America's Fire Engine Walter M.P. McCall, Alan M. Craig, 2022-11-16 As World War II drew to a close, America's premier fire apparatus builder--the American-LaFrance Foamite Corp. of Elmira, N.Y.--bet the company's future on its radical new cab-ahead-of-engine 700 Series fire engines. In a spectacular gamble to capture the superheated postwar market, all of the company's existing products were discontinued and its customers were essentially told to take it or leave it. This bold gamble paid off and 700 Series rigs soon filled firehouses across the nation, sweeping aside all competitors and ultimately defining the breakthrough 700 as America's Fire Engine. This is the first comprehensive history of the game-changing 700. Individual chapters detail not only each of the eight major vehicle types but also the origins, design controversies, manufacturing, and marketing of the 700 and short-lived transitional 800 Series. The book includes a meticulously researched registry of every 700/800 series apparatus delivered, supported by many interpretive tables detailing production, specifications and major fire department fleets.

The Vanguard of the Atlantic World James E. Sanders, 2014-09-10 In the nineteenth century, Latin America was home to the majority of the world's democratic republics. Many historians have dismissed these political experiments as corrupt pantomimes of governments of Western Europe and the United States. Challenging that perspective, James E. Sanders contends that Latin America in this period was a site of genuine political innovation and popular debate reflecting Latin Americans'

visions of modernity. Drawing on archival sources in Mexico, Colombia, and Uruguay, Sanders traces the circulation of political discourse and democratic practice among urban elites, rural peasants, European immigrants, slaves, and freed blacks to show how and why ideas of liberty, democracy, and universalism gained widespread purchase across the region, mobilizing political consciousness and solidarity among diverse constituencies. In doing so, Sanders reframes the locus and meaning of political and cultural modernity.

Emergency Operations Manual United States. Army. Corps of Engineers. Baltimore District, 1973

The Ash Warriors C. R. Anderegg, 2000 In November 1991 the American flag was lowered for the last time at Clark Air Base in the Philippines. This act brought to an end American military presence in the Philippines that extended back over 90 years. It also represented the final act in a drama that began with the initial rumblings in April of that year of the Mount Pinatubo volcano, located about nine miles to the east of Clark. This book tells the remarkable story of the men and women of the Clark community and their ordeal in planning for and carrying out their evacuation from Clark in face of the impending volcanic activity. It documents the actions of those who remained on the base during the series of Mount Pinatubo's eruptions, and the packing out of the base during the subsequent months. This is the story of the Ash Warriors, those Air Force men and women who carried out their mission in the face of an incredible series of natural disasters, including volcanic eruption, flood, typhoons, and earthquakes, all of which plagued Clark and the surrounding areas during June and July 1991.

The Well of Loneliness Radclyffe Hall, 2015-04-23 This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

Films that Work Vinzenz Hediger, Patrick Vonderau, 2009 Industriële films worden gezien als een apart filmgenre van de twintigste eeuw. Ze werden geproduceerd en gesponsord door de overheid en grote bedrijven en moesten vooral aan de wensen van de sponsors voldoen, en niet zo zeer aan die van de filmmakers. In de hoogtijdagen werkten er duizenden mensen aan deze industriële films. Zo zijn er vakbladen en filmfestivals ontstaan door samenwerking met grote bedrijven als Shell en AT & T. Daarnaast hebben belangrijke regisseurs, zoals Buster Keaton, John Grierson en Alain Resnais, aan deze films meegewerkt. Toch lijkt de industriële film geen spoor te hebben achtergelaten in het filmische culturele discours. *Films that Work* is het eerste boek waarin de industriële film en zijn opmerkelijke geschiedenis worden onderzocht.

Korean War Aces Robert F Dorr, 2013-01-20 The first virtually all-jet war, the conflict in Korea saw F-86 Sabres of the USAF take on MiG-15s of the North Korean and Chinese air forces. Although the Allied pilots were initially taken aback by the ability of the communist fighter in combat, sound training and skilful leadership soon enabled Sabre pilots to dominate the dogfights over the Yalu River. In all 39 F-86 pilots achieved ace status, and a number of these are profiled in this volume, as are notable pilots from the US Navy, Marine Corps and Royal Navy and, for the first time, the handful of MiG-15 aces.
