pain exquisitely rendered. Kirkus Starred Review Based on the Academy Award-winning animated short by the same name, *If Anything Happens I Love You* is a young adult graphic novel that follows two parents as they reckon with the loss of their young daughter, Rose, in a school shooting. Readers follow Rose from “above” as she watches her parents slowly break down under the weight and pain of their loss. Throughout the novel, Rose’s soul seeks to help her parents reconnect. We learn who Rose was and how much life she lived in her short time. By incorporating a wide range of characters, her boyfriend, teacher, and her cat, Rose is able to introduce healing into the lives of the people she left behind. *If Anything Happens I Love You* may be a story about loss, but in it we see ourselves—in the grief, the pain, and, most importantly, in the fight toward human connection, love, and acceptance.

Aircraft Stories John Law, 2002-04-24 In *Aircraft Stories* noted sociologist of technoscience John Law tells “stories” about a British attempt to build a military aircraft—the TSR2. The intertwining of these stories demonstrates the ways in which particular technological projects can be understood in a world of complex contexts. Law works to upset the binary between the modernist concept of knowledge, subjects, and objects as having centered and concrete essences and the postmodernist notion that all is fragmented and centerless. The structure and content of *Aircraft Stories* reflect Law’s

contention that knowledge, subjects, and—particularly— objects are “fractionally coherent”: that is, they are drawn together without necessarily being centered. In studying the process of this particular aircraft’s design, construction, and eventual cancellation, Law develops a range of metaphors to describe both its fractional character and the ways its various aspects interact with each other. Offering numerous insights into the way we theorize the working of systems, he explores the overlaps between singularity and multiplicity and reveals rich new meaning in such concepts as oscillation, interference, fractionality, and rhizomatic networks. The methodology and insights of *Aircraft Stories* will be invaluable to students in science and technology studies and will engage others who are interested in the ways that contemporary paradigms have limited our ability to see objects in their true complexity.

Papertoy Monsters Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that’s hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson,

Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Captain Sam Angus, 2022-01-01 Captain is a moving middle-grade WWI story about a boy, his donkey, and what it means to be brave, loyal, and fearless. It's 1915 and British troops are about to sail to Gallipoli. Billy is the youngest soldier in his platoon and is teased for not being old enough to drink or shave. The truth is, at fifteen he's not old enough to be a soldier, either, and he's terrified of the war he's about to fight. Then he meets Captain, a refugee boy, and his donkey, Hey-ho. Together they teach Billy what it means to be a friend. Sam Angus pulls at heartstrings in this stirring wartime friendship story. Praise for Captain: The tight, powerful

writing is reminiscent of Michael Morpurgo's war novels—gritty but not gory. . . this is an important look at war and true friendship that should have a place in most collections. —School Library Journal [T]he friendship between Billy and Captain affectingly rendered. As with Angus' previous war narratives, *Soldier Dog* (2013) and *A Horse Called Hero* (2014), this book is perfect for fans of Michael Morpurgo, or for those who enjoy animal stories with historical settings. —Booklist

National School Improvement Tool [in Arabic]. ,2016 The National School Improvement Tool brings together findings from international research into the practices of highly effective schools and school leaders. The Tool assists schools to review and reflect on their efforts to improve the quality of classroom teaching and learning. It supports school-wide conversations - including with parents and families, school governing bodies, local communities and students themselves - about aspects of current practice, areas for improvement and evidence that progress is being made. The Tool does not describe everything that effective schools do, but focuses on those practices that are most directly related to school-wide improvements, and thus outcomes for students. In this sense, the tool can be thought of as a core element of more comprehensive school improvement programs, frameworks and initiatives.
