**The Pyramid Complex of Senwosret III at Dahshur Architectural Studies** Dieter Arnold, 2002 Based on the Museum's records of excavations from 1906 to 1934 at the pyramid site of Lisht, revised and augmented by results of recent excavations (1985 to present). -- Metropolitan Museum of Art website.

*The Stones of the Pyramids* Dietrich D. Klemm, Rosemarie Klemm, 2010 During the Egyptian Old Kingdom (2650-2135 BC), the most impressive of all monuments were built in the form of the pyramids and their associated temples. The provision of enormous quantities of stone from suitable quarries was the most important requirement for their construction. This volume comprises short archaeological descriptions of the pyramids and their enclosures and determines the exact origin of the building material (above all limestone) from a total of 26 pyramids through a petrographic and geochemical comparison with samples from other quarries.

*Visual and Written Culture in Ancient Egypt* John Baines, 2007-05-17 A generously illustrated collection of John Baines's influential writings on the role of writing and the importance of visual culture in ancient Egypt. Investigation of these key topics in a comparative study of early civilizations is pursued through a number of case studies, and characterized by a radically interdisciplinary approach.

*Sphinx* Christiane Zivie-Coche, 2004 Sphinxes are legion in Egypt--what is so special about this one?... We shall take a stroll around the monument itself, scrutinizing its special features and analyzing the changes it experienced throughout its history. The evidence linked to the statue will enable us to trace its evolution... down to the worship it received in the first centuries of our own era,

when Egyptians, Greeks, and Romans mingled together in devotion to this colossus, illustrious witness to a past that was already more than two millennia old.--from the Introduction

The Great Sphinx of Giza is one of the few monuments from ancient Egypt familiar to nearly everyone. In a land where the colossal is part of the landscape, it still stands out, the largest known statue in Egypt. Originally constructed as the image of King Chephren, builder of the second of the Great Pyramids, the Sphinx later acquired new fame in the guise of the sun god Harmakhis. Major construction efforts in the New Kingdom and Roman Period transformed the monument and its environs into an impressive place of pilgrimage, visited until the end of pagan antiquity. Christiane Zivie-Coche, a distinguished Egyptologist, surveys the long history of the Great Sphinx and discusses its original appearance, its functions and religious significance, its relation to the many other Egyptian sphinxes, and the various discoveries connected with it. From votive objects deposited by the faithful and inscriptions that testify to details of worship, she reconstructs the cult of Harmakhis (in Egyptian, Har-em-akhet, or Horus-in-the-horizon), which arose around the monument in the second millennium. We are faced, she writes, with a religious phenomenon that is entirely original, though not unique: a theological reinterpretation turned an existing statue into the image of the god who had been invented on its basis. The coming of Christianity ended the Great Sphinx's religious role. The ever-present sand buried it, thus sparing it the fate that overtook the nearby pyramids, which were stripped of their stone by medieval builders. The monument remained untouched, covered by its desert blanket, until the first excavations. Zivie-Coche details the archaeological activity aimed at clearing the Sphinx and, later, at preserving it from the corrosive effects of a rising water table.

**Why the Pharaohs Built the Pyramids with Fake Stones** Joseph Davidovits, 2009 In this book, Professor Joseph Davidovits explains the intriguing theory that made him famous. He shows

how the Pyramids were built by using re-agglomerated stone (a natural limestone treated like a concrete), and not with huge carved blocks, hauled on fragile ramps. Archaeology bears him out, as well as hieroglyphic texts, scientific analysis, religious and historical facts. Several independent scientific studies reveal the ultimate proofs that the pyramid blocks are not natural. You may find various papers or opinions challenging the theory, but all prefer ignoring these analysis. Believing or not in the artificial stone theory is now simply irrelevant. It is a fact, a truth that is still fought by some people for irrational purposes. Here we finally have the first complete presentation on how and why the Egyptian pyramids were built. We discover its brilliant creator, the great scribe and architect, Imhotep. Joseph Davidovits sweeps aside the conventional image which cripples Egyptology and delivers a captivating and surprising view of Egyptian civilisation. He charts the rise of this technology, its apogee with the Pyramids at Giza, and the decline. Everything is logical and brilliant, everything fits into place. Chapter by chapter, the revelations are sensational, especially when Joseph Davidovits explains why the pharaohs stopped building great pyramids because of an over-exploitation of raw materials and a likely environmental disaster. We understand why Cheops and Ramses II represent two Egyptian civilisations completely different in their beliefs. On the one hand, the God Khnum mandates Cheops to build his pyramid in agglomerated stone, while on the other hand, the God Amun orders Ramses to carve stone for the temples of Luxor and Karnak. 30 years after the best seller book: *The Pyramids: an enigma solved*, after 30 years of new research, and new discoveries, you will understand why the theory is more alive than ever, why more and more scientists and archaeologists agree, simply because it is the truth.

Encyclopedia of Ancient Egypt Margaret Bunson, 2014-05-14 An A-Z reference providing concise and accessible information on Ancient Egypt from its predynastic cultures to the suicide of Cleopatra and Mark Anthony in the face of the Roman conquest. Annotation. Bunson (an author of reference works) has revised her 1991 reference (which is appropriate for high school and public libraries) to span Egypt's history from the predynastic period to the Roman conquest. The encyclopedia includes entries for people, sites, events, and concepts as well as featuring lengthy entries or inset boxes on major topics such as deities, animals, and the military. A plan and photograph are included for each of the major architectural sites.

**Egyptian Gods & Goddesses** Britannica Educational Publishing, 2014-01-01 Gods and goddesses—in human, animal, and other forms—were central to the ancient Egyptian way of life. Identified with the natural world, daily living, and the afterlife, they maintained order and prevented chaos from permeating the human world. The figures documented in ancient hieroglyphics are given dimension in this absorbing volume, which examines the characteristics and significance of many of the Egyptian gods and goddesses and also looks at related topics such as ancient symbols and the influence of Egyptian mythology on other cultures and belief systems.

*Death and Salvation in Ancient Egypt* Jan Assmann,2011-11-14 Human beings, the acclaimed Egyptologist Jan Assmann writes, are the animals that have to live with the knowledge of their death, and culture is the world they create so they can live with that knowledge. In his new book, Assmann explores images of death and of death rites in ancient Egypt to provide startling new insights into the particular character of the civilization as a whole. Drawing on the unfamiliar genre of the death liturgy, he arrives at a remarkably comprehensive view of the religion of death in ancient Egypt. Assmann describes in detail nine different images of death: death as the body being torn apart, as social isolation, the notion of the court of the dead, the dead body, the mummy, the soul and ancestral spirit of the dead, death as separation and transition, as homecoming, and as secret. *Death and Salvation in Ancient Egypt* also includes a fascinating discussion of rites that reflect beliefs about death through language and ritual.

General History of Africa International Scientific Committee for the drafting of a General History of Africa, 1981-12-31 Deals with the period beginning at the close of the Neolithic era, from around the eighth millennium before our era. This period of some 9,000 years of history has been sub-divided into four major geographical zones, following the pattern of African historical research. Chapters 1 to 12 cover the corridor of the Nile, Egypt and Nubia. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the part of Africa later called the Maghrib and its Saharan hinterland. Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.--Publisher's description
